Parflex Thermoplastic & Fluoropolymer Products  
Hose, Tubing, & Fittings 2017

ENGINEERING YOUR SUCCESS.

Extra care is taken in the preparation of this literature but Parker is not responsible for any inadvertent typographical errors or omissions. Information subject to change without notice. The information in this catalog is only accurate as of the date of publication. For a more current information base, please consult the Parflex Division web site at [www.parker.com/pfd](http://www.parker.com/pfd).

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS  
DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

### **Offer of Sale**

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the "Offer of Sale".

# Welcome to The Parflex Division

As part of the Parker Fluid Connectors Group, the Parflex Division is responsible for the design and manufacture of hoses and tubing to handle extreme applications. Products include thermoplastic and fluoropolymer hose and tubing, hose bundles, harnesses and accessories.

The Parflex Division includes the Ravenna, OH headquarters and manufacturing facilities in:

- Manistowoc, WI
- Fort Worth, TX
- Mansfield, TX
- Huttenfeld, Lampertheim, Germany - sister division, ***polyflex***
- Stafford, TX
- Randleman, NC
- Monterrey, Mexico

## Our Charter

To be the global leader in engineered polymer-based products while providing system solutions for the conveyance and control of fluids.

## The Parflex Advantage

When compared to wire reinforced rubber hose or even metal tubing, thermoplastic hose offers significant added value. Thermoplastic provides excellent chemical compatibility, noise-level reduction and ultraviolet and corrosion resistance, while fiber reinforcement retains flexibility — even at low temperatures. In addition, Parflex has long-length capabilities resulting in less scrap being generated during assembly....fewer connections, results in fewer potential leak points.

For fluoropolymer hose, Parflex hoses are designed to handle high temperatures in chemical and corrosive environments for the industrial mobile, oil and gas, pharmaceutical and food and beverage markets. Specialty products like PAGE-flex™ SBF™ (a hose with 1/2 the minimum bend radius of a conventional smooth bore hose) and USP Class VI certified EPDM rubber covered hoses are available. We also design a full range of Parflex and PAGE hose fittings.

**Tap Into Our Resources** in our state-of-the-art Polymer Innovation Center, driven by the single purpose of finding solutions to your most demanding fluid connector requirements. Abrasion, chemical compatibility, purity and permeation are just a few of the challenges our engineers work on everyday. The Polymer Innovation Center is your portal to an array of solution-driven abilities and assets, all conveniently situated within a single organization.

*For detailed ordering information, please consult price list or contact Parflex Division.*

# Catalog Icons & Symbols

## 1 Table of Contents

For quick, easy listing of topics covered by section, reference the Table of Contents on pg. 3.

2

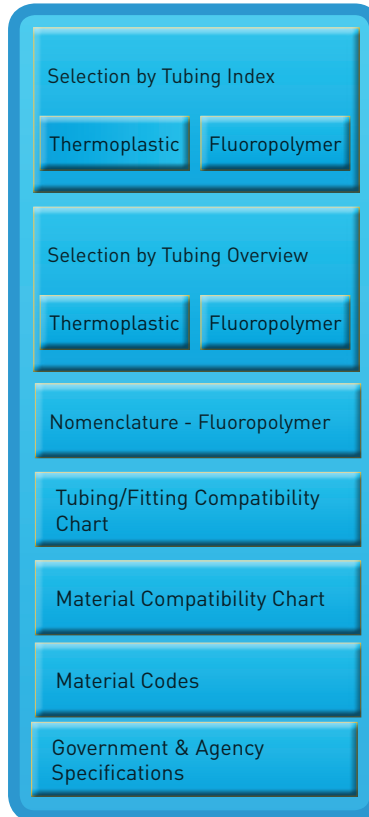

### Hose Quick Links

A vertical menu for Hose Quick Links with a grey background. It contains several buttons: 'Selection by Visual Index', 'Selection by Construction Specifications' (with sub-buttons for 'Thermoplastic' and 'Fluoropolymer'), 'Selection by PSI' (with sub-buttons for 'Thermoplastic' and 'Fluoropolymer'), 'Nomenclature' (with sub-buttons for 'Thermoplastic' and 'Fluoropolymer Hose'), 'Fluoropolymer Hose' (with sub-buttons for 'Parflex' and 'PAGE'), 'Material Compatibility Chart', and 'Government & Agency Specifications'.

3

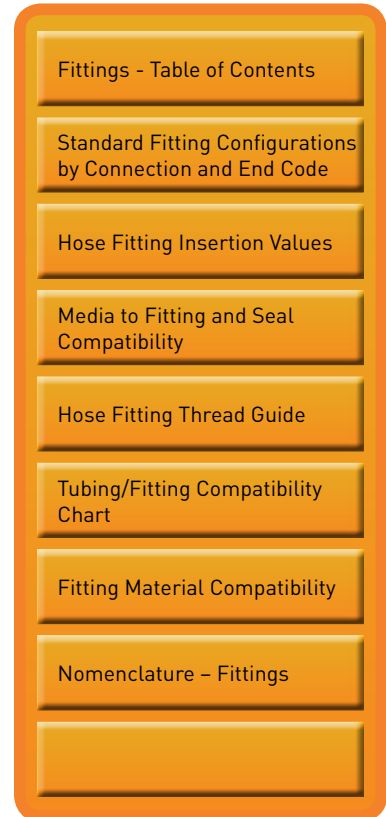

### Tubing Quick Links

A vertical menu for Tubing Quick Links with a blue background. It contains several buttons: 'Selection by Tubing Index' (with sub-buttons for 'Thermoplastic' and 'Fluoropolymer'), 'Selection by Tubing Overview' (with sub-buttons for 'Thermoplastic' and 'Fluoropolymer'), 'Nomenclature - Fluoropolymer', 'Tubing/Fitting Compatibility Chart', 'Material Compatibility Chart', 'Material Codes', and 'Government & Agency Specifications'.

4

### Fitting Quick Links

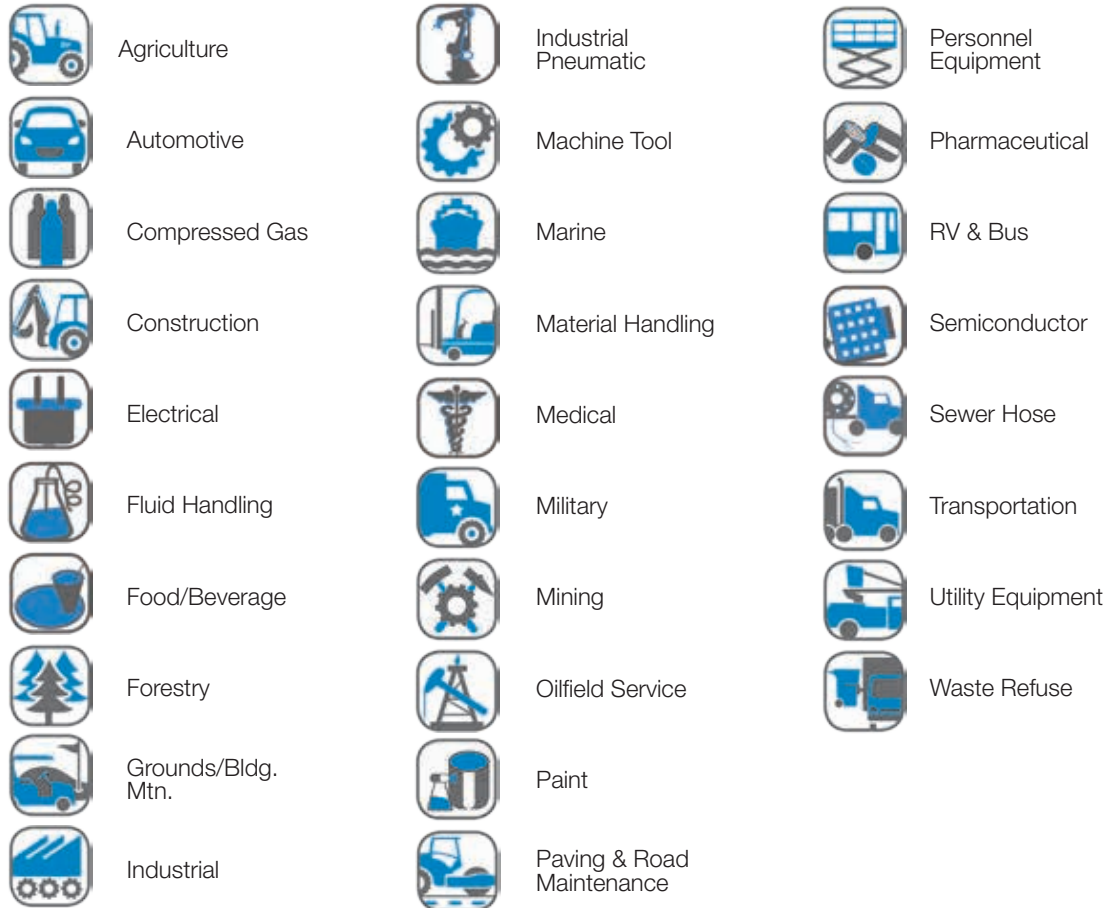

A vertical menu for Fitting Quick Links with an orange background. It contains several buttons: 'Fittings - Table of Contents', 'Standard Fitting Configurations by Connection and End Code', 'Hose Fitting Insertion Values', 'Media to Fitting and Seal Compatibility', 'Hose Fitting Thread Guide', 'Tubing/Fitting Compatibility Chart', 'Fitting Material Compatibility', 'Nomenclature - Fittings', and an empty button at the bottom.

# reducing performance.

The thermoplastic hoses in this catalog are recognized for their cleanliness and their ease of use in confined spaces, their flexibility and light weight, their abrasion resistance and the fact that they deliver the same performance as competitive rubber hoses, but in a more compact design. In addition, they are available in much longer lengths than a rubber hose, reducing possible leak points and the accumulation of scrap from producing hose assemblies.

Parflex thermoplastic hoses are also available as a bonded assembly, preventing hose-to-hose abrasion and ease of routing for applications requiring more than one hose.

For tubing, Parflex offers one of the largest selections available from one manufacturer. High and Low Temperature Tubing, Heat Shrink, Retractable Coils and many other specialty designs are available, including convenient harness and bundle integration. Similar to bonding, harnesses and bundles ensures quick assembly, and eliminate waste and improve throughput.

#### Thermoplastic Tubing

- Polyethylene
- Nylon
- TPE (thermoplastic elastomer)
- Polypropylene
- Polyurethane
- Clear Vinyl
- Airbrake Tubing
- Coiled Tubing

#### Fluoropolymer Tubing

- PTFE
- FEP
- PFA
- High Purity PFA
- PVDF
- Heat Shrink
- Convolved
- Spiral Wrap

Parflex supplies a variety of fitting and hose equipment options including crimpers, cutters and more for creating hose assemblies.

For extreme temperatures (above 500°F) or chemical compatibility, Parflex provides Metal Hoses (refer to Catalog 4690) and for ultra-high pressures, **polyflex** Ultra High Pressure Hose and Fittings (view Catalog 4900).

For detailed ordering information, please consult price list or contact Parflex Division.

# Thinking “Extreme” Think Parflex

## Thermoplastic Hose Advantages

Parker Parflex offers an extensive selection of high-quality thermoplastic and fluoropolymer hose and tubing, fittings and accessory solutions for “extreme” applications. We specialize in designing products to meet specific needs for increased profitability and efficiency.

In some product lines, continuous lengths up to 3,500 meters (11,484 feet) are available.

## Long Lengths

## Smaller I.D.

The Parflex manufacturing process does not require a mandrel for support of the core tube so hoses can be made to a smaller inner diameter such as 1.3 mm (.051 inch).

Thermoplastic

Elastomer (rubber)

~20%  
IMPROVEMENT

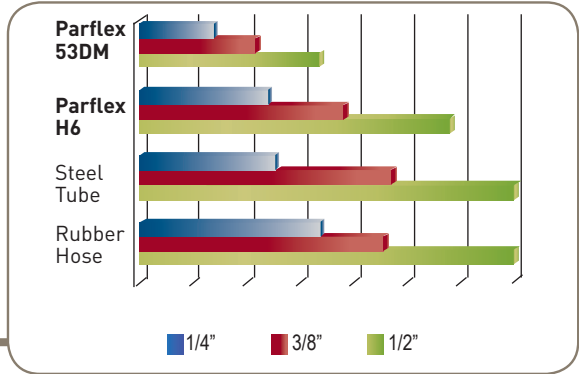

Size	Typical 100R17 Hose (rubber) inch / mm		D6R Hose inch / mm		Space Benefit
-4	0.52	13.2	0.46	11.7	11%
-6	0.67	17.0	0.61	15.5	9%
-8	0.81	20.6	0.76	19.3	7%
-10	0.98	24.8	0.96	24.4	2%
-12	1.15	29.2	1.15	29.2	0%
-16	1.47	37.3	1.44	36.5	2%

Compact designs allow for a tighter bend radius, allowing the hose to be used in smaller enveloped areas and facilitate quicker installs (up to 50%).

## Compact O.D.

# Light Weight

Parflex products are lighter in weight due to their fiber reinforcements. In fact, a Parflex hose can weigh more than 70% less than a comparable rubber hose assembly.

In our new Polymer Innovation Center, Parflex engineers blend resins and create patented designed hoses to reduce permeation and withstand hours of abrasion without damaging the hose.

# Abrasion Resistance

# Multi-Bonded

Parflex bonded assemblies help prevent hose-to-hose abrasion at high stress levels. Bonding 2 to 11 varying-sized hoses (maximum 10 inches (254 mm) wide) together, bonded assemblies keep hoses from rubbing against each other or tangling.

When will a **fluoropolymer product** add longevity to your application?

High temperatures and extreme chemicals are a couple of reasons.

See next page for more information or visit [www.whyfluoropolymers.com](http://www.whyfluoropolymers.com)

*For detailed ordering information, please consult price list or contact Parflex Division.*

# Thinking “Extreme Temperatures” Think Parflex PTFE

## Fluoropolymer Hose Advantages

Parker Parflex manufactures PTFE hose for most markets that require high temperatures, chemical resistant hoses, or have applications where lubricity plays a critical factor in the success of the operation. Increased lubricity facilitates flow and makes for easy cleaning.

### Chemical Compatibility

The chemical compatibility of fluoropolymers is far greater than conventional thermoplastics or rubber products.

### High/Low Temperatures

PTFE products boast an operating temperature range of -100°F (73°C) to 500°F (260°C). For FEP and PFA, view specific materials for actual operating temperatures.

In cold or heat, Fluoropolymers provide improved performance to flexing, vibration and impulse. Customers who make the switch not only reduce unscheduled maintenance repairs, but often, warranty repairs as well.

10  
YEARS  
Rubber

Thermoplastic/Fluoropolymer

## Shelf Life

Under optimal storage conditions, fluoropolymer and thermoplastic hose and tubing products should have unlimited storage life prior to initial usage.\*

**\*Per SAE J517 - Hose, in bulk form passing visual inspection and proof test, shall be acceptable for use up to and including 40 quarters (10 years) from the date of manufacture. Shelf life of thermoplastic and polytetrafluoroethylene (PTFE) hose is considered to be unlimited. Hose assemblies that pass inspection and proof test shall not be stored for longer than 2 years.**

When will a  
**thermoplastic product**  
be more advantageous?

One reason is when you need a multi-line bonded hose.

See page 8 for more information or visit [www.whethermoplastics.com](http://www.whethermoplastics.com)

# Selecting the Correct **Hose**

**Before selecting** hoses from Catalog 4660, it will be easier if you familiarize yourself with the basics of thermoplastic and fluoropolymer hoses by reviewing the symbols on pg. 4 and "Hose Assembly Part Numbers" on page A-12. Also, the Parflex Hose Selection Charts (located in Section A) will help pinpoint the hose you require. It will help you identify individual hoses by:

- Brief general description
- Specific size with corresponding working pressure
- Industry specification (ie. SAE)
- Core tube material
- Reinforcement/type of construction
- Cover material
- Specific page number where further detailed product information can be found

For fittings, refer to the visual indexes in Section E.

## “STAMPED”

### Size

The appropriate inside and outside diameters

### Temperature

The ambient and minimum/maximum temperature of the material being conveyed

### Application

External conditions including abrasion, climate, heat, flexing, routing and degrees of bending

### Media

The composition of the substance being conveyed and chemical compatibility with the hose inner core and, if applicable, the outer cover

### Pressure

The maximum vacuum or pressure of the system, including pressure spikes

### Ends

The appropriate end connection, material and attachment method for the application

### Delivery

Testing, quality, packaging, and delivery requirements

*For detailed ordering information, please consult price list or contact Parflex Division.*

# Overview Parflex Part Numbers

To make ordering of Parflex products easier, a part number description section has been added for hose, tubing and fitting products. For additional nomenclature information, refer to the following pages:

- Hose - Section A .....pgs. A-18 : A-21
- Tubing - Section B .....See specific product page - Fluoropolymer pgs. B-56 : B-57
- Fittings - Section E .....pgs. E-3

## Hose Part Numbers

Parflex offers thermoplastic and fluoropolymer hoses in standard and custom designs such as bonded, formed, extra flexible, specialty braid and jackets and more...

### Thermoplastic & Fluoropolymer

Example: 520N – 8

**520N** – 8 – **Hose type** (General Hydraulic Hose)

520N – **8** – **Hose inside diameter** dash size (1/2")

### Parflex PAGE Fluoropolymer

Example: 16-SCW

**16**-SCW – **Hose inside diameter** dash size (1")

16-**SCW** – **Hose type** (Seamless Convolute with Stainless Steel Braid)

## Hose Assembly Part Numbers

Example: F540N0639080808C-30"

This assembly example reflects a 1/2" I.D., 540N hose with a female JIC 37° swivel straight fitting on the first end and a female JIC 37° - swivel - 90° elbow fitting on the other. The fittings are stainless steel and crimped (permanently attached) onto the hose. The overall length is 30".

<p><b>1. Prefix</b></p> <p>F540N0639080808C-30"</p> <p>F = Crimp R = Field Attachable A = 54 Series Factory</p>	<p><b>3. Fitting 1<sup>st</sup> End</b></p> <p>F540N0639080808C-30"</p> <p>SAE 1/2" female JIC 37° swivel straight fitting</p>	<p><b>5. Size 1<sup>st</sup> End</b></p> <p>F540N0639080808C-30"</p> <p>1/2"</p>	<p><b>7. Hose End Dash Size</b></p> <p>F540N0639080808C-30"</p> <p>1/2"</p>
<p><b>2. Hose type</b></p> <p>F540N0639080808C-30"</p> <p>General Hydraulic Hose</p>	<p><b>4. Fitting 2<sup>nd</sup> End</b></p> <p>F540N0639080808C-30"</p> <p>SAE 1/2" 90° female JIC 37° swivel elbow fitting</p>	<p><b>6. Size 2<sup>nd</sup> End</b></p> <p>F540N0639080808C-30"</p> <p>1/2"</p>	<p><b>8. Fitting Material</b></p> <p>F540N0639080808C-30"</p> <p>- Blank = Steel (unless noted) - C = Stainless - B = Brass</p>
<p><b>9. Length</b></p> <p>F540N0639080808C-30"</p> <p>30" overall length</p>			

- A complete nomenclature guide for Parflex PAGE hoses is located in Section A on pg. A-21.

## Hose Fittings Part Numbers

Parflex has expanded the Fitting Section to include the 56 Series fittings, designed for global availability and with a smaller, compact construction.

### Example: 10356-8-6

This example describes a permanent crimp 1/2" Male JIC 37° Rigid hose end with a 3/8" hose end. This fitting is constructed of steel since the designated material is blank.

10356-8-6 – **Fitting Type** (1 = Permanent/Crimp)

10**3**56-8-6 – **End Configuration Code**  
(Male JIC 37° Rigid)

1035**6**-8-6 – **Fitting Series** (56 Series)

10356-**8**-6 – **End Connection Size** (1/2")

10356-8-**6** – **Hose Size** (3/8")

### Fitting Material

- Blank = Steel (unless otherwise noted)
- B = All Brass
- C = Stainless Steel
- S = All Carbon Steel – Used only with PTFE Fittings

## Tubing Part Numbers

Parflex has expanded the Tubing Section to include the TexLoc® Fluoropolymer product line. In addition to smooth bore tubing, TexLoc products include beading, convoluted tubing and heat shrinkable tubing. This tubing is supplied in natural and colors are available upon request. For a detailed fluoropolymer nomenclature guide, review Section B, pgs. B-56 : B-57.

### Thermoplastic

#### Example: U-21-BLU-0250

U-21-BLU-0250 – **Polyurethane**

U-**21**-BLU-0250 – **Tube O.D.**

in sixteenths of an inch (1/8")

U-**21**-BLU-0250 – **Tube I.D.**

in sixteenths of an inch (1/16")

U-21-**BLU**-0250 – **Color** (Blue)

U-21-BLU-**0250** – **Package Qty.** (250')

#### Available colors

- |                  |                              |
|------------------|------------------------------|
| ● BLK = Black    | ● ORG = Orange               |

Parker Hannifin Corporation | Parflex Division | Ravenna, Ohio | [parker.com/pfd](http://parker.com/pfd)

# Typical Applications - Parflex

## Mobile Hydraulics

### Markets

- Material Handling Equipment
- Marine
- Agricultural Equipment
- Utility Equipment
- Sewer Cleaning Equipment
- Aerial Lift
- Construction Equipment
- Rough Terrain Equipment
- Refuse Haulers
- Mining

Parflex Mobile Hydraulic products meet the needs of four primary market segments: aerial lift, agriculture, construction and material handling.

### Applications

- Aerial Lift Hydraulic Tools
- Cold Storage
- Compressor Discharge
- Conveyor Equipment
- Diagnostics/Gaging
- General Hydraulics
  - Off-Road Construction
  - Earth Moving Equipment
  - Lift Trucks
  - Material Handling
  - Construction Equipment
  - Refuse Haulers
  - Agricultural Equipment
- Implement Hydraulic Power
- Lubrication Systems
- Mower Attachments
- Over-the-Sheave
- Pilot Control Lines
- Power Steering
- PTO's
- Turbo Drain Lines

## Fluid Handling

### Markets

- Industrial Equipment
- Utilities (CNG)
- Semiconductor
- Chemical
- Commercial Refrigeration
- Water Treatment
- Power Cleaning
- Power Generation
- Car Care
- Pharmaceutical
- Bio-Pharm
- Pulp & Paper
- Oil & Gas

Parflex Fluid Handling products are categorized by their thermoplastic and fluoropolymer (PTFE) makeup. Parflex offers standard and custom designed solutions such as bonded, harnessed and formed products.

### Applications

- Agricultural Spraying
- Alternative Fuels
- Breathing Air Systems
- Car Care
- Carpet (Power) Cleaning
- Chemical & Gas Transfer
- Chemical Dispensing
- Coolant Lines
- Dispensing
- Food and Beverage
- Lubrication Systems
  - Machine tool
  - Heavy equipment
- Oil & Gas Transfer (Petrochemical)
- Pharmaceutical
- Potable Water Delivery
- Semiconductor (Pure air or gas transfer)
- Sewer Cleaning
- Steam Transfer

Parflex offers a diverse product line that includes lightweight, non-marring, flexible hose and thermoplastic or fluoropolymer tubing.

## Applications

- Air Tools
- Automotive Maintenance
- Carpentry Framing
- End-of-Arm Tooling
- General Robotics
- Metal Working
- Pneumatic Systems
- Robotic Welding
- Testing Equipment

## Industrial Pneumatics

### Markets

- Robotics
- Packaging Machinery
- Machine Tool
- Carpentry
- Automotive Maintenance
- Medical Equipment
- Laboratory Equipment
- Furniture Manufacturing
- Paper Manufacturing

## Our products thrive in harsh environments

Parflex develops thermoplastic hose products from fiber, wire and aramid fiber reinforced products to steel, stainless steel, and brass fittings to equipment & accessories for today's fastest growing markets.

## Applications

- Automotive Maintenance
- Dispensers
- Fermenters
- General Hydraulic Lines
- Hydraulic or Vacuum Connections
- Injection Molding
- Lubrication Systems
- Machine Tool
  - Metal Forming
  - Bending Machines
  - Vertical Machining
  - Metal Cutting
- Molding and Transfer Lines for Plastics
- Press Brakes
- Pumps

## Industrial Hydraulics

### Markets

- Machine Tools
- Hydraulic Tools
- Mining
- Patient Handling
- Car Care
- Automotive
- Rescue Tools
- Lubrication Systems
- Recreational Vehicles

*For detailed ordering information, please consult price list or contact Parflex Division.*

# Typical Applications - Parflex

## Transportation

### Markets

- Class 8 Heavy Truck
- Standard Box Truck
- Diesel Truck
- Bus
- Refrigeration Truck
- Refuse Truck
- Fire Truck
- Trailers
- Street Sweepers
- Military Vehicles
- RV's

An extensive line of transportation products includes a selection of air brake tubing for standard distribution and large OEMs, air brake harnesses, coils, fuel tubing and 100% pressure-tested fleet tubing for use with diesel fuel.

### Applications

- Air Lines
- Coiled Air Brake
- Compressed Natural Gas
- Compressor Discharge
- Exhaust and AC Lines
- Fuel Lines
- Fuel Transfer
- Hydraulics
- Hydrostatic Pumps
- Lubrication Systems
- Power Steering
- Pump Outlets
- SCR System DEF Conveying
- Service/Emergency Connections

## Life Science

### Markets

- Medical Device
- Medical Equipment
- Dental
- Pharmaceutical
- Veterinary

Parflex has extended the selection of medical tubing capabilities and specializes in the extrusion of precision tolerances for custom tubing and custom profiles of PTFE, ePTFE, FEP, PFA, and ETFE.

### Applications

- Air and Gas Transport
- Blood Analyzer
- Catheter Construction
- Clean Room Equipment
- Dental Equipment
- Endoscopic Instruments
- Forming Devices
- General Robotics
- Introducers
- Lab Instruments
- Packaging
- Sheathing
- Tracheotomy Tubes

Parflex products for the Food and Beverage market are comprised of FDA and NSF compliant hose and tubing. Specialty hoses and tubing products are also available for increased vacuum or purity.

## Applications

- Transport of Edible Oils, Syrup, Milk and other Food Products
- Chillers
- Commercial Freezers
- Dishwashers
- Dispensing Equipment
- In-plant Transfer for Processing
- Label/Adhesive Machinery
- Packaging Equipment
- Tank Transfer of Raw Products

## Food & Beverage

### Markets

- Food
- Beverage

COMPONENT

-NSF-51-

Parflex Multitube® offers a variety of thermal control tubing products, such as steam and electric trace tubing, as well as analyzer and probe support bundles. Refer to Catalog 4200-M-2, Instrument and Heat Trace Tubing Products for product details.

## Applications

- Analyzers
- Condensate Return Lines
- Cooling Water Lines
- Environmental Monitoring
- Instrumentation Lines
- Liquid Nitrogen Transfer
- Maintenance Bundles
- Probe Support Umbilicals
- Process Lines
- Refrigeration
- Sample Lines
- Stack Gas Sampling
- Steam Purge / Steam Supply Lines

## Energy

### Markets

- Chemical Processing
- Environmental
- Power Generation
- Process Control
- Refineries
- Utilities

# Understanding Parflex Hoses

Parflex hoses are designed to handle extremes. They are used in some of the harshest applications around, such as over-the-sheave or aerial lift, because they are specifically designed to handle extreme abrasion, temperatures, flexing, impulse and other factors that cause many hoses to fail.

## Hydraulic & Pneumatic Hose Selection

Parflex offers several lines of hydraulic and pneumatic hoses; General Hydraulic, Specialty and Hybrid® hoses. Specialty hoses were designed to solve specific application problems. Hybrid® Hoses belong specifically to Parflex, with no exact competitor equivalents. These hoses were developed to cross typical SAE boundaries and meet specific challenges our customers were bringing to us. Some of these have the new, **TOUGHJACKET™** abrasion resistant cover, offering 100x the abrasion protection of a regular polyurethane cover.

The visual index and hose pages indicate which hoses are Hybrid® and **TOUGHJACKET™** designs.

Review the STAMPED guide (Size, Temperature, Media, Application, Pressure, End Configuration, and Delivery Preferences) on page 13 to help narrow your search for the desired product.

## Fluoropolymer Selection

Parflex offers two lines of Fluoropolymer Hoses; the traditional Parflex PTFE hoses, many that meet 100R14 standards, and the PAGE hose line, comprised of specialty braid and construction options.

Hoses in PAGE product line are manufactured with materials that are compliant to the following standards:

- FDA 21 CFR 177.1550
- USP Class VI
- ISO 10093, Sections 5, 6 10 and 11

The visual index and hose pages indicate which hoses are from the PAGE product line.

## Hose Assemblies

To determine hose part numbers for assemblies use the following nomenclature pages:

- Parflex Thermoplastic Hose Assembly Nomenclature pg. A-18
- Parflex PTFE Hose Assembly Nomenclature pg. A-20
- PAGE Product Line - "True-Bore" & Convuluted Hose Assembly Nomenclature pg. A-21

# How to Read the Hose Section

1 Part Number	2 Nominal I.D.		3 Maximum O.D.		4 Maximum Working Pressure		5 Minimum Bend Radius		6 Weight		7 Permanent Fitting Series
#											
	inch	mm	inch	mm	psi/73°F	bar/23°C	inch	mm	lbs./ft.	kg./mtr.	
D604	1/4	6	.51	13	3,000	20.7	2.00	51	.12	.18	43/HY

Base part number example.

**NOTE:** The primary dimensions are in black. The metric/inch equivalents appear in blue.

## 1 Part Number

Hose Series Part Number - When two part numbers are listed, the second number is the static-dissipative or non-conductive design.

## 2 Inside Diameter

A critical value along with pressure when calculating fluid flow rate and pressure drop.

## 3 Outside Diameter

A critical measurement when considering hose fittings and applications where envelope size is limited.

## 4 Working Pressure

Working pressure rating must meet or exceed the maximum operating pressure of the system including pressure spikes.

## 5 Minimum Bend Radius

Minimum radius that the hose can be bent. Exceeding the bend radius can cause kinking, inner tube washout, or excessive stress on reinforcement resulting in shortened service life.

## 6 Weight

Provided where weight is a critical parameter in the design of the system.

## 7 Approved Fitting

Permanent or field attachable fitting series approved for selected hose. Products with no fitting selection are only available in factory built assemblies.

# Hose Constructions

## Thermoplastic Hose Construction

### 1. Core

Contains Media

Materials: Nylon, Polyethylene, Polyurethane, Copolyester

### 2. Reinforcement

Provides Resistance to Internal Pressure

Materials: Fiber (Nylon, Polyester, Aramid), Steel, Stainless Steel

### 3. Cover

Protects Reinforcement

Advantages: Aesthetics, Color and Marking

Materials: Polyurethane, Nylon, Synthetic Rubber, Copolyester, Polyurethane, Proprietary Blend (PFX)

## Introducing, New TOUGHJACKET™ Covers

Manufactured from Parflex **TOUGHJACKET™** Polyurethane and designed to withstand the strains of demanding use. Look for the TJ - Currently found on 560TJ, 563TJ, 590TJ and 594TJ.

## Fluoropolymer Hose Construction

### 1. Core

Contains Media

Materials: PTFE, FEP or PFA

Style: Smoothbore or Convuluted

### 2. Reinforcement

Provides Resistance to Internal Pressure

Materials: Steel, Stainless Steel, Polypropylene, Nomex®, Proprietary Composite

### 3. Cover or Protective Sleeve

Protects Reinforcement

Materials: Silicone, Polyolefin, EPDM Rubber

Nomex® is a registered trademark of E. I. du Pont de Nemours and Company.

**Example:** 32J03C13C0-0120-A

**Size:** 2"      **Style:** SCWV

**Braid:** 316 SS Single Braid

**Core:** Heavy Wall Open Pitch Convoluted PTFE

**End 1:** 2" Male Pipe NPT Hex

**End 2:** 2" Male Pipe NPT Step Down

**Length:** 120" from end of Male NPT to end of Male Step Down

**NOTE:** Length calculations for PAGE hose assemblies are typically made sealing surface to sealing surface per the NAHAD Fluoropolymer Hose Assembly Specification Guidelines unless otherwise requested by customer at time of order.

The part numbering system shows the entire product line offered by the Parker PAGE International business unit. This catalog section only displays a few common hoses.

For detailed ordering information, please consult price list or contact Parflex Division.

# D6R/D6RX – Hybrid® Hose

## Features

- Up to 40% lighter than comparable rubber hoses
- Wide range of fluid compatibility
- Compact hose construction
- Bend radius less than half of conventional SAE 100R1AT & 100R2 hoses
- UV resistant cover
- Low force to flex
- 3,000 psi working pressure

## Applications/Markets

- Medium pressure hydraulic applications
- Agricultural Equipment
- Construction Equipment
- Lubricating Oils
- Transportation

## Certifications

- Meets/Exceeds ISO 11237 Type R17 Pressure requirements
- Meets/Exceeds SAE 100R17 Performance
- MSHA accepted

## Construction

Tube: Copolyester  
 Reinforcement: High Tensile Steel Wire  
 Cover: Smooth Synthetic Rubber

## Operating Parameters

- Temperature Range:
- Petroleum base hydraulic fluids and lubricating oils within a temperature range -40°F (-40°C) to +250°F (121°C)
  - Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids limited to +185°F (+85°C)
  - Water/glycol hydraulic fluids limited to +135°F (+57°C)

Vacuum Rating: 28 inch Hg  
 Change in length at Max. Working Pressure: +2% to -4%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

56 Series – pg. E-10  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Color

- Black

## Notes

\* X designates a continuous, long length reel (ie D6RX04)

# HFSR Hybrid® Hose with Rubber Cover

## Features

- Up to 40% lighter than comparable rubber hoses
- Wide range of fluid compatibility
- Compact hose construction
- Bend radius less than half of conventional SAE 100R1AT & 100R2 hoses
- UV resistant cover
- Low force to flex

## Certifications

- Meets/Exceeds SAE 100R1AT Performance
- Meets/Exceeds ISO 1436 Type 1SN Pressure requirements

## Applications/Markets

- Industrial
- Construction
- Waste & Refuse
- Utility Equipment
- Paving and road maintenance

# H6 – Hydraulic Hose, Constant Pressure 3,000 psi

## Features

- Largest temperature range in a medium pressure hydraulic hose
- Low length change under pressure

## Certifications

- Meets/Exceeds SAE 100R17 Performance

## Applications/Markets

- Medium pressure hydraulic applications
- Over-the-sheave and boom hose applications

56 Series – pg. E-10    HY Series

HY Series - Available from Parker Hose Products Division

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Black

## Notes

- \*Two wire braid, Non-perforated cover
- Twin line hose available
- Preformed assemblies
- Non-Perforated Cover

A-25

# R6 – Abrasion King® Hose, Constant Pressure 3,000 psi

## Features

- Light weight
- Excellent flexibility
- Excellent abrasion resistance
- Blue plait provides hose identification

## Certifications

- Meets/Exceeds SAE 100R17 Performance

## Applications/Markets

- Medium pressure hydraulic applications
- Agricultural Equipment

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
R604	1/4	6	.53	13	3000	20.7	2.00	51	.11	.16	HY
R606	3/8	10	.69	18	3000	20.7	2.50	64	.20	.30	HY
R608	1/2	13	.84	21	3000	20.7	3.50	89	.27	.40	HY
R610*	5/8	16	1.09	28	3000	20.7	4.00	102	.51	.76	HY
R612*	3/4	19	1.24	31	3000	20.7	4.75	121	.71	1.06	HY
R616*	1	25	1.55	39	3000	20.7	6.00	152	1.00	1.49	43

## Construction

Tube: Copolyester

Reinforcement: One or two braids of High Tensile Steel Wire

Cover: Abrasion-resistant Nylon Fabric

## Operating Parameters

Temperature Range:

- (R604 thru R610) -50°F (-45°C) to +250°F (121°C)  
(R612 thru R616) -50°F (-45°C) to +212°F (100°C)
- Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids limited to +135°F (+57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

HY Series 43 Series

Fittings available from Parker Hose Products Division

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Black

## Notes

\*Two wire braid

# HTB – Eliminator® Hybrid® Hose

## Features

- Four-spiral wire hose performance in a high tensile two-wire braid construction
- Excellent flexibility
- Compact design

## Certifications

- MSHA Accepted

## Applications/Markets

- High-pressure hydraulic applications typically reserved for spiral wire reinforced hoses

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
HTB04*	1/4	6	.62	16	7,000	48.3	4.00	102	.27	.40	HY
HTB06	3/8	10	.76	19	5,500	37.9	6.00	152	.37	.55	43

HTB10	5/8	16	1.03	26	4,000	27.6	8.00	203	.52	.77	43
HTB12	3/4	20	1.20	30	4,000	27.6	9.50	241	.73	1.09	43
HTB16	1	25	1.50	38	3,500	24.1	12.00	305	1.01	1.50	43

## Construction

Tube: Copolyester

Reinforcement: Two braids of High Tensile Steel Wire

Cover: Smooth Synthetic Rubber

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +212°F (100°C)
- Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids limited to +135°F (+57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°)

# HJK – Highjack® Jackline Hybrid® Hose

## Features

- 10,000 psi Jack Hose

## Certifications

- MSHA Accepted
- Meets I J-100 Requirements

## Applications/Markets

- Used for high pressure jack line applications
- Not for high impulse applications

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight	
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.
HJK04	1/4	6	.62	16	10,000	69	4.0	102	.27	.40

## Construction

Tube: Copolyester

Reinforcement: Two braids of High Tensile Steel Wire

Cover: Smooth Synthetic Rubber

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +150°F (65°C)
- Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids limited to +135°F (+57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 3x Max. Working Pressure at 73°F (23°C)

## Fittings

HY Series - Available from Parker Hose Products Division

Connection configurations limited to: Male Pipe (01)

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Black

## Notes

Factory-made assemblies only

For detailed ordering information, please consult price list or contact Parflex Division.

# 560TJ – TOUGHJACKET™ SAE 100R1AT Hydraulic Hose

## Features

- Twin or multi-line available. Lighter and smaller than 100R1AT with longer lengths
- Fast response hose
- Polyurethane cover for best abrasion resistance

## Certifications

- Meets/Exceeds SAE 100R1AT Performance
- MSHA Accepted

## Applications/Markets

- Hydraulic circuits and systems wherever 100R1AT hose is specified
- Most synthetic hydraulic fluids, water and wide range of chemicals
- Industrial equipment
- Machine Tools

# 563TJ – TOUGHJACKET™ SAE 100R17 Hydraulic Hose 3,000 psi Constant Working Pressure

## Applications/Markets

- Medium pressure hydraulic applications
- Agricultural Equipment
- Construction Equipment
- Lubricating Oils
- Transportation

## Features

- Low length change under pressure makes it an ideal solution for boom or cable track applications where long lengths are required
- 2%-5% smaller O.D. than comparable 100R17 hoses
- 23%-42% lighter than comparable 100R17 hose
- Excellent flexibility
- Consistent long-lengths

## Certifications

- Meets/Exceeds SAE 100R17 Performance
- MSHA Accepted

# 510C – General Hydraulic Hose

## Features

- Excellent abrasion resistance
- Excellent flexibility
- Medium pressure service for permanent and field attachable fittings

## Certifications

- Meets/Exceeds SAE 100R7 except -2
- MSHA Accepted except -4

## Applications/Markets

- Industrial hydraulic systems
- Mobile hydraulic systems
- On-highway hydraulics systems (car carriers & trailers)

56 Series – pg. E-10    51 Series – pg. E-5

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Black

## Notes

- Perforated cover
- \*3/16" and 1/4" working pressure reduced to 3,000 and 2,750 psi respectively when using field attachable couplings
- 51 Series field attachable couplings are not intended for use on hose that has previously been in service

# 518C – Non-Conductive Hose

## Features

- Twin or multi-line constructions available
- High density braid for maximum impulse life without loss of flexibility

## Certifications

- Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per ft.
- Meets/Exceeds SAE 100R7 specifications and Electrical Standards except 518C-2 with respect to maximum working pressure
- ANSI A92.2

## Applications/Markets

- Medium pressure hydraulic service where hydraulic circuit exposure and contact with high voltage may be encountered
- Aerial lift equipment
- Hydraulic tools where exposure to high voltage may be encountered

## Construction

Tube: Copolyester  
 Reinforcement: Fiber  
 Cover: Proprietary Blend (PFX)

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +212°F (100°C)
- Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids limited to +135°F (+57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure: (SAE requires 4:1 Design Factor)

- 4:1 Design Factor is required if hose failure will result in movement of aerial device
- 3:1 Design Factor is acceptable if hose failure will not result in movement of aerial device

## Fittings

56 Series – pg. E-10    51 Series– pg. E-5

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Orange

## Notes

- Non-perforated cover
- Lay lines on this hose will have both ANSI and SAE maximum working pressure listed. ANSI A92.2 “Vehicle Mounted Elevating and Rotating Aerial Devices”
- \*3/16" and 1/4" working pressure reduced to 3,000 and 2,750 psi respectively when using field attachable couplings
- 51 Series field attachable couplings are not intended for use on hose that has previously been in service

# 518D – Non-Conductive Hose

## Features

- Nylon core for maximum resistance to permeable fluids.
- 518D-4 offers heavier polyurethane jacket improving abrasion resistance and ease of splitting bonded constructions
- Super high density braid allows smaller braid O.D. (518D-4)
- Twin or multi-line constructions available.

## Certifications

- Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per ft.
- Meets/Exceeds SAE 100R7
- ANSI A92.2

## Applications/Markets

- Medium pressure hydraulic service where hydraulic circuit exposure and contact with high voltage may be encountered
- Aerial lift equipment
- Hydraulic tools where exposure to high voltage may be encountered

# 515H – Compact/Light Weight Hose

## Features

- Twin or multi-line available
- Compact O.D., light weight, flexible
- Special order colors for system color coding

## Certifications

- MSHA Accepted

## Applications/Markets

- Hydraulic and pneumatic systems where a small O.D. hose is necessary
- Pilot Lines
- Joystick Controls

# 520N/528N – General Hydraulic Hose

## Features

- Twin and multi-line available
- Fast response, lighter and smaller O.D. than 100R2 hose

## Certifications

- Meets/Exceeds SAE 100R8
- 520N MSHA Accepted
- 528N Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

## Applications/Markets

- Hydraulic and pneumatic circuits and systems
- Hydraulic tool applications
- Ideal in hot water applications

# 526BA – Breathing Air Refill Hose

## Features

- 6000 psi Constant Pressure

## Certifications (Complies with:)

- CGA G7.1-1 Grade E Breathing Air Standards
- NFPA 1901

## Applications/Markets

- Integrated containment fill stations
- Mobile and stationary systems with or without cascade controls

- Mobile Trailer/Truck Systems
- Portable SCBA Fill

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
526BA-3	3/16	5	.42	11	6,000	41.4	1.50	38	.05	.07	CG
526BA-4	1/4	6	.50	13	6,000	41.4	2.00	51	.07	.10	CG
526BA-6	3/8	10	.64	16	6,000	41.4	3.00	76	.09	.13	CG

## Construction

Tube: Nylon

Reinforcement: Aramid Fiber

Cover: Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +180°F (82°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

CG Series – pg. E-53

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Gray

## Notes

- Perforated cover
- Not for use as part of a SCBA systems
- This hose is not for use between a pressure reducing regulator and breathing mask
- For fitting attachment lubricate only with water or non-toxic lubricant. Do not assemble with petroleum or hydrocarbon based lubricants. Do not flush with solvents of any kind
- This hose does not contain a conductive element; therefore, it should not be used with explosive gases such as pure oxygen and hydrogen
- Hose is compliant with CGA Grade E Breathing Air Standards, however air quality is dependent upon all system components

# 527BA – Breathing Air Refill Hose

## Features

- 7000 psi constant pressure

## Certifications (Complies with:)

- CGA G7.1-1 Grade E Breathing Air Standards
- NFPA 1901

## Applications/Markets

- Integrated containment fill stations
- Mobile and stationary systems with or without cascade controls

- Mobile Trailer/Truck Systems
- Portable SCBA Fill

527BA-4	1/4	6	.52	13	7,000	48.3	2.00	51	.07	.11	CG

## Construction

Tube: Nylon

Reinforcement: Aramid Fiber

Cover: Polyurethane

## Operating Parameters

Temperature Range:

- 40°F (-40°C) to +180°F (82°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

CG Series – pg. E-53

Connection configurations limited to:

- Male Pipe (01)
- Female Pipe (02)
- Male JIC (03, 3E)
- Female JIC Swivel (06, 37, 39, 41, L9)

# 53DM/538DM – DuraMax™ Low Temperature

## Features

- Low coefficient of friction cover
- Superior flexibility in cold temperature applications
- Better bend radius than SAE J517 and 100R7
- Smaller O.D. than 100R7 and 100R18
- 3000 psi constant pressure

## Certifications

- Meets/Exceeds SAE 100R18
- 538DM Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

## Applications/Markets

- Excellent over-the-sheave in lift truck applications
- Cold storage or refrigerated areas
- Construction and agriculture equipment in cold climates

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +200°F (93°C)  
 Vacuum Rating: 28 inch Hg  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

CY Series - pg. E-59    SF Series - pg. E-64  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Colors

- Black
- Orange (Non-Conductive)

## Notes

- Perforated cover - 56DH
- Non-perforated cover - 568DH

# 575X/575XN – Fast Response Hose

## Features

- Light weight
- Low change in length under pressure
- Low volumetric expansion
- Fast response even over longer lengths
- 5000 psi constant pressure

## Certifications

- MSHA Accepted for 575X only

## Applications/Markets

- Marine, offshore drilling
- Applications requiring fast and accurate response time

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
575X-3	3/16	5	.43	11	5,000	34.5	1.50	38	.05	.07	CG

## Construction

Tube: Nylon  
 Reinforcement: Fiber  
 Cover: Polyurethane; 575XN -8 Nylon

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +212°F (100°C)  
 Vacuum Rating: 28 inch Hg  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

CG Series - pg. E-53  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Colors

- Black

## Notes

Non-perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

# 580N/H580N/588N – High Pressure Hose

## Features

- Twin and multi-line available
- Lighter weight and smaller O.D. than 100R2

## Certifications

- Meets/Exceeds SAE 100R8
- 580N MSHA Approved
- 588N Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

## Applications/Markets

- Hydraulic and pneumatic circuits and systems

 Access instructions are on pg. G-1

## Colors

- Black
- Orange (Non-Conductive)

## Notes

- Perforated cover - 580N

# 83FR – DuraGard™ General Purpose Polyurethane

## Features

- Weld spatter resistant
- Excellent abrasion resistance
- Excellent flexibility
- Compact bend radius
- Specially Formulated Polyurethane tube
- Twin-line or multi-line constructions available

## Certifications

- MSHA Accepted
- Non-conductive per SAE J343 test procedures for thermoplastic hose
- UL94HB compliant

## Applications/Markets

- General purpose air and water hose often used in robotic welding applications

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series	Push-Lok Fitting*

 Reinforcement: Fiber  
 Cover: Polyurethane

## Operating Parameters

Temperature Range:  
 • -20°F (-29°C) to +200°F (93°C)  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

56 Series – pg. E-10  
 82 Series – Available from Parker Hose Products Division  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Colors

- Black (BLK)
- Blue (BLU)
- Brown (BRN)
- Green (GRN)
- Gray (GRA)
- Red (RED)

## Notes

- \*Temperature and pressure reduced with 82 series Push-Lok Fitting:  
 -20°F (-29°C) to +145°F (+63°C)  
 175 psi maximum working pressure
- Non-perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

# 1035HT – High Temperature Power Cleaning

## Features

- Non-marring
- Broad temperature range

## Applications/Markets

- Pressure Washers (low pressure)
- Carpet Cleaning

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
1035HT-4	1/4	6	.50	13	1,750	12.1	1.50	38	.06	.08	56
1035HT-6	3/8	10	.65	17	1,500	10.3	2.00	51	.09	.13	56

## Construction

Tube: Nylon  
Reinforcement: Fiber  
Cover: Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +230°F (110°C)

Vacuum Rating: 28 inch Hg  
Change in length at Max. Working Pressure: +/-2%  
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

56 Series – pg. E-10  
For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
Access instructions are on pg. G-14

## Colors

- Yellow

## Notes

- Perforated cover
- No chlorinated solvents should be used
- Also available with a blue jacket (1035HT-4-BLU) upon request
- HBR (Hose Bend Restrictor) suggested for carpet cleaning applications - See Hose Guard in Tooling Equipment and Accessories Section pg. F-18

# B9 - General Purpose Transfer Hose

## Features

- Excellent flexibility
- Light Weight
- Specially Formulated Polyurethane core tube for good chemical compatibility

## Applications/Markets

- Low pressure transmission of air, oil, water, and coolants

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series	Field Attachable Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.

B908	1/2	13	.78	20	250	1.7	3.00	76	.13	.19	56	82*

## Construction

Tube: Specially Formulated Polyurethane

Reinforcement: Fiber

Cover: Specially Formulated Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +200°F (93°C)
- Water/and water based fluids up to +130°F (+54°C)

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

56 Series - pg. E-10

82 Series - Available from Parker Hose Products Division

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Red
- Black (BLK)

## Notes

- \*Temperature and pressure reduced with 82 series Push-Lok Fitting:  
-20°F to +100°F (-29°C to +38°C)  
100 psi maximum working pressure
- Non-perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

# 5CNG – Electrically Conductive Compressed Natural Gas Hose

## Features

- Twin constructions available

## Certifications

Conforms to:

- ANSI/CSA NGV 4.2\*CSA 12.52 (Class A, Class D)
- ECE R110 CNG Class 6
- ANSI NGV 3.1\*CSA 12.3 (Class B - P36) 5CNG-8 only
- NFPA 52
- CSA Certificate (#1053249, #70143077)

## Applications/Markets

- CNG Dispenser/Refueling
- Fleet Transit/On-Vehicle
- CNG Fuel Transfer

[Visit the webpage](#)

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.

5CNG-16	1	25	1.59	40	5,000	34.5	10.00	254	.36	.53	CG

## Construction

Tube: Electrically Conductive Nylon  
 Reinforcement: Fiber  
 Cover: Polyurethane

## Color

- Red

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +185°F (85°C)  
 Vacuum Rating: 28 inch Hg  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Notes

- CNG hose must be assembled at the factory or by a Parflex approved facility
- Perforated cover
- Appropriate wire and vinyl guards must be used on ANSI/CSA compliant single-line and twin-line bonded hose assemblies. -4 to -8 SS wire guards - pg. F-19  
 -12 & -16 Vinyl guards - pg. F-18

## Fittings

CG Series – pg. E-53

## Accessories

- PSG - Wire spring guard
- CNGG - Vinyl hose guard

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

For detailed ordering information, please consult price list or contact Parflex Division.

# CNGRP – Regulated Pressure Natural Gas Hose - Electrically Conductive

## Features

- For use downstream of pressure regulator

## Certifications

Conforms to:

- ANSI CSA NGV 3.1
- NFPA 52
- CSA 12.3, Class C
- CSA Listing (Certificate# 70102698)

## Applications/Markets

- Fleet Transit/On-Vehicle

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
CNGRP-12	5/8	16	1.04	26	500	3.45	5.00	127	.42	.63	91N

## Construction

Tube: Nylon

Reinforcement: Stainless Steel

Cover: TPV

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +248°F (120°C)

Change in length at Max. Working Pressure: +2%/-4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

91N Series - pg. E-31

Connection configurations limited to: 10691N-12-12C, 1JC91N-12-12C, 1TU91N-12-12C, 1AL91N-10-12C, 1AL91N-12-12C, 10691N-10-12C, 1TU91N-10-12C

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Red

## Notes

- For use with natural gas only
- CNG hose must be assembled at the factory or by a Parflex approved facility

For sizes 3, 4 and 6 please contact the division for information on 8LPG hose which is certified according to ECE R 67 class 1, ECE R110 and AS/NZS 1869

For detailed ordering information, please consult price list or contact Parflex Division.

# HLB – Lubrication Line Hose

## Features

- HLB remote lubrication system versus 1/4" rubber hoses can save money per line in reduced component and installation labor costs
- Unique GK bulkhead hose fittings with integrated nipple can save money per zerk connection in unnecessary adapter costs
- Compact 1/8" hoses save hundreds of dollars of waste in your operation by eliminating gallons of unnecessary "in-line" grease versus larger bore rubber hoses

## Certifications

- MSHA Accepted

## Applications/Markets

- Grease and lubrication lines
- Agriculture
- Construction
- Industrial
- Material Handling
- Mobile Equipment
- Transportation
- General purpose hydraulic systems

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series	Field Attachable Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.		
HLB02	1/8	3.2	.32	8	3,000	20.7	.50	13	.03	.04	CY	BU
HLB03	3/16	4.8	.41	10	3,000	20.7	.75	19	.06	.08	CY	BU

## Construction

Tube: Copolyester  
Reinforcement: Fiber  
Cover: Polyurethane

## Operating Parameters

Temperature Range:

- 40°F (-40°C) to +212°F (100°C)
- Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids limited to +135°F (+57°C)
- BU Series Field Attachable Fitting limited to 120°F (53°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-3%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

CY Series – pg. E-59      BU Series – pg. E-52

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Black

## Notes

Not for use as a whip hose on hand-operated grease guns

# MSH – Marine Steering Fast Response Hose

## Features

- Fast, accurate response
- Permanent or field attachable
- Salt water, corrosion resistant

## Applications/Markets

- Marine hydraulic steering systems

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series	Field Attachable Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.		
#												
MSH-5	5/16	8	.48	12	1,000	6.9	2.25	57	.05	.07	MS	MS
MSH-6	3/8	10	.59	15	1,000	6.9	3.00	76	.07	.11	MS	MS

## Construction

Tube: Nylon  
 Reinforcement: Fiber  
 Cover: Polyurethane

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +200°F (93°C)  
 Vacuum Rating: 28 inch Hg  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

MS Series – pg. E-62  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Colors

- Black

## Notes

- Non-perforated cover
- Bend restrictions are available only for permanent fittings
- HBR (Hose Bend Restrictor) available for Marine Steering Hose Assemblies. See Hose Guard in Tooling Equipment and Accessories Section pg. F-18

For detailed ordering information, please consult price list or contact Parflex Division.

# MSXL Marine Hydraulic Steering Hose

## Features

- Fast, accurate response in marine steering systems
- Low volumetric expansion
- Salt water resistant cover

## Applications/Markets

- Marine hydraulic steering systems

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
MSXL-5	5/16	8	.50	13	1,500	10.3	2-1/4	57	.05	.07	MS

## Construction

Tube: Nylon  
Reinforcement: Aramid Fiber  
Cover: Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +185°F (85°C)

Vacuum Rating: 28 inch Hg  
Change in length at Max. Working Pressure: +/- 2%  
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

MS Series Permanent Crimp – pg. E-62  
For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
Access instructions are on pg. G-14

## Colors

- Black

## Notes

- MS Series Permanent Crimp Fittings only
- Non-perforated cover
- Optional HBR (Hose Bend Restrictor) available for Marine Steering Hose Assemblies

# PTH – Marine Power Tilt Hose

## Features

- Compact design
- Abrasion resistant polyurethane cover
- Excellent flexibility
- Corrosion resistant

## Applications/Markets

- Power tilt mechanisms for outboard and stern drive engines
- Trim Tab assemblies
- Jack Plate assemblies

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
PTH-3	3/16	5	.43	11	3,000	20.7	0.75	19	.08	.11	92

## Construction

Tube: Nylon

Reinforcement: Fiber and Stainless Steel Wire

Cover: Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +212°F (100°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

92 Series – pg. E-40

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Clear

## Notes

- Non-perforated cover
- Also available as custom order with black cover
- SS wire overbraid for enhanced kink resistance and cut through protection

For detailed ordering information, please consult price list or contact Parflex Division.

# S5N – Predator® Hose (Water Jetting/Lateral Cleaning)

## Features

- Easily identified lime green cover signifies 4000 psi constant pressure
- Slim profile and light weight provide easy handling and routing

## Certifications

- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)

## Applications/Markets

- High-pressure water equipment for cleaning or debris removal in lateral sewer lines

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
S508N	1/2	13	.81	21	4000	28	4.00	102	.16	.24	56

## Construction

Tube: Gray Nylon  
 Reinforcement: Aramid Fiber  
 Cover: Polyurethane

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +135°F (57°C)  
 Vacuum Rating: 28 inch Hg  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

56 Series – pg. E-10  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Colors

- Green

## Notes

- All standard assembly lengths coupled with rigid male pipe each end
- Not for use in hydraulic applications
- Perforated cover

# S6 – Predator<sup>®</sup> Hose (Sewer Cleaning)

## Features

- Easily identified orange cover signifies 2500 psi constant pressure
- Bonded construction provides excellent kink resistance and flexibility

## Certifications

- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)

## Applications/Markets

- High-pressure and high-volume water equipment for cleaning or debris removal in large sewer lines

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
S612	3/4	19	1.14	29	2,500	17.2	4.00	102	.29	.43	SQ/HY
S616	1	25	1.41	36	2,500	17.2	6.00	152	.38	.57	SQ/HY

## Construction

Tube: Gray Copolyester

Reinforcement: Fiber

Cover: Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +135°F (57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 2.5x Max. Working Pressure at 73°F (23°C)

## Fittings

SQ Series (Swage Only)– pg. E-65

HY Series – Available from Parker Hose Products Division

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Orange

## Notes

- All standard assembly lengths coupled with rigid male pipe each end
- Not for use in hydraulic applications
- Perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

# S9 – Predator<sup>®</sup> Hose (Sewer Cleaning)

## Features

- Easily identified blue cover signifies 3000 psi constant pressure
- Bonded construction provides excellent kink resistance and flexibility

## Certifications

- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)

## Applications/Markets

- High-pressure and high-volume water equipment for cleaning or debris removal in large sewer lines

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
S912	3/4	19	1.15	29	3,000	20.7	4.00	102	.30	.45	SQ/HY
S916	1	25	1.47	37	3,000	20.7	8.00	203	.46	.68	SQ/HY

## Construction

Tube: Gray Copolyester  
 Reinforcement: Fiber  
 Cover: Polyurethane

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +135°F (57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 2.5x Max. Working Pressure at 73°F (23°C)

## Fittings

SQ Series (Swage Only)- pg. E-65

HY Series - Available from Parker Hose Products Division

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Blue

## Notes

- All standard assembly lengths coupled with rigid male pipe each end
- Not for use in hydraulic applications
- Perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

Parker Hannifin Corporation | Parflex Division | Ravenna, Ohio | [parker.com/pfd](http://parker.com/pfd)

# SLH – Sewer Leader Hose

## Features

- Easily identified black cover indicates termination of hose

## Certifications

- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)

## Applications/Markets

- Leader hose for S5N/S6/S9 high-pressure sewer cleaning hose

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
#											
SLH-8	1/2	13	0.77	20	4,000	27.6	3.50	89	.25	.37	HY

SLH-16	1	25	1.43	36	3,000	20.7	6.00	152	.80	1.19	HY

## Construction

Tube: Gray Copolyester

Reinforcement: High Tensile Strength Wire

Cover: Smooth Synthetic Rubber

## Operating Parameters

Temperature Range:

- -40°F (-40°C) to +135°F (57°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 2.5x Max. Working Pressure at 73°F (23°C)

## Fittings

HY Series – Available from Parker Hose Products Division

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Color

- Black

## Notes

- Not for use in hydraulic applications
- Non-perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

# DuraFlex™ Hydraulic Hose Coil, Non-Conductive

## Features

- Bonded twin-line construction
- Self retracting coil design

## Certifications

- Meets/Exceeds SAE 100R7
- Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

## Applications/Markets

- Hydraulic tool hose for aerial lift applications
- General Hydraulics

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Weight		Permanent Fitting Series
	inch	mm	inch	mm	psi	MPa	inch	mm	lbs./ft.	kg./mtr.	
548N-6	3/8	10	.65	17	2,250	15.5	2.00	51	.09	.13	CG

### Nomenclature

HC-548N-06MP-06MP-10

**Configuration**

HC	twin-line hose coil
(blank)	twin-line straight hose

**Hose Type (see specifications below)**

548N	Med Pressure - straight or coiled
------	-----------------------------------

**End Connectors**

06MP	3/8" Rigid Male Pipe
06FJ	3/8" Female JIC Swivel

**Effective Working Length**

6	6 foot length
8	8 foot length
10	10 foot length
12	12 foot length

**Notes**

- 1) Part Number example shown is a stocked item.
- 2) Other combinations from this chart are readily available.
- 3) For options not shown, please consult Parflex Division.

## Construction

Tube: Nylon  
 Reinforcement: Fiber  
 Cover: Polyurethane

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +212°F (100°C)

Vacuum Rating: 28 inch Hg

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

CG Series - pg. E-53

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Colors

- Orange (Non-Conductive)

## Notes

Non-perforated cover

For detailed ordering information, please consult price list or contact Parflex Division.

# 919/919B – PTFE Hose

## Features

- Excellent chemical compatibility
- Handles extreme temperatures to +450°F
- Environmentally safe
- Resists moisture
- Low friction minimizes pressure drops and deposits

## Certifications

- Meets/Exceeds SAE 100R14A - 919
- Meets/Exceeds SAE 100R14B - 919B
- FDA 21 CFR 177.1550 (Natural tube)

## Applications/Markets

- Chemical Transfer Lines
- General Hydraulics
- Compressed Air/Gases
- Adhesive Dispensing
- Coolant Lines

Part Number		Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Vac. Rating Hg./73°F	Weight		Permanent Fitting Series	Field Attachable Series

## Construction

Tube: 919 - Natural FDA Compliant PTFE  
 919B - Black Static-Dissipative PTFE  
 Reinforcement: 304 Stainless Steel Braid

## Operating Parameters

Temperature Range:

- -100°F (-73°C) to +450°F (232°C)

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

90 Series – pg. E-26    91/91N Series – pg. E-31

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Notes

- Use hose type 919B with static-dissipative core tube when conveying non-conducting fluids such as oils, paints, fuels, steam, etc.
- Constructed with minimum .030 PTFE tube wall thickness

For detailed ordering information, please consult price list or contact Parflex Division.

# 919J – Silicone Covered PTFE Hose

## Features

- Silicone cover provides a clean, smooth cover to protect the stainless steel wire reinforcement against wear, fraying and contaminants
- Steam cleanable

## Certifications

- Meets/Exceeds SAE 100R14A
- FDA 21 CFR 177.1550

## Applications/Markets

- Chemical Transfer Lines
- General Hydraulics
- Compressed Air/Gases
- Adhesive Dispensing
- Coolant Lines

## Construction

Tube: Natural FDA compliant PTFE  
 Reinforcement: 304 Stainless Steel Braid  
 Cover: Extruded Silicone

## Fittings

91N Series – pg. E-31  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Operating Parameters

Temperature Range:  
 • -40°F (-40°C) to +450°F (232°C)  
 Change in length at Max. Working Pressure: +2% to -4%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Colors

- Red

## Notes

- Cover must be skived prior to fitting attachment
- Constructed with minimum .030 PTFE tube wall thickness

# 919U – High Abrasion Resistance PTFE Hose

## Features

- Non-Marring, abrasion resistant polyurethane cover protects the stainless steel wire reinforcement against wear, fraying and contaminants

## Certifications

- Meets/Exceeds SAE 100R14A but operates at a temperature range of -40°F to +275°F
- FDA 21 CFR 177.1550

## Applications/Markets

- Chemical Transfer Lines
- General Hydraulics
- Compressed Air/Gases
- Adhesive Dispensing
- Coolant Lines

 Access instructions are on pg. G-14

## Colors

- Black

## Notes

- Cover must be skived prior to fitting attachment
- Other colors available upon request
- Constructed with minimum .030 PTFE tube wall thickness

For detailed ordering information, please consult price list or contact Parflex Division.

# 929/929B – Heavy Wall PTFE Hose

## Features

- Excellent kink resistance
- Enhanced resistance to gas permeation due to increased PTFE wall thickness (.040")

## Certifications

- Meets/Exceeds SAE 100R14A - 929
- Meets/Exceeds SAE 100R14B - 929B
- FDA 21 CFR 177.1550 (Natural tube)

## Applications/Markets

- Chemical Transfer Lines
- General Hydraulics
- Compressed Air/Gases
- Adhesive Dispensing
- Coolant Lines

Tube: 929 - Natural FDA Compliant PTFE  
929B - Black Static-Dissipative PTFE

Reinforcement: 304 Stainless Steel Braid

## Operating Parameters

Temperature Range:

- -100°F (-73°C) to +450°F (232°C)

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

91/91N Series - pg. E-31

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Notes

- Use hose type 929B with static-dissipative core tube when conveying non-conducting fluids such as oils, paints, fuels, steam, etc.
- Constructed with minimum .040 PTFE tube wall thickness

# 929BJ – Silicone Covered PTFE Hose (with Static-Dissipative Tube)

## Features

- Silicone cover protects SS wire reinforcement against wear and fraying, up to 450°F
- Silicone cover provides clean, smooth cover and prevents contaminants from accumulating in braid
- Excellent kink resistance
- Enhanced resistance to gas permeation due to increased PTFE wall thickness
- Steam cleanable

## Applications/Markets

- Vacuum lines for high temperature autoclaves
- General Hydraulics
- Compressed Air/Gases

Tube: Black Static-Dissipative PTFE  
 Reinforcement: 304 Stainless Steel Braid  
 Cover: Silicone

## Operating Parameters

Temperature Range:  
 • -65°F (-54°C) to +450°F (232°C)  
 Change in length at Max. Working Pressure: +2% to -4%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

91N Series – pg. E-31  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Colors

● Brown

## Notes

- Cover must be skived prior to fitting attachment
- Constructed with minimum .040 PTFE tube wall thickness

For detailed ordering information, please consult price list or contact Parflex Division.

# 939/939B – Convoluted PTFE Hose

## Features

- Excellent flexibility
- Exceptional kink resistance

## Certifications

- FDA 21 CFR 177.1550 (Natural tube)

## Applications/Markets

- Chemical Transfer
- General Hydraulics
- Hose applications requiring tight routings

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

93N Series – pg. E-41

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

## Notes

- Use hose type 939B with static-dissipative core tube when conveying non-conducting fluids such as oils, paints, fuels, steam, etc.
- \*28 in/Hg can be obtained by using 2799 internal spring guard. See pg. F-20

For detailed ordering information, please consult price list or contact Parflex Division.

Parker Hannifin Corporation | Parflex Division | Ravenna, Ohio | [parker.com/pfd](http://parker.com/pfd)

# 943B – 3,000 psi W.P. High Temp Hose

## Features

- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

## Certifications

- Meets/Exceeds SAE 100R7/SAE 100R17

## Applications/Markets

- High temp hydraulic applications
- Chemical Transfer
- Compressed Air/Gases
- Paint Stripping

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Vac. Rating Hg./73°F	Weight

 • -65°F (-54°C) to +400°F (204°C)  
 Change in length at Max. Working Pressure: +/-2%  
 Min. Burst Pressure is 3x Max. Working Pressure at 73°F (23°C)

## Notes

- Factory-made assemblies only
- Reduce pressure to 3,000 psi (20.7MPa) for pressure impulse applications

# 950B – 4,000 psi W.P. High Temp Hose

## Features

- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

## Applications/Markets

- High temp hydraulic applications
- Chemical Transfer
- Compressed Air/Gases
- Ground Support

Part Number	Nominal I.D.		Maximum O.D.		Maximum Working Pressure		Minimum Bend Radius		Vac. Rating Hg./73°F	Weight	
	inch	mm	inch	mm	psi	MPa	inch	mm		inch	lbs./ft.

## Construction

Tube: Black Static-Dissipative PTFE

Reinforcement: Multiple high density braids of 304 Stainless Steel

## Operating Parameters

Temperature Range:

- -65°F (-54°C) to +400°F (204°C)

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

## Fittings

95 Series - pg. E-44

## Notes

Factory-made assemblies only

# 955B – 5,500 psi W.P. High Temp Hose

## Features

- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

## Applications/Markets

- General Hydraulics
- Chemical Transfer
- Compressed Air/Gases
- Ground Support

## Construction

Tube: Black Static-Dissipative PTFE

Reinforcement: Multiple high density braids of 304 Stainless Steel

## Operating Parameters

Temperature Range:

- -65°F (-54°C) to +400°F (204°C)

Change in length at Max. Working Pressure: +/-2%

Min. Burst Pressure is 16,000 psi at 73°F (23°C)

## Fittings

95 Series – pg. E-44

## Notes

- Factory-made assemblies only
- Reduce operating pressure to 4000 psi (27.6 MPa) for impulse service applications

# STW/STB - "TRUE BORE"

## Smoothbore PTFE Hose, Stainless Steel Braid

### Features

- High temperature hose
- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

### Compliances

- FDA 21 CFR 177.1550 (Natural tube)
- USP Class VI
- ISO 10993 Sections 5, 6, 10, 11

### Applications/Markets

- Fluid Handling
- Chemical Transfer
- Paint
- Pharmaceutical
- Food & Beverage
- Cosmetics

### Construction

Tube: STW - Natural FDA Compliant PTFE

STB - Black Static-Dissipative PTFE

Reinforcement: 304 Stainless Steel Braid

### Operating Parameters

Temperature Range:

- -100°F (-73°C) to +450°F (232°C)

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Pressure ratings based on 73°F (23°C)

Decrease working pressure 1% for every 2°F above 212°F

### Fittings

PAGE Fittings - pg. E-45

Uses crimp collar ST300, see pg. E-46

For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

Access instructions are on pg. G-14

### Notes

- "Z" indicates double braid
- See pg. A-21 for part numbering system
- Cannot be used with 90 or 91N series fittings

For detailed ordering information, please consult price list or contact Parflex Division.

# SBFW - PAGE-flex™ SBFT™

## Extra Flexible Fluoropolymer Hose

### Features

- Half the minimum bend radius of conventional smoothbore products
- Kink and vacuum resistant
- Easily cleaned
- Cooler outside temperatures reduces operator burns
- Reduces environment temperatures in confined areas
- Available with white Silicone cover

### Compliances

- FDA 21 CFR 177.1550
- **USP Class VI Certified**
- ISO 10993 Sections 5, 6, 10, 11

### Applications/Markets

- Fluid Handling
- Chemical Transfer
- Paint
- Pharmaceutical
- Food & Beverage
- Cosmetics

# PCWV-FS/PCBV-FS - Flare-Seal® Polypropylene Braid

## Features

- Flare Seal fitting - Continuous PTFE through fitting; no area for bacterial entrapment
- Increased flow
- Personal handling safety
- Good chemical compatibility
- Easy Cleaning

## Compliances

- FDA 21 CFR 177.1550 (Natural tube)
- USP Class VI
- ISO 10993 Sections 5, 6, 10, 11

## Applications/Markets

- Fluid Handling
- Chemical Transfer
- Pharmaceutical
- Food & Beverage

## Construction

Tube: PCWV - Heavy Wall Natural FDA Compliant PTFE  
PCBV - Heavy Wall Black Static-Dissipative PTFE

Reinforcement: Polypropylene

## Operating Parameters

Temperature Range:

- 0°F (-18°C) to +212°F (100°C)

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Pressure ratings based on 73°F (23°C)

Decrease working pressure 1% for every 2°F above 212°F

## Fittings

PAGE Fittings - pg. E-45

## Notes

- Factory-made assemblies only
- See pg. A-21 for part numbering system
- Cannot be used with 93N series fittings

# NCW/NCB - Seamless Convoluted PTFE with Nomex® Braid

## Features

- Very light weight
- Superior flexibility
- Kink and vacuum resistant
- Eliminates RFI issues
- Factory assembly only

## Compliances

- FDA 21 CFR 177.1550 (Natural tube)
- USP Class VI
- ISO 10993 Sections 5, 6, 10, 11

## Applications/Markets

- Fluid Handling
- Chemical Transfer
- Paint
- Pharmaceutical
- Food & Beverage
- Cosmetics

## Construction

Tube: NCW - Natural PTFE

NCB - Black Static Dissipative PTFE

Reinforcement: Nomex® braid

## Operating Parameters

Temperature Range:

- -100°F (-73°C) to +400°F (204°C)

Change in length at Max. Working Pressure: +2% to -4%

Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Pressure ratings based on 73°F (23°C)

Decrease working pressure 1% for every 2°F above 212°F

## Fittings

PAGE Fittings - pg. E-45

## Notes

- Factory-made assemblies only
- NCB (Static Dissipative) tube I.D. surface only
- NCB Conductive Spec - Must conduct 20 microamps 1000 VDC potential 14" sample
- See pg. A-21 for part numbering system
- Cannot be used with 93N series fittings

Nomex® is a registered trademark of E. I. du Pont de Nemours and Company.

## Construction

Tube: Natural FEP  
 Reinforcement: Double Wire Helix - Multi-layered Rubber  
 Cover: Textile Reinforced EPDM

## Operating Parameters

Temperature Range:

- -40°F(-40°C) to +300°F(+149°C) Decrease working pressure one percent for every 2°F above 212°F

Operating pressures shown are for non-impulse service  
 Change in length at Max. Working Pressure: +2% to -4%  
 Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)  
 Pressure ratings based on 73°F (23°C)  
 Decrease working pressure 1% for every 2°F above 212°F

## Fittings

PAGE Fittings - pg. E-45  
 Uses crimp collar RC300, see pg. E-46  
 For most Parker products, Crimp Die Selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource)  
 Access instructions are on pg. G-14

## Notes

- See pg. A-21 for part numbering system
- Cannot be used with 91N or 93N series fittings

# Metal Hose 9A, 9M, 9H, 9P

See **CATALOG 4690MH** for technical information

## Features:

- Hydroformed annular core tube (9H incorporates helical core)
- High percentage braid coverage for better life cycle and protection against core damage
- 9A - General Purpose - up to 2700 psi working pressures
- 9M - Ultra Flexible - Compressed corrugations for increased flexibility, up to 2700 psi working pressure
- 9H - High Pressure - proprietary design yielding up to 5800 psi working pressure while maintaining flexibility
- 9P - High Pressure - up to 6000 psi working pressure, Parker's highest pressure metal hose construction

## Applications/Markets

- Abrasion and over bending - as a protective cover over wires or other hoses to prevent these problems
- Chemical transfer
- Diesel engine exhaust
- Hot oil and lube lines
- Loading/unloading of light oils, gas, and chemicals
- Petrochemical
- Power Gen
  - Connections for the fuel rail to the combustion cans on gas turbine fuel lines
  - Pump connections
- Pulp & Paper
- Solvent and steam lines

# Multitube® BOP Bundles, Electro-Hydraulic Umbilicals and Hotlines

## Features:

- Dependability and Experience - Over 30 years of Oil & Gas thermoplastic hose design and engineering experience
- Field Tested - Over 750,000 feet of bundles and over 40 million feet of pilot hose produced for rigs
- Capabilities - BOP umbilical lengths up to 7,000+ ft and 90+ pilot hoses within 1 umbilical
- Extended Service Life - Compact pilot hose design allows for more spares to be installed in the bundle without increasing the O.D.

## Applications/Markets

- Oil & Gas

For technical information,  
contact customer services

## BOP Umbilicals with Velocity Hose

Parker offers premier hose solutions for every aspect of hydraulic BOP controls. Parker's BOP umbilicals are used on offshore drilling rigs to control the subsea BOP stack. They have a smaller O.D. which means Parker can produce BOP umbilicals with more pilot lines without increasing the O.D. of the umbilical. The umbilical is built with Velocity Hose to allow for precise control and faster response times when activating subsea valves on the BOP pod.

## Electro-Hydraulic Umbilicals

Parker is an industry leader in designing short length electro-hydraulic umbilicals for offshore applications. We also produce high-pressure subsea hoses, (1/4", 3/8" and 1/2" I.D.) in compliance to API 17e and pressure ratings up to 15,000 psi. These hoses can be combined into an umbilical configuration with electrical power cables included.

## Hotline Hose

Subsea Hotline's are the primary emergency hydraulic control line providing critical service for various subsea functions. Parker Hotline hoses are specially designed to provide fast response time and low volumetric expansion with length capability of 14,000 feet continuous.

A redundant jacket option is available for additional abrasion resistance and protection.

These hoses are custom engineered. For technical information, contact customer service.

# **polyflex** Ultra-High Pressure Hose

See CATALOG 4900 for technical information

## Features:

- Working pressures up to 58,000 psi
- Wide range of hose sizes from 5/64" to 3" I.D.
- Very long continuous lengths available
- Multiple color options for ease of identification
- Wide range of core tube and jacket material options available

## Applications/Markets

- Oil & Gas
- Water Blast/Water Jetting
- Hydraulic Tool

## Oil & Gas Hose

With production plants in both the USA and Europe, supported by Parker's global sales and distribution network, customers can benefit from local service and the supply of quality parts wherever they are situated. **polyflex** oil & Gas hoses are used in a wide variety of Oil & Gas applications, both onshore and offshore, and are available with seawater resistant cover materials.

## Water Blast Hose

**polyflex** Water Blast Hoses are the highest quality ultra high pressure thermoplastic hoses on the market and are also ideal for construction applications such as hydrodemolition, industrial cleaning and surface preparation.

## Hydraulic Tool Hose

**polyflex** hoses can be used to power hydraulic tools, such as torque wrenches and bolt tensioners. They are also used on rescue equipment such as the Jaws of Life and similar tools.

For technical information, download CAT 4900

See CATALOG 4900 for technical information

# Parflex Tubing Introduction

B Tubing

## Parflex New, Tubing Product

Parflex has expanded the tubing line to include:

### Antimicrobial Tubing

Antimicrobial Tubing for food and beverage applications. This tubing is specially formulated with Sanitized® to resist degradation from mildew, fungi and biofilm that can accumulate on the inside or outside of tubing in filling and processing applications. pg. B-16

### Retail Packaging

EZ Pack 100 foot boxes are now available for Nylon and Polyurethane tubing in some sizes. Designed for easy storage and easy dispensing, these boxes are excellent for retail sales and fulfilling small quantity requirements.

## Parflex Tubing Tutorial

- Review the general attributes of Parflex thermoplastic and fluoropolymer tubing – this provides an excellent overview for the tubing product line.
- Review the application symbols - this will help you clear up any questions you may have on the product tables within the section. The market/applications table identifies and provides a “good fit” summary.
- Review the pressure bar graph - provides relative pressure ratings for the entire line of thermoplastic tubing. For fluoropolymer tubing, please contact Customer Service.
- Review the STAMPED guide (Size, Temperature, Media, Application, Pressure, End Configuration, and Delivery Preferences) on pg. 13 to help narrow your search for the desired product.
- Specific nomenclature, features, advantages and benefits can be found at the beginning page of each product line.
- Text appears in 2 colors. The primary dimensions are in black. As a courtesy, the metric/inch equivalent has been added and appears in blue.

# Tubing Introduction

## Tube Line Fabrication Guide for Leak Free Systems

Every hydraulic, pneumatic and lubrication system requires some form of tube line fabrication and fitting installation for completion. Proper fabrication and installation are essential for the overall efficiency, leak free performance and general appearance of any system.

Start by planning ahead. After sizing the tube lines and selecting the appropriate style of fitting, consider the following in the design of your system:

- Accessibility of joints
- Proper routing of lines
- Adequate tube line supports
- Available fabricating tools

### Routing of Lines

Routing of lines is probably the most difficult, yet most significant, of these system design considerations. Proper routing involves getting a connecting line from one point to another through the most logical path.

Always try to leave fitting joints as accessible as possible. Hard to reach joints are hard to assemble and tighten properly. Inaccessible joints are also more difficult and time consuming to service.

# Multitube® Tubing Introduction

See CAT 4200 for technical information

The Multitube® instrumentation product line has produced thermal insulated and heat traced tubing for over 40 years. Tubing and tubing bundles transfer gas, fluids, steam and viscous materials through instrument lines, condensate return lines, cooling water lines, lubrication lines and refrigeration lines. Some of these products are available with heated elements to ensure maximum freeze protection during the winter. The products displayed on these pages are just a sampling of the types of products available in the Multitube line of products. See Catalog 4200 for a detailed review.

## Applications/Markets

- Chemical Processing
- Refineries
- Oil & Gas
- Power Generation

## MJ - Jacketed Metal Tubing

Bundled tubing is an ideal alternative for applications where multiple lengths of tubing are currently being installed independently. Manufactured with or without protective, galvanized steel armor and a protective outer jacket. Metal tubes are uniquely identified using a number code printed along the entire length of each tube.

MJ - Metal, Jacketed    MA - Metal Armored    MAJ - Metal, Armor, Jacketed

## PJ - Jacketed Plastic Tubing

Bundled tubing is an ideal alternative for applications where multiple lengths of tubing are currently being installed independently. Manufactured with or without protective, galvanized steel armor and a protective outer jacket. Plastic tubes are uniquely identified using a number code printed along the entire length of each tube.

PJ - Plastic, Jacketed    PA - Plastic Armored    PAJ - Plastic, Armor, Jacketed

## TT - Temptube® Preinsulated Tubing

Preinsulated tubing - Transfer of fluids or gases up to 400°F while maintaining an outer jacket surface temperature of 140°F. Insulated bundles rated up to 1200°F. Also available as a custom bundle.

Typically used in steam supply lines, condensate return lines, cooling water lines, lubrication lines, refrigeration lines and liquid nitrogen lines.

## LT - Light Steam Trace

Temprace® LT - Permits use of higher pressure steam to heat trace instrument lines. Single or multiple tubes designed to utilize saturated steam pressures to 230 PSIG (15.8 BAR) and 400°F without generating a process tube temperature in excess of 200°F or a jacket surface temperature greater than 140°F.

## SL - Self Regulating Low Temperature Maintenance Bundles

Temprace® SL - Maintain temperatures up to 150°F and withstands maximum internal exposure to 185°F. Designed to provide freeze protection and low temp. maintenance for gases, liquids or viscous materials. With outdoor temperatures of -40°F, SL-Temprace® will maintain a process fluid or gas at 40°F to 400°F while maintaining an outer jacket surface temp. of 140°F. Heated cables are available in 120V and 208-277 volt, with heat outputs of 3, 5, 8 and 10 watt/ft.

## SH - Self Regulating High Temperature Maintenance Bundles

Temprace® SH - Maintain temperatures up to 250°F and withstands an internal exposure temp. of 400°F. Designed to provide temp. maintenance for gases, liquids or other process materials. Has a max. temp. rating of 250°F (121.1°C), when power to the heating cable is on, and can be steam cleaned at 400°F (204°C), when power to the heating cable is off.

For technical information, download CAT 4200

# Tube Line Fabrication Guide for Leak Free Systems

Every hydraulic, pneumatic and lubrication system requires some form of tube line fabrication and fitting installation for completion. Proper fabrication and installation are essential for the overall efficiency, leak free performance, and general appearance of any system.

Start by planning ahead. After sizing the tube lines and selecting the appropriate style of fitting, consider the following in the design of your system:

1. Accessibility of joints
2. Proper routing of lines
3. Adequate tube line supports
4. Available fabricating tools

<b>PS</b>	Plastic Sleeve & Tube Support Recommended
<b>TS</b>	Tube Support Is Recommended
<b>BS</b>	Brass Sleeve Recommended
<b>CL</b>	Clamp Required
<b>MG</b>	Metal Gripper Collet Recommended
	Tube/Fitting Combination Compatible
	Tube/Fitting Combination NOT Compatible

# Thermoplastic Tubing

B Tubing  
Thermoplastic

## Polyethylene

- Parflex polyethylene tubing meets FDA, NSF Standard 51 for all food contact applications and NSF-61 for potable water applications.
- E-Series NSF tubing is made of 100% virgin resin material.
- Polyethylene tubing meets ASTM D-1693 (10% IGEPAL) for stress crack resistance.
- Parflex also offers special PE tubing: PEFR (flame retardant) and HDPE (high density).

## Nylon

- Flexible nylon tubing is constructed of high-grade resins for strength and flexibility for routing in tight spaces.
- Semi-rigid high strength nylon is constructed of high-grade resins without the addition of plasticizers for higher pressure tubing applications.
- Pure Air Tubing (PAT) is the tubing choice for pure air systems (semiconductor) due to its cleanliness; in addition, it offers excellent chemical and UV light resistance.
- NTNA Tubing meets NSF Standard 51 for all food contact applications and may be used for instrumentation lines, lubrication and process piping systems and oil and refrigerant lines.

C Coiled Air Hose  
& Fittings

## Parprene™ (thermoplastic elastomer)

- Excellent flexural fatigue resistance.
- Resistant to environmental stress cracking.
- Series F meets FDA, NSF Standard 51 and 3-A approved for all food contact applications.

D Transportation

## Polypropylene

- Polypropylene tubing meets FDA, NSF Standard 51 for all food contact applications.
- Polypropylene tubing exhibits excellent chemical resistance to chlorinated water applications.
- Black Polypropylene tubing is commonly used in outdoor applications where UV light stabilization is required.

E Fittings

## Polyurethane

- Polyurethane tubing is a flexible, kink-resistant and abrasion-resistant material commonly used in pneumatic applications.
- Polyurethane is available in multiple transparent and opaque colors for system color coding.
- Polyurethane is available in the following durometers (measurement of material hardness):
  - Medium durometer: (90 - 95)
  - High durometer: (>95) for higher pressures

F Tooling, Equipment  
& Accessories

## Polyvinyl Chloride (PVC)

- PVC tubing is made from 100% virgin resin material and meets all FDA specifications for materials in contact with food and drugs.
- PVC tubing is a very flexible, 70 durometer tubing. It is crystal-clear and ideal for situations where visible fluid flow is necessary (i.e. sight gauges for tank identification).

**All plastic tubing dimensions are laser monitored to ensure overall quality product.  
Most tubing sizes are packaged in convenient 100-ft., 250-ft., 500-ft. and 1,000-ft. lengths.**

# Thermoplastic Tubing

## Typical Applications

Product Family	Series	Suggested Markets and Applications
Polyethylene	E and EB	Potable water, chemical transfer, and low-cost, low-pressure pneumatics, NSF-51 & NSF- 61
	PEFR	Pneumatic controls in HVAC
	HDPE	Chemical transfer and low-cost pneumatics
	EA	Formulated with Sanitized® for food and beverage
Nylon	N	Pneumatic and petroleum-based chemical transfer
	PAT	Pure air and gas distribution systems, semiconductor
	NR	High pressure pneumatic, low pressure lubrication and hydraulic, marine control systems
	NTNA	Instrumentation lines, lubrication and process piping systems, oil and refrigerant lines, NSF-51
Polypropylene	PP and PPB	Food contact and chemical transfer applications, chlorinated water, NSF-51
Urethane	U and UM	Pneumatic controls requiring high flexibility, kink resistance and movement
	HU and HUM	High-pressure pneumatics requiring flexibility and kink resistance, robotics
Parprene™	TPE, Series G	Thermoplastic elastomer, black, general industrial tubing
	TPE, Series F	Thermoplastic elastomer, tan, food & dairy FDA compliant tubing
Vinyl	PV	Low-pressure chemical and medical applications requiring high clarity and flexibility, FDA

## Tubing Pressure Ranges

Working pressures are at 73°F (23°C). Pressure ratings are also effected by diameter of tubing and wall thickness. Actual performance may vary with different media and working conditions. Use this information for comparison only.

For detailed ordering information, please consult price list or contact Parflex Division.

# Polyethylene Tubing

Series E: Instrument Grade – FDA, NSF Listed

Series EB: Ultraviolet Light Resistant

## Features

- Made from 100% virgin resin material
- Chemically resistant and flexible
- High molecular weight resin provides increased dimensional stability, uniformity and long-term strength
- Economical system solution

## Certifications

- FDA compliant for food contact
- ASTM D-1693 (10% IGEPAL) for stress crack resistance
- NSF - 51
- NSF - 61

## Applications/Markets

- Potable water
- Chemical transfer
- Low-pressure pneumatics

## Fittings

Parker fittings available from:  
 Fluid System Connectors Division  
 Otsego, MI  
 (269) 692-6555  
 (269) 694-4614 FAX

FSC Product Families:

- Compression
- Compress-Align®
- Poly-Tite
- Hi-Duty
- Fast & Tite
- Flow Controls
- Prestolok Brass
- Prestolok Composite
- Prestolok Stainless
- Prestolok All-Metal
- Liquifit
- TrueSeal™
- Dubl-Barb®

For tube support use, reference Tubing/Fitting Compatibility Chart (pg. B-8/B-9) or contact Fluid System Connectors Division (269) 692-6555

## Notes

- E series natural and colored tubing meet FDA, NSF-51 requirements for food contact applications and NSF-61 for potable water
- FDA, NSF-51 and NSF-61 compliant black polyethylene tubing is also available. Add -NSF suffix to the EB part number (ie. EB-64-0500-NSF)
- Resistant to environmental stress cracking exceeding that of ordinary polyethylene tubing as measured by ASTM D-1693 (10% IGEPAL)
- Black (EB) tubing is suggested for use in sunlit areas and in close proximity to high ultraviolet light sources
- All tubing conforms to ASTM D-1248, Type I, Class A, Category 4, Grade E5
- The operating temperature range for service at rated pressures with compatible fluids is -80°F (-62°C) to +150°F (66°C)

## Colors

- See Color Code Table

# Antimicrobial Polyethylene Tubing

## Series EA: Formulated with Sanitized®

### Features

- Polyethylene treated with Sanitized® resist degradation from mildew, fungi and biofilm
- BPA and phthalate free
- Resistant to environmental stress cracking exceeding that of ordinary polyethylene tubing as measured per ASTM D-1693 (10% IGEPAL)
- Blue tube color allows quick identification
- Use with Parker antimicrobial filters to create a complete system
- Extensive range of compatible Parker fittings

### Applications/Markets

- Food & Beverage
- Water systems
- Low pressure pneumatics

### Certifications/Comiances

- U.S. FDA 21 CFR 177.1520
- NSF-51
- ASTM D-1248, Type I, Class A, Category 4, Grade E5

## Notes

Using the same base linear low-density polyethylene (LLDPE) as the E-Series tubing, Parker Hannifin, Parflex Division's PEFR tubing has the following advantages:

- Resistant to environmental stress cracking exceeding that of ordinary polyethylene tubing as measured by ASTM D-1693 (10% IGEPAL)
- The operating temperature range for service at rated pressures with compatible fluids is -85°F (-65°C) to +150°F (66°C)

## Colors

- Black

For detailed ordering information, please consult price list or contact Parflex Division.

# Polyethylene Tubing

## Series HDPE: High Density

### Features

- Manufactured from high strength, high density polyethylene
- Semi-rigid tubing that is inherently resistant to most chemicals, less easily cut or damaged and has a higher burst pressure rating than Series E tubing
- Economical system solution

### Applications/Markets

- Chemical transfer
- Low-pressure pneumatics

# Nylon Tubing

## Series N: Flexible

### Features

- Flexible nylon tubing uses high-grade resins for strength and flexibility for routing in tight spaces
- Made from abrasion-resistant, heat and light-stabilized nylon
- Exhibits low-level water absorption
- Chemically resistant

Contact Customer Service for Retail Packaging Options

EZ Pack 100 foot boxes available for some sizes.

### Applications/Markets

- Robotics
- Machine tool
- General pneumatics
- Lubrication

- Petroleum-based chemical transfer
- Pest control lines

## Nylon Tubing (Series N)

### Maximum Working Pressure (psig)

## Fittings

Parker fittings available from:  
 Fluid System Connectors Division  
 Otsego, MI  
 (269) 692-6555  
 (269) 694-4614 FAX

FSC Product Families:

- Compression
- Compress-Align®
- Poly-Tite
- Hi-Duty
- Fast & Tite
- Flow Controls
- Prestolok Brass
- Prestolok Composite
- Prestolok All-Metal
- Prestolok Stainless
- TrueSeal™
- NTA®
- Transmission

For tube support use, reference Tubing/Fitting Compatibility Chart (pg. B-8/B-9) or contact Fluid System Connectors Division (269) 692-6555

## Notes

- The operating temperature range for service at rated pressures with compatible fluids, depending upon conditions, is -65°F (-54°C) to +200°F (93°C)
- Black tubing suggested for use in sunlit areas and in close proximity to high ultraviolet light sources

## Colors

- See Color Code Table

For detailed ordering information, please consult price list or contact Parflex Division.

# Nylon Pure Air Tubing

## Series PAT: Ultra Pure, UV Resistant

### Features

- The tubing choice for pure air systems (semiconductor) due to its cleanliness and excellent chemical and UV light resistance
- Maintains good resistance to high ambient temperatures with low moisture absorption
- Manufactured from a specially formulated nylon for use in pure air and gas distribution systems
- Provides high tensile strength with excellent coupling retention in high pressure, temperature and vibration environments
- Sizes -2 and -4 are single wall tubing construction
- Sizes -6 through -12 are reinforced tubing construction

### Applications/Markets

- Pure air and gas distribution systems
- Semi-conductor

## Notes

- Packaged on corrugated plastic reel with ends capped and shipped in a plastic-lined container
- The operating temperature range for service at rated pressures with compatible fluids is -70°F (-57°C) to +200°F (93°C)
- PAT tubing is rated for full vacuum service at 28 inch Hg

## Colors

- See Color Code Table

# Nylon Tubing

## Series NR: Semi-rigid High Strength

### Features

- High grade nylon resins without the addition of plasticizers for higher pressure tubing applications
- Chemical resistant, good resistance to high ambient temperature and low moisture absorption
- High tensile strength and excellent coupling retention in high pressure, temperature and vibration environments
- Better dimensional stability at elevated temperatures than N Series

### Applications/Markets

- High-pressure pneumatics and oils
- Lubrication systems
- Marine control systems
- Process lines for chemicals

### Maximum Working Pressure (psig)

# TPE Parprene™ Tubing

## Series G: General Industrial

### Features

- Excellent flexural fatigue resistance
- Ozone and UV light resistant
- Temperatures from (-75°F to 275°F)
- Abrasion resistant
- Resistant to environmental stress cracking
- Lot-to-lot traceability
- Chemically compatible with common sanitizers and cleaners
- Extensive range of compatible Parker fittings and couplers

### Applications/Markets

- Wastewater Sampling
- Cable Insulation
- Caustic Dispensing
- Ink and toner feed lines
- Chemical Transfer

## Order Information

### Example: G64-31

G64-31 – TPE, General Series

G64-31 – Hardness Durometer (64 Shore A)

G64-31 – Tube O.D. in sixteenths of an inch (3/16")

G64-31 – Tube I.D. in sixteenths of an inch (1/16")

## Fittings

Parker fittings available from:  
Fluid System Connectors Division  
Otsego, MI  
(269) 692-6555  
(269) 694-4614 FAX

FSC Product Families:

- Par-Barb® Thermoplastic
- Dubl-Barb®
- Hose Barb

For tube support use, reference Tubing/  
Fitting Compatibility Chart (pg. B-8/B-9) or  
contact Fluid System Connectors Division  
(269) 692-6555

## Couplings

Parker couplings available from:  
Quick Coupling Division  
Minneapolis, MN  
(763) 544-7781  
(763) 544-3418 FAX

QCD Product Families:

- Spectrum Series
- PPM Series
- PPL Series

## Notes

- TPE is a thermoplastic elastomer formulated to withstand the rigors of peristaltic pump applications and yet, be safe enough for food and beverage applications.
- The operating temperature range for service at rated pressures with compatible fluids is -75°F (-59°C) to +275°F (135°C)
- Packaged 50 foot coils - sealed clear polyethylene bag, barcoded, 1 per box for lot traceability
- Special lengths available, contact Parflex division

## Colors

- Black

# TPE Parprene™ Tubing

## Series F: Food & Dairy

### Features

- Excellent flexural fatigue resistance
- Ozone and UV light resistant
- Temperatures from (-75°F to 275°F)
- Abrasion resistant
- Resistant to environmental stress cracking
- Lot-to-lot traceability
- Chemically compatible with common sanitizers and cleaners
- Extensive range of compatible Parker fittings and couplers
- Latex free material

### Applications/Markets

- Hot/Cold beverage dispensing
- Food and dairy processing lines
- Chemical transfer
- Water purification lines
- Soap dispensing

### Certifications

- FDA compliant for food contact
- NSF-51 Approved
- 3-A Approved

- Tan

# Polypropylene Tubing

Series PP: Laboratory Grade – FDA, NSF Listed  
Series PPB: Ultraviolet Light Resistant

## Features

- Acid and chemically resistant
- May be used in higher temperatures and working pressures than polyethylene tubing
- Excellent compatibility with high temperature water
- Low water absorption (less than .01%)
- Good compatibility with vegetable oils
- Excellent resistance to environmental stress cracking

## Certifications

- FDA Both in white; NSF also in special black part numbers
- NSF-51

## Applications/Markets

- Food contact - White only
- Chemical transfer
- Chlorinated water

# Polyurethane Tubing

## Series U: Polyether Base

### Features

- 90 to 95 Shore A durometer
- Excellent kink and abrasion resistance
- Excellent hydrolytic stability
- Flexible and easy to assemble onto designated fittings
- Polyurethane tubing exhibits the elongation and recovery characteristics of rubber and the chemical resistance associated with plastics

### Applications/Markets

- Pneumatic controls
- Robotics
- Machine tools
- General pneumatics
- Vacuum equipment
- Analytical instrumentation
- Semiconductor equipment
- Medical and laboratory applications

## Order Information

**Example: HUM-6-BLK-0100**

**HUM-6-BLK-0100** – High Durometer Metric Polyurethane

HUM-**6**-BLK-0100 – **Tube O.D.** in millimeters (**6mm**)

HUM-6-**BLK**-0100 – **Color (Black)**

HUM-6-BLK-**0100** – **Package Quantity** in feet (**100'**)

## Metric Polyurethane Tubing (Series HUM)

### Maximum Working Pressure (bar)

## Fittings

Parker fittings available from:  
Fluid System Connectors Division  
Otsego, MI  
(269) 692-6555  
(269) 694-4614 FAX

FSC Product Families:

- Metric Compression
- Flow Controls
- Prestolok Composite
- Prestolok All-Metal
- Prestolok Stainless

For tube support use, reference Tubing/  
Fitting Compatibility Chart (pg. B-8/B-9) or  
contact Fluid System Connectors Division  
(269) 692-6555

## Notes

- The operating temperature range for service at rated pressures with compatible fluids is -40°F (-40°C) to +180°F (82°C)

## Colors

- Natural
- Black

# Vinyl Tubing

## Series PV: Clear Vinyl Tubing

### Features

- Made from a virgin clear PVC (polyvinyl chloride) resin; specifically formulated for exceptional purity, clarity and flexibility
- 70 durometer for soft, easy handling and bending without tubing collapse

### Certifications

- FDA compliant

### Applications/Markets

- Low-pressure chemicals
- Pneumatics
- Low-pressure sight flow indicator

### Order Information

#### Example: PV108-1

#### PV108-1 – Poly-Vinyl Tubing

PV108-1 – Tube O.D. in sixteenths of an inch (5/8")

PV108-1 – Tube I.D. in sixteenths of an inch (1/2")

PV108-1 – Formula V-1 FDA Approved Formulation

### Fittings

Parker fittings available from:  
Fluid System Connectors Division  
Otsego, MI  
(269) 692-6555  
(269) 694-4614 FAX

FSC Product Families:

- Poly-Tite
- Fast & Tite
- TrueSeal™
- Par-Barb®
- Hose Barb
- Garden Hose

For tube support use, reference Tubing/Fitting Compatibility Chart (pg. B-8/B-9) or contact Fluid System Connectors Division (269) 692-6555

### Notes

- Formula V-1 tubing fully meets all specifications called out by the United States Food and Drug Administration (FDA) for materials in contact with food and drugs for human consumption
- The operating temperature range for service at rated pressures with compatible fluids is -40°F (-40°C) to +150°F (65°C)

# Fluoropolymer Tubing

## Fluoropolymer Tubing

Fluoropolymer tubing features a low coefficient of friction and anti-stick properties, high temperature capabilities and the most corrosion and chemical resistance of all polymers. Within normal use temperatures, fluoropolymers are attacked by so few chemicals that it is easier to describe the exceptions rather than list the chemicals they are compatible with (see Chemical Resistance Summary, pg. B-54). These chemically inert tubes are non-wetting and non-leaching, making them ideal for a wide range of fluid and material handling applications.

Parker fluoropolymer tubing is available in PTFE, FEP, PFA and PVDF with some materials operating at temperatures up to 500°F (260°C). Each material has specific dominant characteristics, but all operate in high-temperature, corrosive environments.

- Parflex PTFE, FEP, PFA and PVDF tubing complies with European Standard RoHs and are also FDA compliant to FDA regulation 21 CFR 177.1550, making these products suitable for use in food and beverage applications.
- Parflex PTFE, FEP and PFA are listed VW-1 in the burning test for Underwriters Laboratories and pass the UL-83 vertical flame test. In a flame situation, PTFE, FEP and PFA tubing resist combustion and do not promote flame spread.

**All fluoropolymer tubing dimensions are continuously monitored to ensure an overall quality product. Most tubing sizes are packaged in convenient 25-ft., 50-ft., 100-ft. and 1,000-ft. lengths.**

### PTFE

- PTFE (Polytetrafluoroethylene) is offered in beading, smoothbore tubing, heat shrinkable, spiral wrap and convoluted tubing.
- PTFE tubing features unmatched chemical resistance and a non-stick surface that facilitates flow and eliminates media buildup.

### FEP

- FEP (Fluorinated Ethylene Propylene) is available in smoothbore tubing, heat shrinkable, convoluted, corrugated and retractable coil tubing.
- FEP tubing offers the highest clarity in the fluoropolymer market and is a close second to PTFE in chemical resistance.
- FEP is available in long, continuous lengths (1,000 feet and longer) whereas the longest lengths for PTFE range from 200 to 1,000 feet depending on size and wall thickness.

### PFA

- PFA (Perfluoroalkoxy) is available in smoothbore tubing.
- When temperature and clarity are both factors, PFA is the resin of choice because it offers the high-temperature attributes of PTFE, long continuous lengths, and almost as much clarity as FEP.
- High purity resins available.
- Low permeability.

*For detailed ordering information, please consult price list or contact Parflex Division.*

## High Purity PFA

- H.P. PFA (Perfluoroalkoxy) has the highest molecular weight available.
- Withstands corrosive surfactants for longer periods of time than standard products.
- Lowest level of extractables.

## PVDF

- PVDF (Polyvinylidene Fluoride) is available in flexible and super flexible smoothbore tubing.
- PVDF offers a combination of properties beneficial for use in many critical applications requiring chemical resistance with low permeability.
- PVDF exhibits low extractable levels while providing high mechanical strength and abrasion resistance.

## Fluoropolymer - Quick Reference

### PTFE (Polytetrafluoroethylene)

Working Temperature: 500°F (260°C)

Color: Opaque to translucent

- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting
- Excellent flexlife
- Laser markable

### PFA (Perfluoroalkoxy)

Working Temperature: 500°F (260°C)

Color: Clear with light blue or tint

- High purity resins available
- Low permeation resins available
- Use when you need the temperature range of PTFE and the clarity of FEP
- Exceptional heat resistance
- Self extinguishing
- Non-wetting
- Good flexlife

### FEP (Fluorinated Ethylene Propylene)

Working Temperature: 400°F (204°C)

Color: Clear

- Excellent chemical resistance
- Non-wetting
- Weldable
- Tubes can be sealed by melting
- Long continuous lengths
- Low refractive index
- Improved clarity over PFA
- Lower cost alternative to PFA

### PVDF (Polyvinylidene Fluoride)

Working Temperature: 265°F (130°C)

Color: Varies

- Very good chemical resistance
- Excellent resistance to creep and fatigue
- UV Resistant
- Weldable
- Exceptional corrosion resistance for chlorine, fluorine, or bromine environments

## Chemical Resistance Summary

Within normal use, temperatures, fluoropolymers are attacked by so few chemicals that it is easier to describe the exceptions rather than list the chemicals they are compatible with.

### DO NOT USE FLUOROPLASTICS WITH THE FOLLOWING:

- Alkali metals such as elemental sodium, potassium, lithium, etc. The alkali metals remove fluorine from the polymer molecule.
- Extremely potent oxidizers, fluorine (F<sub>2</sub>) and related compounds (e.g., chlorine trifluoride, ClF<sub>3</sub>). These can be handled by fluoropolymers, but only with great care, as fluorine is absorbed into the resins, and the mixture becomes sensitive to a source of ignition such as impact.
- 80% NaOH (Sodium Hydroxide) or KOH (Potassium Hydroxide), metal hydrides such as Boranes (e.g., B<sub>2</sub>H<sub>6</sub>), Aluminum Chloride, Ammonia (NH<sub>3</sub>), certain Amines (R-NH<sub>2</sub>) and imines (R=NH) and 70% Nitric Acid at temperatures near the suggested service limit.

### WARNING

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

# Fluoropolymer Tubing

The table below lists a generally accepted summary of properties that we believe to be reliable. Please note that many of these resins are produced in several varieties and property characteristics may vary. Therefore, determination of resin is dependent on the application and this table is only meant to serve as a general guideline.

\*General resin properties; Tubing properties may vary.

## Tubing Pressure Ranges

Tubing pressures vary by material, tubing size and wall thickness. Please contact Customer Service for specific pressures.

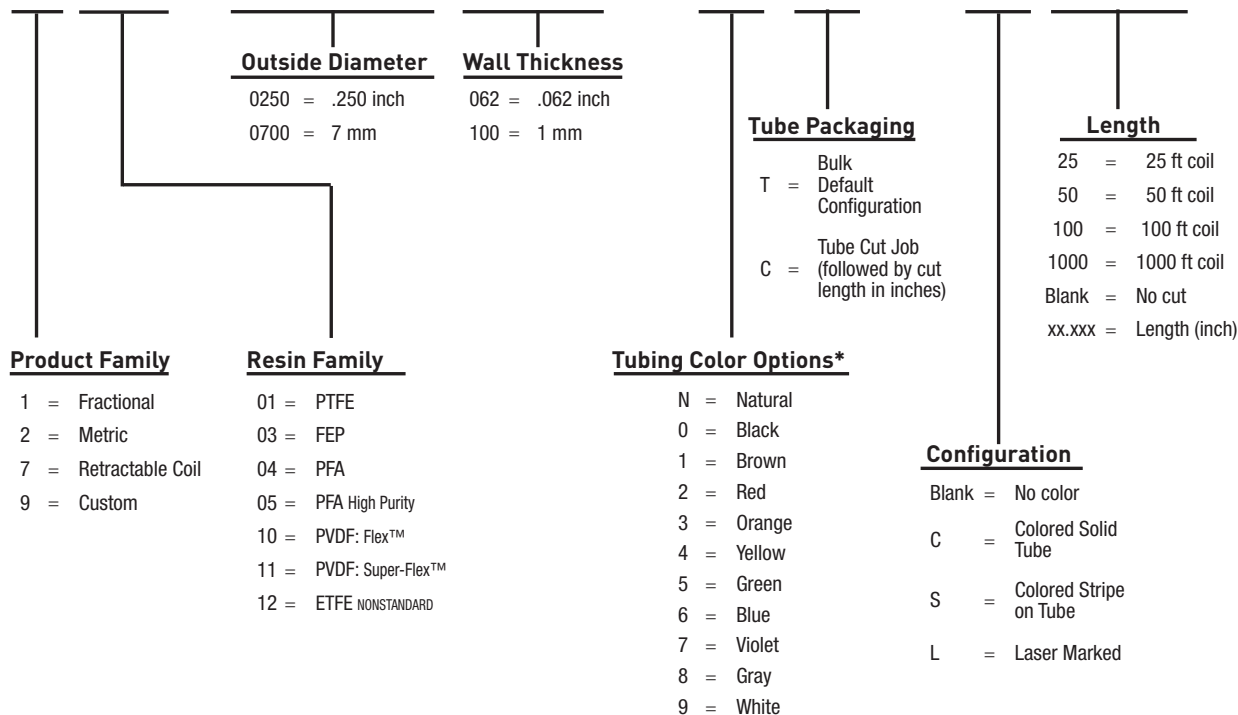

For detailed ordering information, please consult price list or contact Parflex Division.

# Fluoropolymer Tubing

## Fluoropolymer Tubing Nomenclature

Heat Shrink, Electrical Insulation Tubing and Beading

# HS2\*\* T F T 1/8 - N T\*\*\*

Special Configurations	Resin Family	Tubing Sizes**	Tube Packaging	Other Options
Blank if Smooth Bore	TF = PTFE FP = FEP PF = PFA ET = ETFE	XX for AWG size 0-30 X/X for Fractional sizes 1/8 to 1.00 inch	T = Bulk Default Configuration C = Tube Cut Job (followed by cut length in inches -if cut, go to Other Options)	Blank = Not required xx.xxx = Add cut length in inches
Special Configurations	Tubing Configurations	Tubing Color Options*	Configuration	
Blank if Smooth Bore	H = Heavy Wall	N = Natural	Blank = No color	
HS2 = 2:1 Ratio PTFE	S = Standard Wall	0 = Black	C = Colored Solid Tube	
HS4 = 4:1 Ratio PTFE	T = Thin Wall	1 = Brown	S = Colored Stripe on Tube	
HS1.3 = 1.3/1:1 Ratio FEP	L = Light Wall	2 = Red		
HS1.6 = 1.67:1 Ratio FEP	I = Industrial Wall	3 = Orange		
HS1.25 = 1.25:1 Ratio FEP	B = Beading	4 = Yellow		
		5 = Green		
		6 = Blue		
		7 = Violet		
		8 = Gray		
		9 = White		

\*When ordering coiled tubing in colors, the color code is always followed by TC; when ordering cut lengths, the color code is followed by CC...i.e.,HS2TFT1/8-2TC ..i.e.,HS1.3FEP24-0CC48.000

\*\*This first configuration is only used for heat shrinkable tubing or spiral wrap. For example, electrical insulation tubing part number would read TFT-1/8-NT.

\*\*\*When changing to cut length, replace the T with C and specify the length in inches. If this part was cut to 4 feet, part number would read TFT-1/8-NC48.000.

\*\*\*\*Sizes for heat shrink designate the size of the heat shrink tube as stated by the applicable specification. The actual O.D. of the tubing does not always match the size. Review actual tables to see the true expanded dimension of the tube.

For detailed ordering information, please consult price list or contact Parflex Division.

# PTFE Tubing

## Series Fractional & Metric: 101, 201

### Features

- Virgin Polytetrafluoroethylene resin
- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting
- Excellent flexlife
- Laser markable

### Applications/Markets

- Cable Liner
- Electrical Insulation
- Oxygen Sensor
- Paint Transfer
- Gas Sampling
- Laboratory

### Certifications/Compliance

- AMS 3653E
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Order Information

**Example: 101-0188062-0TC-100**

101-0188062-0TC-100 – **PTFE**

101-**0188**062-0TC-100 – **Tube O.D.** in inches (**3/16"**)

101-0188**062**-0TC-100 – **Tube Wall Thickness** in inches (**.062"**)

101-0188062-**0TC**-100 – **Black**

101-0188062-**0TC**-100 – **Bulk Tubing**

101-0188062-**0TC**-100 – **Solid Color Tube**

101-0188062-0TC-**100** – **Package Quantity** in feet (**100'**)

### Notes

- Working Temperature: 500°F (260°C)
- Working pressure calculated using a Design Factor of 4
- Custom packaging and sizes are quoted upon request
- Package quantities are not continuous

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

### Fittings

Fittings available for sizes 3/32" up to 1.1"

Parker Fittings available from:  
Fluid System Connectors Division  
Otsego, MI

# PTFE Tubing

## Series Fractional: TFL, TFS, TFT

### Features

- Virgin Polytetrafluoroethylene resin
- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting
- Excellent flexlife
- Laser markable

### Applications/Markets

- Electrical Insulation
- Protective Cover
- Cable Liner
- Spacer

### Certifications/Compliance

- AMS 3653E
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant
- **Light Wall** (TFL) – ASTM D3295 Class 1
- **Thin Wall** (TFT) – ASTM D3295 Class 2, AMS 3655B
- **Standard Wall** (TFS) – ASTM D3295 Class 3, MIL-I-22129C

### Order Information

**Example: TFS1/2-NT**

TFS1/2-NT – PTFE

TFS1/2-NT – Standard Wall

TFS1/2-NT – Tube O.D. in inches (1/2")

TFS1/2-NT – Natural

TFS1/2-NT – Bulk Tubing

### Notes

- Working Temperature: 500°F (260°C)
- Package quantities are not continuous - Fractional tubing is supplied in random length coils, with a minimum coil length of 15 feet.
- Custom packaging, sizes and lengths are quoted upon request.

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

### Fittings

Fittings available for sizes 3/32" up to 1.1"

- Exceptional heat resistance
- Self extinguishing
- Non-wetting
- Excellent flexlife
- Laser markable

## Applications/Markets

- Electrical Insulation
- Protective Cover
- Circuit Board
- Wire Insulation
- Strain Relief
- Introducer
- Stent Delivery

## Certifications/Compliance

- AMS 3653E
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant
- **Light Wall** (TFL) – ASTM D3295 Class 1, UL-224 150V 200°C
- **Thin Wall** (TFT) – ASTM D3295 Class 2, AMS 3655B, UL-224 300V 200°C, CSA 9032-01 300V
- **Standard Wall** (TFS) – ASTM D3295 Class 3, MIL-I-22129C, UL-224 600V 200°C, CSA 9032-01 600V
- **Heavy Wall** (TFH) – ASTM D3295, Class 4

## Order Information

**Example: TFH13-2TC**

TFH13-2TC – PTFE

TFH13-2TC – Heavy Wall

TFH13-2TC – AWG Size

TFH13-2TC – Red

TFH13-2TC – Bulk Tubing

TFH13-2TC – Solid Color Tube

## Notes

- Working Temperature: 500°F (260°C)
- AWG Spaghetti tubing is supplied in random lengths with a minimum length of 25 feet
- Continuous lengths and colors quoted upon request
- AWG spaghetti tubing is also available in FEP and PFA
- Consult factory for pricing and minimum lengths

## Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

### Certifications

- ASTM D3295 Class 1
- AMS 3653E
- UL-224 150V 200°C
- FDA Compliant
- USP Class VI Compliant

For detailed ordering information, please consult price list or contact Parflex Division.

# PTFE Beading

## Series Fractional: TFB

### Applications/Markets

- Pull Cord
- O-ring Seals
- Spacers
- Woven Filter

### Features

- Virgin Polytetrafluoroethylene resin
- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting
- Excellent flexlife
- Laser markable

### Certifications

- ASTM D1710, Type 1, Grade 1, Class B
- ASTM D3295
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Notes

- Working Temperature: -100°F to 500°F (-75°C to 260°C)
- Package quantities are not continuous

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

Color Code					
○	N	Natural	●	5	Green
●	0	Black	●	6	Blue
●	1	Brown	●	7	Violet
●	2	Red	●	8	Gray
●	3	Orange	○	9	White
●	4	Yellow			

### Order Information

**Example: TFB028-NT**

**TFB028-NT – PTFE Beading**

**TFB028-NT – Beading O.D. in inches (.028")**

**TFB028-NT – Natural**

**TFB028-NT – Bulk Tubing**

For detailed ordering information, please consult price list or contact Parflex Division.

# PTFE Spiral Cut Cable Wrap

Series: TSWTF

## Features

- Provides harnessing for wires and cable while allowing leads at various points
- Exceptional heat resistance
- Self extinguishing
- Flexible
- Superior dielectric strength

## Certifications

- A-A-59602
- AMS 3653E
- ASTM D3295
- VW1, UL-83 (natural)

## Applications/Markets

- Cable harnessing
- Wiring closets
- Aerospace
- Automotive

## Notes

- Available in left- or right-hand cut. Please specify with proper suffix at end of part number (i.e. TSWTF-18-NT-R)
- Working Temperature: 500°F (260°C)
- 100 ft. is the minimum item quantity sold
- Stock packaging for sizes 1/8" to 1/2" is 100- and 500-ft. non-continuous spools and, for sizes greater than 1/2", 100-ft. non-continuous spools
- Custom packaging, sizes and colors are available upon request
- Spiral cut cable wrap is also quoted in FEP upon request
- Package quantities are not continuous
- Colors available as custom run, see color code table

## Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

## Order Information

**Example: TSWTF-3/8-5T**

**TSWTF-3/8-5T – Spiral Wrap**

**TSWTF-3/8-5T – Material (PTFE)**

**TSWTF-3/8-5T – O.D. in inches (.375")**

**TSWTF-3/8-5T – Green**

**TSWTF-3/8-5T – Bulk Tubing**

For detailed ordering information, please consult price list or contact Parflex Division.

# PTFE Heat Shrinkable Tubing

Series 2:1 Fractional: HS2TFS, HS2TFT, HS2TFL, HS2TFI

## Applications/Markets

- Electrical Insulation
- Protective Cover
- Electronic Harness
- Laboratory

## Order Information

**Example: HS2TFI7/8-NT**

**HS2TFI7/8-NT – Heat Shrink**

**HS2TFI7/8-NT – Shrink Ratio (2:1)**

**HS2TFI7/8-NT – PTFE**

**HS2TFI7/8-NT – Wall Type (Industrial Wall)**

**HS2TFI7/8-NT – Heat Shrink Size in inches (7/8")**

**HS2TFI7/8-NT – Natural**

**HS2TFI7/8-NT – Bulk Tubing**

## Notes

- Working Temperature: -100°F (-75°C) to +500°F (260°C)
- Shrink Temperature: 662°F (350°C) for 10 minutes per AMS-DTL-23053/12A
- \*Dielectric Strength:  $\geq 1,400$  V/M, per ASTM D 149 short term test of 10 MIL thickness (Volts/MIL)
- PTFE Fractional Heat Shrink tubing is available in stock packaging of 4-ft. straight lengths
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

## Features

- Virgin Polytetrafluoroethylene resin
- 2:1 Shrink Ratio
- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting

## Certifications

- ASTM D2902 Type I
- AMS 3653E
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant
- **Light Wall** (HS2TFL) – AMS-DTL-23053/12A Class 4
- **Thin Wall** (HS2TFT) – AMS-DTL-23053/12A Class 3, AMS 3585
- **Standard Wall** (HS2TFS) – AMS-DTL-23053/12A Class 2, AMS 3586
- **Heavy Wall** (HS2TFH) – AMS-DTL-23053/12A Class 1 (Custom Order only)

## Colors

- ○ Natural, Opaque to translucent
- Colors available as custom run, see color code table

When ordering coiled tubing in colors, the color code is always followed by TC; when ordering cut lengths, the color code is followed by CC

i.e., HS2TFI7/8-2TC      i.e., HS2TFI7/8-0CC48.000

# PTFE Heat Shrinkable Tubing

Series 2:1 AWG: HS2TFS, HS2TFT, HS2TFL

## Applications/Markets

- Electrical Insulation
- Protective Cover
- Electronic Harness
- Laboratory

## Order Information

**Example: HS2TFS15-4TC-500**

**HS2TFS15-4TC-500 – Heat Shrink**

**HS2TFS15-4TC-500 – Shrink Ratio (2:1)**

**HS2TFS15-4TC-500 – PTFE**

**HS2TFS15-4TC-500 – Wall Type (Standard Wall)**

**HS2TFS15-4TC-500 – Heat Shrink Size in AWG (AWG15)**

**HS2TFS15-4TC-500 – Yellow**

**HS2TFS15-4TC-500 – Bulk Tubing**

**HS2TFS15-4TC-500 – Solid Color**

**HS2TFS15-4TC-500 – Package Quantity in feet (500')**

## Notes

- Working Temperature: -100°F (-75°C) to +500°F (260°C)
- Shrink Temperature: 662°F (350°C) for 10 minutes AMS-DTL-23053/12A
- \*Dielectric Strength:  $\geq 1,400$  V/M, per ASTM D 149 short term test of 10 MIL thickness (Volts/MIL)
- PTFE AWG Heat Shrink tubing is available in stock packaging of 4-ft. straight lengths
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

## Features

- Virgin Polytetrafluoroethylene resin
- 2:1 Shrink Ratio
- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting

## Certifications

- ASTM D2902 Type I
- AMS 3653E
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant
- **Light Wall** (HS2TFL) – AMS-DTL-23053/12A Class 4
- **Thin Wall** (HS2TFT) – AMS-DTL-23053/12A Class 3, AMS 3585
- **Standard Wall** (HS2TFS) – AMS-DTL-23053/12A Class 2, AMS 3586
- **Heavy Wall** (HS2TFH) – AMS-DTL-23053/12A Class 1 (Custom Order only)

## Colors

\*Dielectric Strength: ≥ 1,400 V/M, per ASTM D 149 short term test of 10 MIL thickness (Volts/MIL)

## Certifications

- AMS-DTL-23053/12A, Class 4
- ASTM D2902 Type I
- FDA Compliant
- USP Class VI Compliant

For detailed ordering information, please consult price list or contact Parflex Division.

# PTFE Heat Shrinkable Tubing

## Series 4:1 HS4TFI

### Applications/Markets

- Electrical Insulation
- Protective Cover
- Rollers
- Bulb Protection

### Features

- Virgin Polytetrafluoroethylene resin
- 4:1 Shrink Ratio
- Chemically inert
- Lowest coefficient of friction
- Superior dielectric strength
- Exceptional heat resistance
- Self extinguishing
- Non-wetting

### Certifications

- AMS-DTL-23053/12A, Class 5
- ASTM D2902 Type I
- AMS 3584A
- VW1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Colors

- ○ Natural, Opaque to translucent
- Colors available as custom run, see color code table

When ordering coiled tubing in colors, the color code is always followed by TC; when ordering cut lengths, the color code is followed by CC

i.e.,HS4TFI5/8-2TC i.e.,HS4TFI5/8-0CC48.0000

### Order Information

**Example: HS4TFI5/8-NT**

**HS4TFI5/8-NT – Heat Shrink**

**HS4TFI5/8-NT – Shrink Ratio (4:1)**

**HS4TFI5/8-NT – PTFE**

**HS4TFI5/8-NT – Wall Type (Industrial Wall)**

**HS4TFI5/8-NT – Heat Shrink Size in inches (5/8")**

**HS4TFI5/8-NT – Natural**

**HS4TFI5/8-NT – Bulk Tubing**

### Notes

- Working Temperature: -500°F (260°C)
- Shrink Temperature: 662°F (350°C) for 10 minutes AMS-DTL-23053/12A
- For full recovery, expanded diameter should be 50% larger than the diameter of the object to be recovered over
- \*Dielectric Strength: ≥ 1,400 V/M, per ASTM D 149 short term test of 10 MIL thickness (Volts/MIL)
- PTFE Fractional Heat Shrink tubing is available in stock packaging of 4-ft. straight lengths
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

# PTFE Convoluted Series Convo-Tex®

## Features

- Chemically inert
- Low coefficient of friction
- Very flexible
- Self extinguishing
- Non-wetting

## Certifications

- AMS 3653E
- VWI, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

## Applications/Markets

- Fluid Transport
- Wire Harness
- Protection/Cable Core
- Robotics

## Order Information

**Example: CV01-1/8-NT**

**CV01-1/8-NT – Convoluted**

**CV01-1/8-NT – PTFE**

**CV01-1/8-NT – Size to Order (1/8")**

**CV01-1/8-NT – Color (N=Natural)**

CV01-1/8-NT- "T" is bulk (for cuffed tubing, remove "T" and add length, ie. CV01-1/8-N1200 = 1" Convo, natural, cut 12" long)

## Notes

- Working Temperature: -100°F (-75°C) to +500°F (260°C)
- Standard cuffs for Convo-Tex are sized on the Inside Diameter
- Wire wrap reinforcement can be added for increased pressure applications or when a tighter bend radius is needed
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

## Colors

- ○ Natural, Opaque to Translucent
- Colors available as custom run, see color code table

# PTFE Convoluted

## Series Low Profile and Heavy Wall

### Applications/Markets

- Fluid Handling
- Harnesses
- Lab Equipment
- Robotics

### Order Information

**Example: CVH01-1/8-NT**

**CVH01-1/8-NT – CVH - Heavywall Convoluted**  
– CVL Low Profile Convoluted

CVH01-1/8-NT – **PTFE**

CVH01-**1/8-NT** – **Size to Order (1/8")**

CVH01-1/8-**NT** – **Color (N=Natural)**

CVH01-1/8-**NT** – **"T" is bulk** (for cuffed tubing, remove "T" and add length, ie. CVH01-1/8-N1200 = 1" Heavy Wall Convo, natural, cut 12" long)

### Notes

- Working Temperature: 500°F (260°C)
- Standard cuffs for Convo-Tex are sized on the Inside Diameter
- Wire wrap reinforcement can be added for increased pressure applications or when a tighter bend radius is needed
- Minimum quantities may apply
- Custom packaging, sizes, lengths, cuffs and colors are quoted upon request

### Features

- Chemically inert
- Low coefficient of friction
- Very flexible
- Self extinguishing
- Non-wetting

### Low Profile

- Larger inside diameter
- Increased Flow

### Heavy Wall

- Reinforces the strength of the tube allowing for braiding or covering, flanging or flaring
- Handles higher vacuum

### Certifications

- AMS 3653E
- VW1, UL-83
- FDA Compliant
- USP Class VI Compliant

### Colors

- ○ Natural, Opaque to Translucent
- Colors available as custom run, see color code table

# PTFE Convoluted

## Series SAE AS81914/1 and SAE AS81914/2

### Features

- Chemically inert
- Low coefficient of friction
- Very flexible
- Self extinguishing
- Non-wetting

### Certifications

- AMS 3653E
- SAE AS81914/1
- SAE AS81914/2
- FDA Compliant

### Applications/Markets

- Fluid Handling
- Harnesses
- Crush Resistant Cover
- Robotics

### Order Information

**Example: 81914/1-1010-0TC**

**81914/1-1010-0TC – SAE AS81914 Convoluted**

81914/1-1010-0TC – PTFE

81914/1-1010-0TC – Helical Convolutions

81914/1-1010-0TC – Size (10=1.000")

81914/1-1010-0TC – Color (0=Black)

81914/1-1010-0TC – "T" is bulk - (for cuffed tubing, remove "T" and add length, ie. 81914/1-1010-01200 = 187" Convo, black, cut 12" long

### Notes

- Working Temperature: 500°F (260°C)
- Tubing is provided in black without cuffs direct from inventory
- Stock packaging is random coils
- Also available in close convolution 81914/2
- Minimum quantities may apply
- Custom packaging, sizes, lengths, cuffs and colors are quoted upon request

### Colors

- ● Black
- Colors available as custom run, see color code table

When ordering convoluted tubing in colors, the "N" designation for natural should be replaced by the correct color designator;

i.e., 81914/1-101-0T (black bulk tubing)

i.e., 81914/1-101-01200 (black tubing - 12 inches long)

\*PTFE convoluted tubing is provided in BLACK without cuffs direct from the factory. Black part numbers are designated with "OT" and Natural part numbers are designated with "NT" after the Mil Spec number (i.e.,81914/1-1014-OT).

Standard Cuffs for  
81914/1 are sized  
on the I.D.

Without Cuffs

With Cuffs

For detailed ordering information, please consult price list or contact Parflex Division.

# FEP Tubing

## Series Fractional & Metric: 103, 203

### Features

- Virgin Fluorinated Ethylene Propylene resin
- Translucent
- Chemically inert
- Long continuous lengths
- Low coefficient of friction
- Self extinguishing
- Non-wetting
- Weldable

### Certifications/Compliance

- ASTM D2116-07
- VW-1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Applications/Markets

- Nitrogen Transfer
- Ozone Sampling
- Optical Sensor
- Laboratory
- Down Hole Pump
- Food & Beverage
- Catheter Repair
- Syringe Tips

### Order Information

**Example: 103-0250031-NT-100**

103-0250031-NT-100 – Fractional

103-0250031-NT-100 – FEP

103-0250031-NT-100 – Tube O.D. in inches (1/4")

103-0250031-NT-100 – Tube Wall Thickness in inches (.031")

103-0250031-NT-100 – Natural

103-0250031-NT-100 – Package Quantity in feet (100')

### Fittings

Fittings available for sizes 1/8" up to 1"

Parker Fittings available from: Fluid System Connectors Division  
Otsego, MI (269) 692-6555 (269) 692-6634 FAX

FSC Product Families:

- Compression
- Compress-Align®
- Metric Compression
- Flow-Controls
- Prestolok Composite
- Prestolok All-Metal
- Prestolok Stainless
- TrueSeal™

### Notes

- Working Temperature: -100°F (-75°C) to +400°F (204°C)
- Working pressure calculated using a Design Factor of 4 at 73°F (23°C)
- Custom packaging and sizes are quoted upon request
- Package quantities are not continuous

### Options

- Smoothbore
- Convoluted
- Corrugated
- Retractable Coils
- Paratubing

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

# FEP Heat Shrinkable Tubing

## Series 1.3:1 HS1.3FEP

### Features

- Easier to shrink than PTFE
- Chemically inert
- Low coefficient of friction
- Superior dielectric strength
- Good heat resistance
- Self extinguishing
- Non-wetting

### Certifications

- AMS-DTL-23053/11A, Class 1
- ASTM D2902 Type II
- ASTM D3296-03
- VW-1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Applications/Markets

- Protective Cover
- UV Light Covering
- Product Testing
- Rollers

### Order Information

**Example: HS1.3FEP24-0CC48.000**

**HS1.3FEP24-0CC48.000 – Heat Shrink**

**HS1.3FEP24-0CC48.000 – Shrink Ratio (1.3:1)**

**HS1.3FEP24-0CC48.000 – FEP**

**HS1.3FEP24-0CC48.000 – Heat Shrink Size in AWG**

**(AWG 24) (For inch size use inch (3/8"))**

**HS1.3FEP24-0CC48.000 – Black**

**HS1.3FEP24-0CC48.000 – Package Quantity in feet (48")**

### Notes

- Working Temperature: 400°F (204°C)
- Shrink Temperature:  
1" Dia. and below : 410°F (210°C)  
Over 1" Dia. : 430°F (221°C)
- \*Dielectric Strength: ≥ 2,000 V/M, per ASTM D 149 short term test of 10 MIL thickness (Volts/MIL)
- Heat Shrink tubing is available in stock packaging of 4-ft. straight lengths
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

When ordering coiled tubing in colors, the color code is always followed by TC; when ordering cut lengths, the color code is followed by CC  
i.e., HS1.3FEP24-2TC  
i.e., HS1.3FEP24-0CC48.000

# FEP Heat Shrinkable Tubing

## Series 1.67:1 HS1.6FEP

### Features

- Easier to shrink than PTFE
- Chemically inert
- Low coefficient of friction
- Superior dielectric strength
- Good heat resistance
- Self extinguishing
- Non-wetting

### Certifications

- AMS-DTL-23053/11A, Class 2
- ASTM 2902 Type II
- ASTM D3296-03
- VW-1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Applications/Markets

- Protective Cover
- UV Light Covering
- Product Testing
- Rollers

### Order Information

**Example: HS1.6FEP3/32-NC48.000**

**HS1.6FEP3/32-NC48.000 – Heat Shrink**

**HS1.6FEP3/32-NC48.000 – Shrink Ratio (1.67:1)**

**HS1.6FEP3/32-NC48.000 – FEP**

**HS1.6FEP3/32-NC48.000 – Heat Shrink Size in inches (3/32")**

**HS1.6FEP3/32-NC48.000 – Natural**

**HS1.6FEP3/32-NC48.000 – Cut Tubing**

**HS1.6FEP3/32-NC48.000 – Package Quantity in feet (48")**

### Notes

- Working Temperature: 400°F (204°C)
- Shrink Temperature:  
1" Dia. and below: 410°F (210°C)  
Over 1" Dia.: 430°F (221°C)
- \*Dielectric Strength:  $\geq 2,000$  V/M, per ASTM D 149 short term test of 10 MIL thickness (Volts/MIL)
- Heat Shrink tubing is available in stock packaging of 4-ft. straight lengths
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

When ordering coiled tubing in colors, the color code is always followed by TC; when ordering cut lengths, the color code is followed by CC  
i.e., HS1.6FEP3/32-2TC  
i.e., HS1.6FEP3/32-OCC48.000

# FEP Heat Shrinkable Roll Cover

## Series 1.25:1 HS1.25FEP

### Features

- Extends roller life
- Eliminates roller build up and picking
- Low coefficient of friction
- Flexible
- Good heat resistance

### Certifications

- ASTM D2902 Type II
- VW-1, UL-83 (natural)

### Applications/Markets

- Protective Cover
- Rollers

### Order Information

**Example: HS1.25FEP3.50-NC48.000**

**HS1.25FEP3.50-NC48.000 – Heat Shrink**

**HS1.25FEP3.50-NC48.000 – Shrink Ratio (1.25:1)**

**HS1.25FEP3.50-NC48.000 – FEP**

**HS1.25FEP3.50-NC48.000 – Heat Shrink Expanded**

**Size inches (3 1/2 in)**

**HS1.25FEP3.50-NC48.000 – Natural**

**HS1.25FEP3.50-NC48.000 – Cut Tubing**

**HS1.25FEP3.50-NC48.000 – Package Quantity in feet (48")**

### Notes

- Working Temperature: 400°F (204°C)
- Shrink Temperature:  
347°F (175°C) for 10 minutes - For high temperatures  
500°F (260°C), PFA roll covers are available
- Dielectric Strength: ≥ 2,000 V/M, per ASTM D 149  
short term test of 10 MIL thickness (Volts/MIL)
- Roll Cover is available in stock packaging of  
4-ft. straight lengths
- Custom packaging, sizes, lengths and colors are  
quoted upon request
- For adhesion purposes, roll covers must be etched;  
Etching is available on the inside diameter, outside  
diameter or both
- Minimum quantities may apply

### Colors

- ○ Natural, Translucent

# FEP/PTFE Heat Shrinkable Double Shrink Series TSSS and TSSL

## Features

- Double Shrink encapsulates your parts as the FEP melts during the PTFE shrinking process
- Protects cables, tubes and other objects from moisture and dirt
- Self extinguishing

## Certifications

- VW-1, UL-83 (natural)

## Applications/Markets

- Wire splices
- Encapsulates fittings

TSSL036-NC48.000 – Double Shrink

TSSL036-NC48.000 – Light Wall

TSSL036-NC48.000 – Size in inches (0.036")

TSSL036-NC48.000 – Natural

TSSL036-NC48.000 – Cut Tubing

TSSL036-NC48.000 – Package Quantity in feet (48")

## Notes

- Working Temperature: 450°F (231°C)
- Shrink Temperature: 680°F (360°C)
- Longitudinal Change: +/- 10%
- Heat Shrink tubing is available in stock packaging of 4-ft. straight lengths
- Custom packaging, sizes, lengths and colors are quoted upon request
- Minimum quantities may apply

## Colors

- ○ Natural, Translucent

# FEP Convoluted Tubing

Series: CV03 and Convo-Flon™

## Features

- Cuffs are sized on the I.D.
- Very flexible
- Long continuous lengths
- Translucent
- Chemically inert
- Good flexlife

## Certifications/Compliance

- ASTM D3296-03
- VW-1, UL-83 (natural)

## Applications/Markets

- Fluid Transport
- Vascular Graft
- Laboratory
- Robotics

## Order Information

**Example: CV03-1-1/2-NT**

**CV03-1-1/2-NT – Convoluted Tubing**

**CV03-1-1/2-NT – FEP**

**CV03-1-1/2-NT – Tube Size in inches (1-1/2")**

**CV03-1-1/2-NT – Natural**

## Notes

- Working Temperature: -100°F (-75°C) to +400°F (204°C)

For detailed ordering information, please consult price list or contact Parflex Division.

# FEP Convoluted

## Series SAE AS81914/3 and SAE AS81914/4

### Features

- Longer lengths than PTFE
- Excellent clarity
- Chemically inert
- Low coefficient of friction
- Superior dielectric strength
- Good heat resistance
- Self extinguishing
- Non-wetting

### Applications/Markets

- Fluid Handling
- Harnesses
- Lab Equipment
- Robotics

### Certifications

- SAE AS81914/3
- SAE AS81914/4
- ASTM D3296-03
- FDA Compliant
- USP Class VI Compliant
- VW-1, UL-83 (natural)

### Order Information

**Example: 81914/3-1001-NT**

**81914/3-1001-NT – SAE AS81914 Convoluted**

81914/3-1001-NT – **FEP**

81914/3-**1001**-NT – **Helical Convolution**

81914/3-10**01**-NT – **Size (01=0.187")**

81914/3-1001-**NT** – **Color (N=Natural)**

81914/3-1001-**NT** – **"T" is bulk** (for cut tubing remove "T", add length, ie. 81914/3-1001-N1200 = 187" Convo, natural, cut 12" long)

### Notes

- Working Temperature: 392°F (200°C)
- Tubing is provided in natural without cuffs direct from inventory
- Stock packaging is random coils
- Also available in close convolution 81914/4
- Minimum quantities may apply
- Custom packaging, sizes, lengths, cuffs and colors are quoted upon request

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

When ordering convoluted tubing in colors, the "N" designation for natural should be replaced by the correct color designator;

i.e., 81914/3-1001-0T (black bulk tubing)

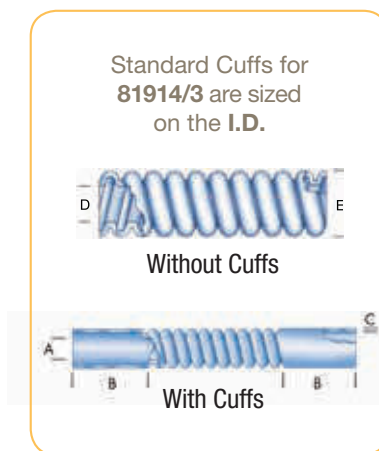

i.e., 81914/3-1001-01200 (black tubing - 12 inches long)

Color Code

FEP convoluted tubing is provided in NATURAL without cuffs direct from the factory. Natural part numbers are designated with "NT" after the Mil Spec number (i.e., 81914/3-1014-NT).

For detailed ordering information, please consult price list or contact Parflex Division.

# FEP/PFA Corrugated

## Extra Flexible Fluoropolymer Tubing, Series CR03

### Features

- Capable of turning sharp corners without reducing the inside diameter of the tube
- Extremely flexible
- Kink resistant
- Non stick surface allows for easy cleaning
- Excellent clarity
- Chemically inert
- Available in FEP, PFA and High Purity PFA

### Certifications

- FEP - ASTM D3296-03
- PFA - ASTM D3307-10
- FDA Compliant
- USP Class VI Compliant
- VW-1, UL-83 (natural)

### Applications/Markets

- Vacuum Applications
- Robotics
- Instrumentation
- DNA Sequencer
- Fluid Transfer
- Pharmaceutical
- Wet Bench

### Order Information

**Example: CR03-3/4-NT**

**CR03-3/4-NT – Corrugated Tubing**

**CR03-3/4-NT – FEP**

**CR03-3/4-NT – Tube I.D. when cuffed in inches (3/4")**

**CR03-3/4-NT – Color (N=Natural)**

**CR03-3/4-NT – “T” is bulk - for cuffed tubing add length, ie. CR03-3/4-N1200 = 1" Corr, natural, cut 12" long**

### Colors

- ○ Natural, Translucent

### Notes

- Working Temperature: 200°F (93°C) @ 0 pressure - For higher temperatures, request PFA Corrugated 300°F (148°C) @ 0 pressure
- Vacuum Service: 29.9 IN. Hg (759M Hg)
- Extension-Compression Length Ratio: Approximately 2:1
- Tubing is provided in natural without cuffs direct from inventory or with cuffs, as requested at time of order
- Stock packaging is random coils
- Minimum quantities may apply
- Corrugated tubing is also available in specialty configurations where corrugated and straight tubing run intermittently along the tube
- Custom packaging, sizes, lengths and colors are quoted upon request

For detailed ordering information, please consult price list or contact Parflex Division.

# Retractable Coiled Tubing

## Single or Dual Containment, Series 703, 704, 705

### Features

- Extremely flexible
- Excellent clarity
- Chemically inert
- Low coefficient of friction
- Self extinguishing
- Non-wetting
- Available in FEP, PFA and High Purity PFA

### Certifications

- FEP - ASTM D3296-03
- PFA - ASTM D3307-10
- FDA Compliant
- USP Class VI Compliant
- VW-1, UL-83 (natural)

### Applications/Markets

- Fluid Handling
- Wet Bench
- Lab Equipment
- Gas Dispensing
- Medical

### Order Information

**Example: 704-0312062-xx0012**

704-0312062-xx0012 – **Retractable tubing**

704-0312062-xx0012 – **PFA**

704-0312062-xx0012 – **Tube O.D. in inches (3/16")**

704-0312062-xx0012 – **Wall (0.062")**

704-0312062-xx0012 – **Custom Options** (when needed)

704-0312062-xx0012 – **Length 12"**

### Fittings

Fittings available for sizes 3/16" up to 1/2"

Parker Fittings available from:  
Fluid System Connectors Division  
Otsego, MI

(269) 692-6555

(269) 692-6634 FAX

FSC Product Families:

- Compression
- Compress-Align®
- TrueSeal™

### Colors

- ○ Natural, Translucent

### Notes

- Working Temperature: 200°F (93°C) @ 0 pressure - For higher temperatures, request PFA 300°F (148°C) @ 0 pressure; above these temperatures, the coils dimensions are not stable and the coils will lose their shape
- Wall thickness of tubing .062"/1.57mm
- "X" denotes resin type - Replace "X" with 3 for FEP, 4 for PFA and 5 for HP PFA
- "xx" denotes custom options - Use when needed
- Standard left/right tail length is 6 inches
- Minimum quantities may apply
- Custom packaging, sizes, lengths and colors are quoted upon request

# PFA Tubing

## Series Fractional & Metric: 104, 204

### Applications/Markets

- Air Sampling
- Gas Sampling
- Fluid Transfer
- Laboratory
- Wet Bench
- Flow Monitoring
- Steam Plant

### Order Information

**Example: 104-0188062-NT-100**

104-0188062-NT-100 – Fractional

104-0188062-NT-100 – PFA

104-0188062-NT-100 – Tube O.D. in inches (3/16")

104-0188062-NT-100 – Tube Wall Thickness in inches (.062")

104-0188062-NT-100 – Natural

104-0188062-NT-100 – Package Quantity in feet (100')

### PFA Tubing (Series 104, 204) Maximum Working Pressure (bar)

### Features

- Virgin Perfluoroalkoxy
- Translucent
- High purity resins available
- Low permeability
- Exceptional heat resistance
- Chemically inert
- Long continuous lengths
- Low coefficient of friction
- Self extinguishing
- Non-wetting
- Non leaching

### Certifications/Compliance

- ASTM D3307-10
- VW-1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Fittings

Fittings available for sizes 3/32" up to 1"

Parker Fittings available from: Fluid System Connectors Division  
Otsego, MI (269) 692-6555 (269) 692-6634 FAX

FSC Product Families:

- Compression
- Compress-Align®
- Metric Compression
- TrueSeal™

### Notes

- Working Temperature: -100°F (-75°C) to +500°F (260°C)
- Working pressure calculated using a Design Factor of 4 at 73°F (23°C)
- Custom packaging and sizes are quoted upon request
- Package quantities are not continuous

### Options

- Smoothbore
- Convoluted
- Corrugated
- Retractable Coils
- Heat Shrink

### Colors

- ○ Natural, Translucent
- Colors available as custom run, see color code table

For detailed ordering information, please consult price list or contact Parflex Division.

# High Purity PFA Tubing

## Series Fractional & Metric: 105, 205

### Features

- Withstands corrosive surfactants for longer periods of time
- Highest molecular weight available
- Lowest level of extractables
- Low permeability
- Exceptional heat resistance
- Chemically inert
- Long continuous lengths
- Low coefficient of friction
- Self extinguishing
- Non leaching

### Certifications/Compliance

- ASTM D3307-10
- VW-1, UL-83 (natural)
- FDA Compliant
- USP Class VI Compliant

### Applications/Markets

- Flow Monitoring
- Gas Transfer
- Food
- Wet Bench
- DI Water Dispensers
- DI Recirculators
- Heat Exchangers
- Pure Chemical Dispensers
- High Purity Applications

### Order Information

**Example: 105-0375031-NT-100**

105-0375031-NT-100 – **Fractional**

105-0375031-NT-100 – **High Purity PFA**

105-**0375031**-NT-100 – **Tube O.D.** in millimeters (**3/8"**)

105-0375**031**-NT-100 – **Tube Wall Thickness** in millimeters (**.031"**)

105-0375031-**NT**-100 – **Natural**

105-0375031-NT-**100** – **Package Quantity** in feet (**100'**)

### Fittings

Fittings available for sizes 4mm up to 12mm

Parker Fittings available from:  
Fluid System Connectors Division  
Otsego, MI

(269) 692-6555

(269) 692-6634 FAX

FSC Product Families:

- Compression
- Compress-Align®
- Metric Compression
- TrueSeal

### Notes

- Working Temperature: -100°F (-75°C) to +500°F (260°C)
- Working pressure calculated using a Design Factor of 4 at 73°F (23°C)
- Custom packaging and sizes are quoted upon request
- Package quantities are not continuous

### Options

- Smoothbore
- Convoluted
- Corrugated
- Retractable Coils

### Colors

- Natural, Translucent

# PVDF Tubing Polyvinylidene Fluoride

## Series PVDF Flex™: 110, Series PVDF Super-Flex™: 111

### Features

- Low extractable levels
- High mechanical strength
- Good chemical resistance
- High abrasion resistance
- Exceptional thermal stability
- Low permeability
- Self extinguishing
- Weather resistant

### Certifications

- ASTM D3222
- FDA Compliant

### Applications/Markets

- Applications with long cycle life
- Gas
- Food
- Thermal cycling
- Outdoor/extreme conditions
- Water systems
- Ground water monitoring
- Fluid and handling

### Order Information

**Example: 110-0312062-NT-100**

- 110-0312062-NT-100 – **PVDF Flex**
- 110-0312062-NT-100 – **Tube O.D. in inches (5/16")**
- 110-0312062-NT-100 – **Tube Wall Thickness in inches (.062")**
- 110-0312062-NT-100 – **Natural**
- 110-0312062-NT-100 – **Bulk Tubing**
- 110-0312062-NT-100 – **Package Quantity in feet (100')**

### Fittings

Fittings available for sizes 1/8" up to 1"

Parker Fittings available from:  
Fluid System Connectors Division  
Otsego, MI

(269) 692-6555  
(269) 692-6634 FAX

FSC Product Families:

# Air Hose

Every hydraulic, pneumatic and lubrication system requires some form of tube line fabrication and fitting installation for completion. Proper fabrication and installation are essential for the overall efficiency, leak free performance, and general appearance of any system.

Start by planning ahead. After sizing the tube lines and selecting the appropriate style of fitting, consider the following in the design of your system:

- Accessibility of joints
- Proper routing of lines
- Adequate tube line supports
- Available fabricating tools

## Routing of Lines

Routing of lines is probably the most difficult, yet most significant, of these system design considerations. Proper routing involves getting a connecting line from one point to another through the most logical path.

Always try to leave fitting joints as accessible as possible. Hard to reach joints are hard to assemble and tighten properly. Inaccessible joints are also more difficult and time consuming to service.

# Size Selection Procedure

Proper size selection is extremely important in choosing any air hose in order to prevent “starvation” of the air tool and to ensure maximum torque and tool speed. Starved tools don’t produce!

Steps in size selection:

1. Determine air flow rate and pressure required by following air-tool manufacturers recommendations.
2. Refer to “Air Flow Characteristics” graphs, shown below. Find air flow requirement in standard cubic feet per minute (SCFM) on vertical line to left of graph. Now follow horizontal line on same graph to determine total extended length of hose required. Follow vertical line above hose length to intersection with the horizontal air flow SCFM line.
3. Note pressure drop above curve nearest to intersection of SCFM and hose length lines. Pressure drop, subtracted from line pressure, equals “available pressure” at the selected SCFM flow rate and hose length.
4. If “available pressure” is below the tool manufacturers’ recommendations, refer to chart for successively larger hose sizes until an acceptable “available pressure” is found. Choose this size Fast-Stor® Air Hose for your application.
5. Refer to “working pressure vs. temperature” chart (pg. B-11) to be sure your application falls within the working range of Fast-Stor® Air Hose.

Actual working pressure charts are located in the tubing section on the specific product page.

For detailed ordering information, please consult price list or contact Parflex Division.

# Measuring Fast-Stor® Bulk Hose

Measuring Fast-Stor® hose is quick and easy and may be accomplished by either of two accurate methods:

## 1. Counting

Total Length of Hose			Number of Coils Needed to Obtain Required Net Extended Length +3%				
			3/16 I.D. Fast-Stor®	1/4 I.D. Fast-Stor®	3/8 I.D. Fast-Stor®	1/2 I.D. Fast-Stor®	3/4 I.D. Fast-Stor®
ft.	inch	mtr.	coils	coils	coils	coils	coils
3	36	0.91	5-1/8	3-1/2	2-1/4	1-5/8	7/8
3	36	0.91	5-1/8	3-1/2	2-1/4	1-5/8	7/8
5	60	1.52	8-1/2	5-3/4	3-7/8	2-5/8	1-1/2
7	84	2.13	12	8-1/8	5-3/4	3-3/4	1-1/8
10	120	3.05	17-1/8	11-1/2	7-3/4	5-3/8	3
12	144	3.66	20-1/2	13-7/8	9-1/4	6-1/2	3-1/2
15	180	4.57	25-3/4	17-3/8	11-1/2	8	4-1/2
16	192	4.88	27-3/8	18-1/2	12-3/8	8-5/8	4-3/4
17	204	5.18	29-1/8	19-5/8	13-1/8	9-1/8	5
19	216	5.79	30-7/8	20-3/4	13-7/8	9-5/8	5-3/8
20	240	6.10	34-1/4	23-1/8	15-3/8	10-3/4	6
25	300	7.62	42-7/8	28-7/8	19-1/4	13-3/8	7-1/2
30	360	9.14	51-3/8	34-5/8	23-1/8	16-1/8	8-7/8
33	396	10.06	56-1/2	38-1/8	25-3/8	17-3/4	9-3/4
50	600	15.24	85-5/8	57-3/4	38-1/2	26-7/8	14-7/8

1 Full 360° Coil

## 2. Division into Even Numbers of Lengths

Bulk retracted lengths of Fast-Stor® hose are always exactly 100 feet long when shipped from the factory. Some diameter expansion of the coils may occur in shipment due to temperature and storage conditions. This may appear to have shortened a given 100 foot retracted length slightly in relation to other 100 foot retracted lengths in the same master carton. The shorter appearance should not be mistaken for any actual shortage in extended length. A bulk retracted length may be easily divided into smaller lengths by first measuring the tightly retracted length in inches, and dividing by 4 to determine the cut-off length for 25 feet, by 3 for 33 feet, by 8 for 12-1/2 feet, etc. Pieces should be tagged with their proper length before returning to storage.

### Cutting Bulk Length Coils

To cut bulk length coils, position coils on work table extending away from you, cut end-up in 12 o'clock position.

*For detailed ordering information, please consult price list or contact Parflex Division.*

# Fast-Stor® Air Hose

## Features

- Manufactured from tough, abrasion-resistant nylon
- Excellent memory characteristics over a wide temperature range
- Long service life in rugged applications
- Desirable Safety Yellow color per U.S. Government OSHA directives
- Optimal retail packaging available\*

## Applications/Markets

- Blow Guns
- Construction
- Mfg. Air Drops
- Machine Tool Lubrication
- Water Hose

# Fast-Stor® Fittings

Fittings for Fast-Stor® hose are constructed from heavy duty brass with built in insert-supports. Fitting bodies are SAE Standard sizes. Hose entry length into the fittings is the longest in the industry due to Parflex's SAE body design and size standardization, assuring a strong grip on the hose.

All fitting part numbers include body, nut, ferrule and spring guard. For body only, use Prefix B.

## How to Assemble Fast-Stor® Hose

- Using a Parker HTC hand cutter, PTC tubing cutter or other sharp cutting tool, cut hose squarely to correct length.
- Install SG spring guard on hose as shown. A guard is not required on size -12 hose.
- Slide FN nut on hose. Then slide FR plastic ferrule over hose with taper side toward cut end of hose. Size -12 hose uses a brass ferrule and requires the hose end to be dipped in lean water for lubrication.
- Insert TS tube support.
- Push hose into fitting body until bottomed. Slide nut and ferrule up to fitting body and tighten nut by hand. With a wrench, tighten the nut additional 2 to 2-1/2 turns.
- Slide spring guard over nut until the lead coil snaps between the nut and fitting body hex.

For detailed ordering information, please consult price list or contact Parflex Division.

# Parflex NoMar® Fast-Stor® Assemblies AUFS

## Features

- Manufactured from durable, abrasion-resistant Polyurethane
- Excellent memory characteristics over a wide temperature range
- Field-attachable fittings
- Available in bulk or factory-made assemblies

## Applications/Markets

- Auto Repair
- Blow Guns
- Construction
- Carpentry
- Furniture Manufacturing
- Mfg. Air Drops
- Marine
- Water Hose

# Parflex NoMar® Fast-Stor® Coiled Tubing UFS

## Features

- Manufactured from durable, abrasion-resistant Polyurethane
- Excellent memory characteristics over a wide temperature range
- Long service life in rugged applications

## Applications/Markets

- Auto Repair
- Blow Guns
- Construction
- Carpentry
- Furniture Manufacturing
- Mfg. Air Drops
- Marine
- Water Hose

## Construction

Tube: Transparent Blue Polyurethane

## Operating Parameters

Service temperature range: -40°F (-40°C) to +180°F (82°C)  
Maximum working pressure based on safety factor of 3:1 over burst

## Notes

xxx- Denotes Hose Length (feet)  
Pigtail Lengths - 16" swivel end, 8" rigid end  
Other sizes available upon request

## Colors

Color Code		
	TBLU	Transparent Blue

Other colors available upon request - consult factory

## Order Information

**Example: UFS-86-TBLU-010**

**UFS-86-TBLU-010** – Assembled NoMar® Fast-Stor®

**UFS-86-TBLU-010** – Tube OD (1/2")

**UFS-86-TBLU-010** – Tube ID (3/8")

**UFS-86-TBLU-010** – Color (Transparent Blue)

**UFS-86-TBLU-010** – Total Length (10')

For detailed ordering information, please consult price list or contact Parflex Division.

# Parflex NoMar® Fast-Stor® Coiled Assembly AHUFS

## Features

- Manufactured from durable, abrasion-resistant 98 Durometer Polyurethane
- Excellent memory characteristics over a wide temperature range
- Long service life in rugged applications

## Applications/Markets

- Auto Repair
- Blow Guns
- Construction
- Carpentry
- Furniture Manufacturing
- Mfg. Air Drops
- Marine
- Water Hose

Includes live male end and rigid male end

# Parflex NoMar® Fast-Stor® Fittings

Parflex NoMar® Fast-Stor® fittings are manufactured from a heavy brass construction utilizing all standards for NPTF pipe threads. The engineered barb design generates the maximum gripping and sealing power when combined with the socket.

## Assembly Instructions

1. Slide the socket on the tubing with threads facing the end of the tubing.
2. Press the tubing over the Tube Support portion of the fitting until the tube bottoms out. Do not use a lubricant.
3. Push the socket up to meet the mating threads on the fitting, finger tighten the socket onto the fitting.
4. Tighten the fitting and socket until the fitting hex and socket hex meet.

For detailed ordering information, please consult price list or contact Parflex Division.

# Ultra-Lite Superbraid® Hose

## Features

- More than 20% lighter than similar braided polyurethane hoses
- Extremely tough and abrasion resistant
- State-of-the-art strain relief system allows the hose to bend freely without kinking at the fitting
- Features lightweight, non-marring jacket

## Applications/Markets

- Auto Repair

- Blow Guns

- Construction

- Carpentry

- Furniture Manufacturing

- Mfg. Air Drops

- Marine

- Water Hose

3/8	3/8	Male NPT, Swivel	U06266SU	U07266SU
1/4	-	Hose Splicer	U06244-HS	-
3/8	-	Hose Splicer	U06266-HSU	-

\* Includes Fitting & Nut (No Strain Relief).

\*\* Includes Fitting & Nut with permanently attached strain relief.

Parflex Field Attachable Fittings do not require inserts or ferrules that become deformed during installation, so the fittings can be used over again without replacing any components. In addition, only two wrenches are needed to complete a safe and secure connection, making fitting replacement quick and easy!

For detailed ordering information, please consult price list or contact Parflex Division.

# Nylon Air Brake Tubing

## Features

- 100% pressure tested
- Excellent UV stability
- Abrasion resistant
- Kink resistant

## Certifications

- Meets SAE Specification J844
- Meets DOT FMVSS 49CFR 571.106  
\*2A, 3A, and 5A are not DOT sizes

## Applications/Markets

- Air brake lines

# Parflex Diesel Fuel Tubing

## Features

- Nylon tubing designed for use in tractor, trailer and other mobile fuel systems
- Heat and light stabilized
- 100% quality controlled - 100% pressure tested
- Saves weight and labor in comparison with hose and hard-line tubing

## Approvals

- Compatible with JP-5 (MIL-DTL-5624) and JP-8 (MIL-DTL-83133)
- Compatible with Biodiesel per Parflex PPB PL-18 hard-line tubing

## Applications/Markets

- D.O.T. diesel fuel applications

# FLR Diesel Fuel Tubing

## J2044 Quick Connect Ready

### Features

- Utilizes SAE 2044 Safe-Lock™ Quick Connect Fittings
- Easy to assemble
- Heat and UV stabilized
- 100% pressure tested
- Light weight
- Pre-formed tubes available
- Tested to select SAE J844, SAE J2044, and SAE J2045 liquid fuel assembly specifications

### Compliance

- SAE J2045, Section 4.2, Fitting Pull-Off for liquid fuel assemblies, at room temperature and at 250°F
- SAE J2045, Section 4.8, Burst Strength for liquid fuel assemblies, at room temperature and at 250°F
- SAE J2044, Section 7.5, Life Cycle Test for liquid fuel assemblies
- SAE J844, Section 9.13, Collapse Resistance, at 250°F

### Applications/Markets

- General diesel fuel applications

Part Number	Nominal Tube O.D.		Nominal Tube I.D.		Minimum Supported Bend Radius		Minimum Unsupported Bend Radius		Weight	
	inch	mm	inch	mm	inch	mm	inch	mm	lbs./ft.	kg./mtr
#

FLR-10	0.660	16.8	0.500	12.7	2.75	70	3.25	83	0.064	0.095

### Construction

Tube: High-temperature and chemical-resistant special polyamide

### Color

- Black

### Operating Parameters

Temperature Range:

Use in environments less than +239°F (+115°C)

Maximum Working Pressure: -7.2 psi to +72 psi (-0.50 bar to + 5 bar)

Do not exceed temperature and pressure ranges

### Note

- Factory-made assemblies only
- Colors available upon request

### Fittings

- Available SAE J2044 Quick Connect Fitting sizes include 3/8", 1/2", and 5/8"

- SAE J2044 Quick Connect Fittings available in 90° and 180° configurations.

J2044 Quick Connect Fittings available from Parker Hannifin Fluid System Connectors Division

For detailed ordering information, please consult price list or contact Parflex Division.

# BRAKCOIL®

## Features

- Tractor-to-trailer coiled nylon air-brake connections
- Maintenance-free performance - designed for trouble-free service on your rig
- Years of city delivery and line haul testing
- Heavy-duty plated spring guards are rust-resistant for added protection
- More coils offer you maximum working lengths
- No need for pogo sticks or spring hangers
- Color coding gives you mistake-free hook-ups – blue for service, red for emergency

## Certifications

- Meets or exceeds SAE J844 and D.O.T. FMVSS 106 Specifications at -70°F to +200°F

## Applications/Markets

- Tractor to Trailer

## Order Information

BRAKCOIL® kits are supplied complete – **Parker pre-assembled**, with everything needed, including spring guards and male pipe NTA brass fittings, **ready to install**. Special pipe thread sealant is factory applied. No cutting or assembly necessary. Just attach the gladhands (sold separately or pre-assembled). They are available in kits or as separate lines. A kit consists of both a red and blue tube assembly.

## Construction

Tube: Coiled Nylon Air Brake Tubing

## Operating Parameters

Temperature Range:  
-70°F (-57°C) to +200°F (93°C)

## Options

Extended BRAKCOIL® handle available, part no. 771164

Gladhands available

- BLU – Part # GH9211
- RED – Part # GH9212

For detailed ordering information, please consult price list or contact Parflex Division.

# Duo-Coil™ Features

## Features

- Duo-Coil combines both tractor-to-trailer lines (service and emergency) into a strong single unit
- Designed for quick hook-up and trouble-free service on your rig
- Reverse winding of the coiled air brake lines eliminates the possibility of tangling
- Installation swivel fittings make hook-up a snap
- The inner red emergency coil is wound inside the blue service coil offering added protection to the driver
- The single unit provides clean and neat installation

## Certifications

- Meets or exceeds SAE J844 and D.O.T. FMVSS 106 Specifications at -70°F to +200°F

## Applications/Markets

- Tractor to Trailer

# Fifth Wheel Slider Coil

## Features

- Clutter-free hook-up and maintenance-free performance of adjustable length pneumatic tubing for fifth wheel sliding action
- Self-adjusts from 10" to fully extended 74" working length
- Universal, ready for immediate installation
- No maintenance required - stays on the job at peak performance through years of trouble-free life
- Coil set is strong and permanent - Even after prolonged use in fully extended position, coils will retract to shorter length without sagging and eliminating hazards of chafing and wear

## Certifications

- Conforms to SAE Specification J844 Type A
- Meets D.O.T. FMVSS 106

## Applications/Markets

- Double Trailers
- Convert, Dollies

## Order Information

Fifth Wheel Slider Coil part# 811537 comes complete with fittings. Part# 811537-NF-BLK does not include fittings.

## Construction

Tube: 1/4" O.D. extruded Nylon, heat and light stabilized, single wall

## Operating Parameters

Temperature Range:  
-40°F (-40°C) to +200°F (93°C)

## Color

- SIL

## Options

Available with or without fittings

# Custom Harness, Bundles & Tubing

## Order Information

Several different harnesses may be required on a single unit depending upon the model of the vehicle, wheel base and options available. To determine your harness application needs:

- 1. Recognize the cost savings** available to you through the use of harnesses. How many dollars will be saved on tubing installation alone? On scrap reduction?
- 2. Call Parker.** Have one of our application engineers study your application.
- 3. Have Parker engineers design and build a prototype** harness for your approval.
- 4. Approve the prototype** as our basis to engineer your production model harness.
- 5. Implement the harness** into your Purchasing and Production systems – one harness, one part number instead of multiple part numbers you once had for each air brake line.

### Cut Tubes

Any tube offered by Parflex can be cut-to-length, with options for additional marking

### Formed Tubes

Tubes can be formed into shapes for ease of installation

### Jacketed Bundles

Two or more tubes can be bundled together with an extruded thermo-plastic jacket

## Features

- Preformed, pre-bundled tubing or hose custom designed to reduce installation time and improve throughput
- Your production line will run faster and be virtually free from tubing scrap
- Individual tubes are pre-cut and assembled into a single unit

## Certifications

- Designed and engineered to meet the exacting requirements of each bus or truck manufacturer for each vehicle
- The air brake tubing used in a Parflex Harness conforms to SAE J844 type 3A and 3B (all sizes) and also D.O.T. FMVSS 106 (Except sizes 2A, 3A and 5A)
- Parflex Division is third party certified for ISO 14001 and TS 16949
- 6mm Nylon, 5.5mm EPDM, and 4mm EPDM are IP6X, IPX8, and IPX9K Certified

## Tubing

### Construction

Tube: Nylon Air Brake Tubing

### Operating Parameters

Temperature Range: -40°F (-40°C) to +200°F (93°C)

Working Pressure: 150 psi (10.3 bar)

### Options

Each tube can be color-coded and/or numbered

Each harness may contain any number of tube sizes ranging from 1/8" O.D. to 3/4" O.D.

The harness can be supplied with special clamps, brackets and fittings to meet any need required by the customer

## Hose

Contact Parflex Customer Service for custom formed hoses and hose assemblies

### Straight Harnesses

Combine multiple cut tubes into a harness built specifically for your application

### Formed Harnesses

Combine multiple formed tubes to create a repeatable tubing routing solution

### Formed Assemblies

Most Parflex thermoplastic hoses can be formed into application specific shapes

For detailed ordering information, please consult price list or contact Parflex Division.

# SCR Hose Assemblies for Tier IV Compliance

## Features

- Thermoplastic and EPDM core tubes reinforced for strength and flexibility
- Stainless steel heating wire
- Extruded thermoplastic jacket
- Heated fittings
- Optional heat/abrasion shield
- 100% electrically tested, pressure tested, and cleaned before shipped

## Certifications

- TS 16949
- ISO 14001
- IP6X, IPX8, and IPX9K Certified (4mm EPDM, 5.5mm EPDM, and 6mm Nylon)

## Applications/Markets

**With Parflex Electrically Heated SCR Hose Assemblies, a cleaner exhaust system means a cleaner environment.**

Designed for heating and conveying DEF (Diesel Exhaust Fluid) throughout the SCR system on commercial vehicles. Parflex hoses are made to handle both on-road and off-road applications while helping you stay Tier IV and EPA 10 compliant. Combine these hoses with other high value Parflex fluid conveyance products (pilot lines, grease lines, hydraulic hoses, etc.) and customers can enjoy best in class durability and performance.

Unlike the competition's electrically heated hose, Parflex SCR hoses lock-in the heating elements with an extruded sheath for added protection and long-lasting uniform heating.

U.S. Patent No. 8,819,922  
Check [www.scrhose.com](http://www.scrhose.com) for product updates

- Protective Overmolding
  - Protection against water ingress and damage of electrical components
  - Bolsters fitting strength and impact resistance
- Thermoplastic and EPDM core tubes reinforced for strength and flexibility
- Stainless steel heating wire
- Extruded thermoplastic jacket
- Heated fittings
- Optional heat/abrasion shield
- 100% electrically tested, pressure tested, and cleaned before shipped

Core Tube Material	I.D.	O.D.	with heat/ abrasion shield (optional)	Maximum Operating Pressure		Minimum Burst Pressure		Vacuum Resistance		Bend Radius
	mm	mm		mm	psi	bar	psi	bar	inch	Hg/bar
EPDM	4	14.5	21	174	12	435	30	14.8	500	30
	5.5	14.5	21	174	12	435	30	14.8	500	40
Nylon	6	14	21	150	10	600	40	8.9	300	40

## Operating Parameters

EPDM Temperature Range: -40°F (-40°C) to +248°F (+120°C) with spikes to +266°F (+130°C)

EPDM 5.5 mm Pressure Range: 174 psi. (12 bar) with spikes to 232 psi (16 bar)

Nylon Pressure Line Temperature Range: -40°F (-40°C) to +248°F (+120°C) with spikes to +284°F(+140°C)

Nylon Suction/Throttle Line Temperature Range: -40°F (-40°C) to +158°F (+70°C) with spikes to +221°F(+105°C)

Available in 12VDC, 24VDC, and unheated

## Certifications

TS 16949

ISO 14001

IP6X, IPX8, and IPX9K Certified (4mm EPDM, 5.5mm EPDM, and 6mm Nylon)

## Notes

EPDM 7.5 mm and 12.3 mm core tubes are available on request in custom configurations.

Standard lengths available in 500 mm increments, ranging from 500 mm (0.5 m) O.A.L. through

6000 mm (6.0 m) in most configurations.

## CUSTOM OPTIONS AVAILABLE

SCR options include, but are not limited to:

- different electrical connectors, including options for heat and abrasion shield over lead wires;
- 1/4, 5/16, and 3/8 fittings; wide variety of lengths;
- 12V or 24V

Parflex also has designs for other sizes and core tubes for SCR hoses. These designs ensure that Parflex hoses can be utilized on SCR systems from multiple suppliers.

For detailed ordering information, please consult price list or contact Parflex Division.

# Parflex Fittings

## What's New?

In order to reduce the complexity for our customers, Parflex has converted 55, 58, 58H Series fittings to a new, CG Series fitting. The CG fittings will help customers reduce inventory and simplify ordering. Some of the CG Series fittings do require new crimp dies. For more details, contact Customer Service for a CG Conversion Bulletin.

We've continued the simplicity by converting the 57 Series into a 56 Series. This is a name change only. No new dies are required and there are no changes to the fitting dimensions.

## Parker Legacy Fitting Nomenclature

### Example: 10356-8-6

This example describes a permanent crimp 1/2" Male JIC 37° with a 3/8" I.D. hose size. This fitting is constructed of steel since the designated material is blank.

- 10356-8-6** – **Fitting Type** (1 = Permanent/Crimp)  
(2 = Field Attachable Fitting)
- 10356-8-6** – **End Configuration Code** (Male JIC 37°)
- 10356-8-6** – **Fitting Series** (Series 56)
- 10356-8-6** – **End Size** (1/2")
- 10356-8-6** – **Hose I.D.** (3/8")
- 10356-8-6C** – **Alternate Material**

Fitting part numbers that start with a "2" are field attachable fittings

### Legacy Fitting Material Selection

- Blank = Steel (unless otherwise noted)
- C = Stainless Steel
- S = All Carbon Steel – Used only with PTFE Fittings

## PAGE Fitting Nomenclature

### Example: 08-16SAN-S

This example describes a permanent sanitary flange step down, 1/2" I.D. hose with a 1" sanitary flange. This fitting is constructed of stainless steel since the designated material is -S.

As demonstrated below, the nomenclature associated with the PAGE fitting is not consistent with the traditional Parker products, as the end size and hose I.D. are reversed and located at the front of the part construction.

- 08-16SAN-S** – **Hose I.D.** (1/2")
- 08-16SAN-S** – **End Size** (1")
- 08-16SAN-S** – **End Configuration Code**  
(Sanitary Flange)
- 08-16SAN-S** – **Alternate Material**

### PAGE Fitting Material Selection

- C = Carbon Steel
- S = Stainless Steel

**NOTE:** The PAGE fittings, which are designed for use with traditional PAGE fluoropolymer hoses only, are a two piece crimp connection and need to be combined with the corresponding crimp collars located on page E-46.

	<b>TUBE</b> A-Lok® Male Stand pipe Rigid "V" Notch  E-50	PAGE fittings require a PAGE collar. See pg. E-46.			

## NOTE:

The PAGE fitting call-out does not follow traditional Parker fitting nomenclature. The end size and hose size are reversed.

Length calculations for PAGE hose assemblies are typically made sealing surface to sealing surface per the NAHAD Fluoropolymer Hose Assembly Specification Guidelines unless otherwise requested by customer at time of order.

## MiniKrimp™ Hand Pump Model Part No. 94C-001-PFD

The Parker Hannifin MiniKrimp is the best portable crimper on the market. By utilizing a one-piece, high-strength cast aluminum frame, the MiniKrimp is light, robust and highly corrosion resistant.

For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

### Features

- Lightweight, portable, compact all-in-one unit
- Unit with pump weighs only 42 pounds
- 10,000 psi and 30+ tons of force
- No gauges to set - exclusive Parkalign™ feature positions the fitting correctly every time
- Removable pusher design for easy die change
- Hand pump easily removed for use with jumper hose for bench-mounted units (Part No.- 015309)
- No additional power source required for operation
- Capable of crimping a majority of thermoplastic, rubber, PTFE and specialty hoses up to 3/4" I.D.

### Specifications

- Dimensions: 6" Deep, 13" Wide, 15" High
- Weight: 42 lbs with hand pump
- Rating: 30 tons force @ 10,000 psi maximum
- Full Cycle Time: Approximately 30 seconds

### Standard Equipment

Part Number		Description	Individual
94C-001-PFD	94C-002 -PFD		Part Number
●	●	Base unit	94C-080-PFD

	●	Air over hydraulic pump kit with tubing and adapters	025399
●	●	Silver die ring	82C-R01-PFD

## MiniKrimp™ Air Over Hydraulic Model Part No. 94C-002-PFD

### Part No. 94C-002-PFD

The Parker Hannifin MiniKrimp is the best portable crimper on the market. By utilizing a one-piece, high-strength cast aluminum frame, the MiniKrimp is light, robust and highly corrosion resistant.

For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

### Features

- Lightweight, portable, compact all-in-one unit
- Unit with pump weighs only 45 pounds
- 10,000 psi and 30+ tons of force
- No gauges to set - exclusive Parkalign™ feature positions the fitting correctly every time
- Removable pusher design for easy die change
- Air pump utilizes a rugged activation and release lever for greater durability
- Can operate with as little as 60 psi air pressure (60-100 psi, 9 CFM recommended)
- Capable of crimping a majority of thermoplastic, rubber, PTFE and specialty hoses up to 3/4" I.D.

### Specifications

- Dimensions: 6" Deep, 12" Wide, 15" High
- Weight: 45 lbs with air/hydraulic pump
- Rating: 30 tons force @ 10,000 psi maximum
- Full Cycle Time: Approximately 30 seconds

### Operating Parameters

Reference Crimpsource™ online or appropriate catalog (4660 or 4400) of the Parker division that supplies the hose for detailed crimp specifications as exceptions do occur based on the particular hose type, size, and fitting material.  
[www.parker.com/crimpsource](http://www.parker.com/crimpsource)

For detailed ordering information, please consult price list or contact Parflex Division.

# MiniKrimp™ Crimping Machine Accessories

## Upright Vise Mount

Part No. 015307

- Material - High Strength Steel
- Mount connects to the bottom of the MiniKrimp using (4) 3/8-16 18-8 SS SHCS 2.5" long bolts (not included)
- Once connected, the Minikrimp can be clamped into a vise for operation

## Side Vise Mount

Part No. 015736

- Manufactured from high strength steel
- Mount connects to the side of the MiniKrimp using four 1/4"-20 18-8 SS SHCS, 1" long bolts (not included)
- Once connected, MiniKrimp can be clamped into a vise for operation

## Table Mount

Part No. 015306

- Material - High Strength Steel
- Mount connects to the bottom of the MiniKrimp using (4) 3/8-16 18-8 SS SHCS 2.5" long bolts (not included)
- Once connected, the Minikrimp can be mounted to a table using the (4) 3/8" clearance holes on the opposite side of the plate (bolts not included)

## High Pressure Hose Assembly

Part No. 015309

- Parker 10,000 psi, 1/4" I.D. hose with 3/8" female JIC connections on both ends (PN HP0606060604-72")
- Hose is used when a flexible connection is required between the MiniKrimp and a hydraulic pressure source

## Replacement Connector

Part No. 015308

- Replacement stainless-steel bent tube rigid connector
- For use with 94C-001-PFD (MiniKrimp Hand Pump Model)

## Replacement Connector

Part No. 025349

- Replacement stainless-steel bent tube rigid connector
- For use with 94C-002-PFD (MiniKrimp Air Over Hydraulic Model)

**Note:** The hydraulic connectors shown on this page are designed exclusively for use with the MiniKrimp. No other connectors are approved for use with the MiniKrimp without expressed written consent from Parker Parflex Division's technical support. Any worn connectors should be replaced immediately.

For detailed ordering information, please consult price list or contact Parflex Division.

## High Pressure Hose Assembly

Part No. 045234

- Parker 10,000 psi, 1/4" ID hose assembly with 3000 series quick disconnects (PN - HP0101060404-36" with 3050-2/3010-2 coupler and nipple)
- Hose is designed to be used when mounting a hand pump (015301) to the MiniKrimp stand (94C-MKS) base

## Folding Stand

Part No. 94C-MKS

(See pictures below for configuration examples)

- Lightweight folding stand designed exclusively for the MiniKrimp portable crimper
- Fold up design is easy to store
- Mounting hardware and safety instructions are included
- Patented design

## Karrykrimp

Part No. 82C-061L-PFD

The Karrykrimp is now available in a modular design with all the familiar Parkrimp System advantages.

The same unit now offers portability and bench mountability.

### Capability

- Crimps most hoses up to 1-1/4 I.D. (check crimpsource for details)

### Features

- Portable, compact rugged design
- Numerous portable power unit options available
- Pivoting pusher design for easy die change out
- Increased height enables longer bent tube fittings to be crimped
- For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

### Specifications

- Dimensions: 15" wide, 12" deep, 30" high
- Weight: 60 lbs (without power unit)
- Rating: 30 ton force @ 10,000 psi maximum
- Full Cycle Time: 30 seconds

## Karrykrimp Bench Mount

Part No. 82C-KKB-PFD

View Video Tutorial

### Capability

- Crimps most hoses up to 1-1/4 I.D. (check crimpsource for details)

### Features

- Faster cycle times on bench mounted units
- Pivoting pusher design for easy die change out
- Compact bench mount design
- Increased height enables longer bent tube fittings to be crimped
- For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

### Specifications

- Dimensions: 17" wide, 23" deep, 27-1/2" high
- Weight: 146 lbs
- Rating: 30 ton force @ 10,000 psi maximum
- Full Cycle Time: 11 seconds
- Hydraulic Fluid: AW32 oil

This unit is designed to make about 400 crimps per day and is not designed to be a production crimper. Exceeding these suggested production amounts will significantly reduce the life expectancy of the crimper components.

Note:

Motor is dual voltage, 50/60hz suitable for 208-230/115v, 1ph, 60hz and 220-230/110v, 1ph, 50hz. Motor can be rewired by a qualified electrician to operate at alternate voltage.

## Karrykrimp 2

Part No. 85C-061L-PFD

The Karrykrimp 2 is now available in a modular design with all the familiar Parkrimp System advantages.

The same unit now offers portability and bench mountability.

### Capability

- Crimps most hoses up to 1-1/4 I.D. (check crimpsource for detail)

### Features

- Portable, compact rugged design
- Numerous portable power unit options available
- Pivoting pusher design for easy die change out
- For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

### Specifications

- Dimensions: 14" wide, 14" deep, 31-1/2" high
- Weight: 120 lbs (without power unit)
- Rating: 60 ton force @ 10,000 psi maximum
- Full Cycle Time: 20 seconds

### Standard Equipment

Part Number			Description	Individual
85C-CHD-PFD	85C-061L-PFD	85C-KKB-PFD		Part Number

		●	Bench Power Unit Assembly	85C-1PH-PFD
●	●	●	Silver die ring	85C-R01-PFD
●	●	●	Black die ring	85C-R02-PFD
	●		Hose Assembly	85C-00L-PFD
	●		Stand Assembly	85C-STD-PFD

## Karrykrimp 2 Bench Mount

Part No. 85C-KKB-PFD

View Video Tutorial

### Capability

- Crimps most hoses up to 1-1/4 I.D. (check crimpsource for detail)

### Features

- Faster cycle times on bench mounted units
- Pivoting pusher design for easy die change out
- Compact bench mount design
- For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

### Specifications

- Dimensions: 17" wide, 23" deep, 28" high
- Weight: 208 lbs
- Rating: 60 ton force @ 10,000 psi maximum
- Full Cycle Time: 17 seconds
- Hydraulic Fluid: AW32 oil

This unit is designed to make about 400 crimps per day and is not designed to be a production crimper. Exceeding these suggested production amounts will significantly reduce the life expectancy of the crimper components.

Note:

Motor is dual voltage, 50/60hz suitable for 208-230/115v, 1ph, 60hz and 220-230/110v, ph, 50hz. Motor can be rewired by a qualified electrician to operate at alternate voltage.

# Parkrimp 2

Part No. 83C-081-PFD

View video tutorial

## Capability

- Crimps hoses up to 2" I.D.  
(reference crimp source for details)

## Features

- Easy to use vertical design
- Crimps full range of Parker hoses from 1/8" through 2" I.D.
- For use with 54, 56, 91, 91N, 92, 93N, CG, CY, MS, SF and HY Series fittings

## Specifications

- Dimensions: 31" wide, 24" deep, 77" high
- Weight: 842 lbs (Head is 558 lbs and base is 284 lbs)
- Rating: 125 ton force @ 5,000 psi maximum
- Full Cycle Time: 30 seconds without adapter bowl  
20 seconds with adapter bowl
- Hydraulic oil: Enerpac oil only

### Standard Equipment

Part Number				Description	Individual
83C-001-PFD	83C-081-PFD	83C-002-PFD	83C-082-PFD		Part Number

# Crimper Pumps

## Air/Hydraulic Pump Part No. 82C-0AP-PFD

(for use with the MiniKrimp, Karrykrimp and Karrykrimp 2)

Lightweight pump operates with 80-110 psi shop air pressure and delivers 10,000 psi

- Length: 15"
- Width: 6"
- Height: 6"
- Intake Port Size: 1/4" NPTF
- Output Port Size: 3/8" NPTF
- Weight: 14 lbs
- Hydraulic Fluid: Enerpac oil only

## Air/Hydraulic Pump Part No. 025399

(for use with the MiniKrimp)

Lightweight pump operates with 80-110 psi shop air pressure and delivers 10,000 psi

- Length: 13"
- Width: 4-1/2"
- Height: 5"
- Intake Port Size: 1/4" NPTF
- Output Port Size: 1/8" NPTF
- Weight: 12 lbs.
- Hydraulic Fluid: Enerpac oil only

## Hand Pump Part No. 015301

(for use with the MiniKrimp)

Ease of operation hand pump delivers 10,000 psi

- Length: 13-3/8"
- Width: 3-1/4"
- Height: 3-5/8"
- Port Size: 1/4" NPTF
- Weight: 4.7 lbs.
- Hydraulic Fluid: Enerpac oil only

# Swagers

## SQ-101-SW Swager/Mender

- Used for field assembly or repair on Predator S6 and S9 hoses

For detailed ordering information, please consult price list or contact Parflex Division.

## Hand Pump

Part No. 82C-0HP-PFD

(for use with the MiniKrimp, Karrykrimp and Karrykrimp 2)  
Ease of operation hand pump delivers 10,000 psi

- Length: 13-3/8"
- Width: 3-1/4"
- Height: 3-5/8"
- Port Size: 1/4" NPTF
- Weight: 4.7 lbs.
- Hydraulic Fluid: Enerpac oil only

## Hand Pump

Part No. 85C-0HP-PFD

(for use with the MiniKrimp, Karrykrimp and Karrykrimp 2)  
Ease of operation hand pump delivers 10,000 psi

- Length: 29"
- Width: 13"
- Height: 11"
- Port Size: 3/8" NPTF
- Weight: 61 lbs
- Hydraulic Fluid: Enerpac oil only

## Electric Pump

Part No. 82C-0EP-PFD

(for use with the MiniKrimp, Karrykrimp and Karrykrimp 2)  
Ease of operation electric pump delivers 10,000 psi

- Length: 13"
- Width: 13"
- Height: 15"
- Port Size: 3/8" NPTF
- Weight: 31 lbs
- Hydraulic Fluid: Enerpac oil only
- 115 volt, 1 phase, 50/60 Hz, 9 amp

## Electric Pump

Part No. 85C-0EP-PFD

(for use with the MiniKrimp, Karrykrimp and Karrykrimp 2)  
Heavy duty electric pump delivers 10,000 psi at a faster cycle time

- Length: 19"
- Width: 11"
- Height: 17"
- Port Size: 3/8" NPTF
- Weight: 59 lbs
- Hydraulic Fluid: Enerpac oil only
- 115 volt, 1 phase, 50/60 Hz, 20 amp

## Vise Blocks

For Parflex Hose Sizes

Part Number	Hose Size	
VBS	-3	3/16
	-4	1/4
	-5	5/16
	-6	3/8
	-8	1/2
VBL	-12	3/4
	-16	1

## Hose Insertion Depth Blocks

Part No. TH9-1-xxx

Part No. TH8-1-xxx

Part Number	Description
TH9-1-CG	CG Series. All sizes.
TH9-1-56	56 Series. All sizes.
TH9-1-54A	54 Series All sizes.
TH9-1-91N	91N Series. All sizes.
TH9-1-93N_20-32	93N Series. Sizes: -20, -24, -32
TH9-1-93N_6-16	93N Series. Sizes: -6, -12, -16
TH9-1-94_95	94 & 95 Series. All sizes.
TH9-1-CY_SF	CY & SF Series. All sizes.
TH9-1-MS	MS Series. All sizes.
TH9-1-HY	HY Series. All sizes.

# Parflex Parkrimp Dies

Parkrimp dies, specifically engineered for thermoplastic and fluoropolymer hose:

- Linked die segments
- Pre-matched and assembled
- Fitting size color coded

Color Code	
Size	Color
-1.5	GR
-2	BR
-3	GR
-4	R
-5	P

Color Code	
Size	Color
-6	Y

Parkrimp Approved Silver Die Rings	
Machine	Approved Die
Parkrimp 2	NA*
Karrykrimp and MiniKrimp	82C-R01-PFD
Karrykrimp 2	85C-R01-PFD

\*No additional silver die rings required.

**Note:** 1) Parflex dies have been designed for use with the silver die ring. Silver die rings are to be used with all Parflex hoses unless otherwise specified.

2) For most Parker products, Crimp Die information and selection charts can be found online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource). Access instructions are on pg. G-13.

## Die Racks

### Die Storage Rack

Part No. 80C-0DR-PFD/83C-0DR-PFD

- Holds small and large Parkrimp dies
- Can be bolted together to a work bench

Description	Part No.
Storage 3 small dies	80C-0DR-PFD
Storage 2 large dies	83C-0DR-PFD

### Swivel Die Rack

Part No. 80C-SDR-XXXX-PFD

- Holds up to 30 Parkrimp dies
- Powder coated, heavy duty steel construction
- Consist of base unit and up to 5 circular holders
- Floor or bench mounted

Description	Part No.
Swivel Die Rack and Small Die Holder	80C-SDR-SM-PFD
Swivel Die Rack and Large Die Holder	80C-SDR-LG-PFD
Swivel Die Rack Base	80C-SDR-BASE-PFD

For detailed ordering information, please consult price list or contact Parflex Division.

# Conversion Kits

## Hydraulic Press Kit

### Specifications

- Required Height from Press Base to Press Ram: 10 inches
- Required Width of Bowl Diameter: 5 inches
- Bowl Rating: 30 tons force maximum
- Minimum Required Press Capacity: Hose Size 1/4" to 1/2" needs a 20 ton press  
Hose size 5/8" to 1-1/4" needs a 30 ton press

### Standard Equipment

Each component must be ordered separately		Individual
Description	Part Number	
Bowl Assembly	8PC-030-PFD	
Pusher	8PC-00P-PFD	
Silver Die Ring	81C-R01-PFD	
Black Die Ring	81C-R02-PFD	

## Weatherhead Conversion Kit

Weatherhead T-400 crimper to utilize Parker Parkrimp No-Skive fittings.

### Standard Equipment

Each component must be ordered separately		Individual
Description	Part Number	
Bowl Assembly	8PC-030-PFD	
Pusher	8WC-00P-PFD	
Silver Die Ring	81C-R01-PFD	
Black Die Ring	81C-R02-PFD	

## Gates Conversion Kit

Convert Gates 701, 703 and 707 bottom loading crimpers to utilize Parker Parkrimp No-Skive fittings.

### Standard Equipment

Each component must be ordered separately		Individual
Description	Part Number	
Bowl Assembly	8PC-030-PFD	
Silver Die Ring	81C-R01-PFD	
Black Die Ring	81C-R02-PFD	

# Cutting Tools

## Hose Cut-Off Machine Part No. 332T-115V-PFD

### Features

- For quick, easy cutting of reinforced hose up to 1-1/4" I.D.
- Moving parts shielded by guards

### Specifications

- Dimensions: 13" wide x 26" long x 22" high
- Shipping Weight: 71 lbs.

### Standard Equipment

Part Number	Description	Individual Part Number
332T-115V-PFD		
●	Hose Cut-Off Machine with 1-1/2 HP, 3450 RPM, 115/230V single phase electric motor wired for 115V	
●	Scallop Cutting Blade (8" with 5/8" arbor size)	24398-PFD

### Optional Equipment

Smooth Cutting Blade (580661-PFD)

## Push-Lok Cut-Off & Assembly Tool Part No. 881540-PFD

- Combines hose cutter and toggle action press
- Cuts and assembles Parker 83FR in sizes 1/4" through 3/4" I.D.

## Hose & Tubing Cutter Part No. HTC

- Special V-block design with easy adjustable blade ensures a straight, clean cut
- Minimal flattening of hose/tubing during cutting - Straight, square cut enhances fitting retention
- Cuts up to 1" O.D. hose or tubing (Non-wire reinforced thermoplastic hose and tubing and rubber hose and tubing)
- Replacement blades: HTC-RB

## Hose Cut-Off Tool Part No. TH11-1-PFD

- Designed for quick, easy cutting of textile reinforced hose
- Squarely cuts fiber reinforced hoses in sizes 1/4" through 3/4" I.D.

## Plastic Tube Cutter Part No. PTC

- Razor-edged tube cutter
- Closes automatically, assuring clean and square cuts
- May be used with most plastic tubing up to 5/8" I.D.

### Description

### Part Number

Replacement Blades..... PTC-001-RB

For detailed ordering information, please consult price list or contact Parflex Division.

# Hose Guards

Parker hose guards prolong the life of hoses that are exposed to rugged operating conditions. In addition to protecting the hose from abrasion and cutting, they limit the bending radius which prevents kinking.

## PV - Clear Vinyl Hose Guard

## HBR - Hose Bend Restrictor (Black Elastomer)

Part Number	Guard I.D.		Standard Length	
	inch	mm	feet	mtr.
#	⊙			
PV97-1	0.44	11	100	30.5
PV139-1	0.56	14	100	30.5
PV1611-1	0.68	17	100	30.5
PV2014-1	0.87	22	50	15.2
PV2420-1	1.25	32	50	15.2
PV3224-1	1.50	38	50	15.2

Part Number	Hose Size	L		D1		D2	
		inch	mm	inch	mm	inch	mm
#	⊙						
HBR-4	1/4	6	5	127	.600	15	.500
HBR-6	3/8	10	6	152	.640	16	.625

Parker reserves the right to change dimensions and performance parameters without notice.

## 5CNG/CNGLT - Black Vinyl CNG Hose Guard

Hose Part Number	Hose Guard Part Number
#	#
5CNG-3	CNGG5-3
5CNG-4	CNGG5-4
5CNG-6	HBR-6
5CNG-8	CNGG5-8
5CNG/CNGLT-12	CNGG5-12
5CNG/CNGLT-16	CNGG5-16

- Use with Parflex CNG hose
- Contact Parflex Division for information on Hose Guard Kits.

# Metallic Spring Guards

Use Spring Guards for protection from abrasion and extreme physical abuse.

## SSG & PSG - Pre-made Spring Guards

Plated, hard-drawn steel wire

Part Number	Hose O.D. (reference)		Standard Length	
	inch	mm	inch	mm
#	⊙			
55SSG-3	0.44	11	6	152

Partek sleeves come in yellow and black.  
All internal guards are fabricated from 300 series stainless steel.  
All external guards are plated steel.

For detailed ordering information, please consult price list or contact Parflex Division.

# PSG – Parker Spiral Guard

## Features

- High-strength and resilient, Spiral Guard protects hose and cable with superior anti-crush performance
- Exceptionally smooth facing and rounded edges prevent Spiral Guard from getting caught on rough surfaces
- Easy installation and routing
- Low friction interior minimizes wear on hose
- For bundling, organizing and protecting hose and cable, Parflex Spiral Guard is the superior solution for mining operations - In fact, it delivers more advantages than cut pipe or sleeving at a competitive price or less
- Spiral Guard is available in:
  - An MSHA/FRAS approved version for underground mining
  - A standard version (with yellow stripe) for surface applications not requiring fire-resistant, anti-static properties
- Manufactured with high density polyethylene materials

## Applications

- Mining
- Automotive
- Mobile Equipment

For detailed ordering information, please consult price list or contact Parflex Division.

# SplashShield™ Protective Cover

## Double Your Protection

### Features

- Exemplary abrasion resistance
- Protects hose from external hot hydraulic oil
- Easy to clean vs. other protective covers
- Does not slide down
- Multiple sleeves may be linked together to use on longer assemblies
- Lightweight
- Special colors available for color coding

### Applications/Markets

- Agricultural Equipment
- Construction Equipment
- General Mobile Applications

Part Number #	Nominal I.D.		Nominal Wall		Nominal O.D.		Weight		Nominal Cut Length

### How To Choose A Liner

1. Establish the maximum outside diameter of the hose or bundle.
2. Add 1/16" clearance over the established maximum O.D.  
  
i.e. Maximum O.D. = .696  
add 1/16th .062  
Total .758
3. Refer to the I.D. column on the SplashShield™ table. Find the next size larger than the established O.D.

In this case, the correct part number would be 900911-04, with a nominal .860 I.D.

Although 900911-20 clears the maximum O.D. of the hose, it doesn't allow enough space for clearance over the entire length of the hose.

### Construction

Manufactured from a unique, high-durometer, proprietary blended material

### Operating Parameters

Use in environments less than +250°F (+121°C)

### Color

- Black

### Note

- Special colors available upon request
- Multiple sleeves may be linked together to use on longer assemblies

## Hose Assembly Tutorial

### Crimping

**Steps for crimping** are clearly marked with sequences showing product distinctions between products lines.

- Crimping section, as well as universal preparations, for all hoses appear first. The global 56 series fitting assembly instructions are segmented on pages G:14-G:19. Instructions have also been added for the new CG series fittings pages G:20-G:25.
- Field Attachable assemblies appear next

### Twin/Multi-Line Hose

Review **twin/multi-line hose separation**, pg. G-40 if applicable – this will give you information before proceeding to the assembly pages – Not following this procedure may cause permanent damage to hoses.

\*The PARKRIMP crimping system is the same for all standard Parker portable or bench style crimpers.

Please note: You must become familiar with your own specific crimper to determine its operational features. Please review thoroughly and understand your operator's manual included with your machine. Never use a crimper beyond its recommended published capacities. Crimp specifications are found online by accessing Crimp Source. [www.parker.com/crimpsource](http://www.parker.com/crimpsource)

# Selection of Hose Diameter

## Flow Capacities at Recommended Flow Velocities

The nomogram below is provided as an aid in determining the correct hose size.

How to use the nomogram: Determine the proper flow rate your system requires, then connect a straight edge from the selected flow rate to the recommended velocity range. The required hose I.D. will appear at the intersection of the straight edge and the center column. If the straight edge passes through the scale between sizes listed, use the next larger I.D. hose.

Example: Locate 16 gallons per minute in the

left-hand column and 20 feet per second (fps) in the right-hand column (the maximum recommended velocity range for pressure lines). Lay a straight edge across these two points. The inside diameter required is shown in the center column at or above the straight edge. In this case, we need a hose I.D. of 0.625 (5/8") inch (or larger).

Use the same procedure for suction of return lines, except utilizing their respective maximum recommend velocities.

**The nomogram is based on the following formula:**

$$D = \sqrt{\frac{Q \times 0.4081}{V}}$$

Where: Q = Flow in Gallons per Minute (gpm)  
 V = Velocity in Feet per Second (ft/sec)  
 D = Hose Inside Diameter (inches)

For detailed ordering information, please consult price list or contact Parflex Division.

# Calculation of Hose Length For Over-the-Sheave Applications

The exact cutoff length for an optimum over-the-sheave assembly depends on the particular mechanical arrangement of the machine. A method for finding an approximate starting point is as follows:

1. Assemble hose with one coupling as shown in diagram.
2. Measure hose length from point 1 to point 2 with hose taut. LO = length
3. Calculation of insert allowance (x) may be found from the coupling dimension tabulations in the fittings section or from direct measurement on the coupling. A 1.5% stretch allowance is provided in the following formula.
4. Calculate hose cutoff hose cut length HCL:  

$$HCL = 0.985 LO + 2X$$
 Where HCL includes coupling, insert allowance on both ends.
5. Couple the remaining hose end, check crimp, and assemble on the machine.

# Hose Permeation Data (510A)

## Permeation Rate at 120°F (Pound per Linear Hose Foot per Year)

Hose Size	R12	R22	R507	R404A	R502	R134A
-2	-	.28	-	-	.03	-
-3	-	.30	.08	.07	-	-
-4	-	.71	.15	.10	-	-
-6	-	1.11	-	-	.87	-

## Permeation Rate at 212°F (Pound per Linear Hose Foot per Year)

Hose Size	R12	R22	R507	R404A	R502	R134A
-2	-	-	-	-	-	-
-3	-	1.25	-	-	-	-
-4	.08	2.32	-	-	-	.07
-6	-	-	-	-	-	-

### Notes:

1. Data is for comparison only. Actual results may vary due to differences in application temperature and pressure.
2. Data is collected in highly controlled tests per UL1963.
3. Parker Safety Guide for Selecting and Using Hose, Tubing, Fittings and Related Accessories, Section 2.6:

Permeation: Permeation (that is, seepage through the Hose) will occur from inside the Hose to outside when Hose is used with gases, liquid and gas fuels, and refrigerants (including but not limited to such materials as helium, diesel fuel, gasoline, natural gas, or LPG). This permeation may result in high concentrations of vapors which are potentially flammable, explosive, or toxic, and in loss of fluid. Dangerous explosions, fires, and other hazards can result when using the wrong Hose for such applications.

The system designer must take into account the fact that this permeation will take place and must not use Hose if this permeation could be hazardous. The system designer must take into account all legal, government, insurance, or any other special regulations which govern the use of fuels and refrigerants. Never use a Hose even though the fluid compatibility is acceptable without considering the potential hazardous effects that can result from permeation through the Hose Assembly.

Permeation of moisture from outside the Hose to inside the Hose will also occur in Hose assemblies, regardless of internal pressure. If this moisture permeation would have detrimental effects (particularly, but not limited to refrigeration and air conditioning systems), incorporation of sufficient drying capacity in the system or other appropriate system safeguards should be selected and used.

For detailed ordering information, please consult price list or contact Parflex Division.

# Volumetric Expansion of Hose

Hydraulic hoses expand under pressure. On some applications, customers can use the differences in expansion between hoses to tune systems for better performance or even noise reduction. Parflex has tested a select list of hoses and determined the rate of expansion in cubic centimeters per foot of hose (cc/ft).

To calculate the volumetric expansion of a hose, substitute the desired pressure into the "X" values in the appropriate equation. For other hoses, please contact the division.

Hose Part Number	Volumetric Expansion at Maximum Working Pressure		Equation for Volumetric Expansion
	(psi)	(cc/ft)	Y=(cc/ft) X=(psi)
510C-3	3250	2.33	Y=0.0007X+0.0581

D6R04 / D6RX04	3000	2.71	Y = 0.0009x + 0.0059
D6R05	3000	1.28	Y = 0.0003x + 0.3834
D6R06 / D6RX06	3000	1.28	Y = 0.0003x + 0.3834
D6R08 / D6RX08	3000	2.88	Y = 0.00057x + 1.20744
D6R10	3000	2.08	Y = 0.00061x + 0.23127
D6R12	3000	5.53	Y = 0.00142x + 1.21743
D6R16	3000	7.33	Y = 0.00205x + 1.24905
H604	3000	1.80	Y = 0.00044x + 0.51607
H605	3000	1.35	Y = 0.00036x + 0.26536
H606	3000	2.00	Y = 0.0006x + 0.2892
H608	3000	2.88	Y = 0.00057x + 1.20744
H610	3000	2.08	Y = 0.00061x + 0.23127
H612	3000	5.53	Y = 0.00142x + 1.21743

Example: Find the volumetric expansion of 560-8 hose at 2000 psi

-From the chart, the appropriate equation would be:  $Y=0.0007x + 0.2093$

-Substituting:  $Y=0.0007 * (2000) + 0.2093$

-Therefore the volumetric expansion "Y" equals 1.60 cc/ft @ 2000 psi

The actual volumetric expansion achieved is influenced by multiple variables including fluid properties, hose routing and application temperature. The volumetric expansion calculation is only a general guideline and must be verified by actual testing in the end-use application. No performance warranty in design is expressed or implied by this calculation. Parker recommends that the user review and understand all the precautions listed in the Parker Safety Guide for Selecting and Using Hose, Fittings and Accessories, bulletin BUL. 4400-b.1.

For detailed ordering information, please consult price list or contact Parflex Division.

# Pressure Rating of Hose End Connections

The maximum dynamic working pressure of the hose assembly is the lesser of the rated working pressure of the hose and the end connections used.

PRESSURE RATINGS HOSE ASSEMBLIES - psi (MPa)

### PRESSURE RATING OF HOSE - psi (MPa)

THE MAXIMUM WORKING PRESSURES OF HOSES ARE LISTED ON PAGE A-10 : A-17 WITH EACH HOSE DESCRIPTION IN SECTION A.

# Selection, Installation & Maintenance

## Recommended Practices for Hydraulic Hose Assemblies

**wrong**

The routing of the hose assembly and the environment in which the hose assembly operates directly influence the service life of the hose assembly. The following diagrams indicate the correct routing of hose assemblies that will maximize its service life and assure a safe working functionality.

When hose installation is straight, there must be enough slack in the hose to allow for changes in length that occur when pressure is applied. When pressurized, hose that is too short may pull loose from its hose fittings or stress the hose fitting connections, causing premature metallic or seal failures.

The hose length must be determined so that the hose assembly has enough slack to allow the system components to move or vibrate without creating tension in the hose.

However, do not allow too much slack and therefore introduce the risk of the hose snagging on other equipment or rubbing on other components.

Mechanical straining of the hoses needs to be avoided, so the hose must not be bent below its minimum bend radius or twisted during installation. The minimum bending radii for each hose is stated in the hose tables in the catalogue.

The plane of movement must also be considered and the hose routing selected accordingly.

Hose routing also plays an important role on the selection of the hose fittings, as the correct fittings can avoid straining the hoses, unnecessary hose length or multiple threaded joints.

**right**

# Selection, Installation & Maintenance (cont.)

## Recommended Practices for Hydraulic Hose Assemblies

wrong

Correct clamping (holding/supporting) of the hose should be exercised to securely route the hose or to avoid the hose contacting surfaces that will cause the hose damage. It is however, vital that the hose be allowed to keep its functionality as a “flexible-pipe” and not be restricted from changing in length when under pressure.

It should also be noted that hoses for high- and low-pressure lines shall not be crossed or clamped together, as the difference in changes in length could wear the hose covers.

Hose should not be bent in more than one plane. If hose follows a compound bend, it shall be coupled into separate segments or clamped into segments that each flex in only one plane.

Hoses should be kept away from hot parts as high ambient temperatures shorten hose life. Protective insulation may need to be used in unusually high ambient temperature areas.

While the importance of the functionality is primary, the aesthetics and practicality of the installation should also be considered in the design.

Maintenance might be necessary at some point in the future, so prohibitive design routings should be avoided.

right

**wrong**

**Abrasive influences**

In general care should be taken so that the hose is not exposed to direct surface contact that will cause abrasive wearing of the outer cover (either hose to object or hose to hose contact). If however, the application is such that this cannot be avoided, either a hose with a higher abrasion resistant hose cover or a protective sleeve need to be used.

**right**

# Hose Assembly and Crimping

## How To Use Crimpsource

1

### Data

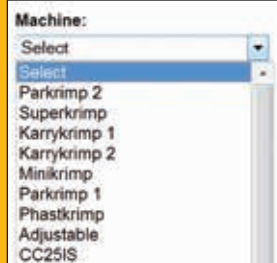

The most **up-to-date** information for crimping is located at [www.parker.com/crimpsource](http://www.parker.com/crimpsource). Not only is it accurate, but it is easy.

NOTE: If the hose does not come up, then you cannot crimp that hose on the machine you selected.

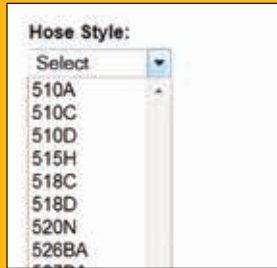

If the fitting you choose doesn't come up, then that series is not available for that hose. Same with size.

2

### Make your Selections

Choose the correct machine.

Choose the hose you are crimping.

**Note** If the hose does not come up, then the crimper chosen does not work with the selected hose.

3

### Make your Selections

Choose the fitting style.

Choose the fittings size. Once you have selected values from each field, hit the search button.

**Note** If the chosen fitting/size doesn't come up, the series/size is not available for that hose.

4

### Review The Results

# Hose Assembly and Crimping

## Permanent Crimp Series 56

CAUTION: There are several different sections for Hose Assembly and Crimping. Be sure you are in the section that corresponds to the fitting series you are using. See Table of Contents for listing.

1

### Inspection

**Hose** – Visually inspect both ends of hose for square cut. Remove any burrs, loose fibers or wires.

**Fittings** – Verify fitting series corresponds to the selected hose. Visually inspect fitting(s) for a through-hole, threads and damage.

2

### Assembly Prep

**Insertion Depth** – Shown is a 56 series fitting. Using Parflex Depth Insertion Block (part# TH9-1-56), mark the hose with the proper insertion depth line. On some fittings such as 56 Series, this depth is represented by a dashed or knurled line on the crimp shell.

**Lubrication (as required)** – Using an SAE 20 weight lubricating oil, lightly lubricate inside of hose end.

### Warning

Do not use lubricating oil when installing fittings on hose used in oxygen service. When installing fittings on hose used in oxygen service, lubricate with a non-oil based soap solution. Failure to do so may result in an explosion and personal injury when hose is used.

3

### Assembly

**Assemble hose** – Push hose into fitting all the way to depth insertion mark. (If fitting does not readily slide onto hose, perform the next step.)

Using Parker VBS or VBL (vise blocks) and a rubber mallet, tap fitting onto hose until bottom of fitting shell is aligned with depth insertion mark.

# Hose Assembly and Crimping

## Permanent Crimp Series 56

4

### Die Selection

Select proper Parkrimp die set. (Reference Crimp Die Selection on Crimpsource online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource))

5

### Lubricate Bowl

Grease frequently using a premium, quality, lithium-base grease. Apply a thin layer of grease on bowl of crimper base plate.

6

### Die & Spacer Ring

**Crimp Die** – Place die set into bowl.

**Die Ring** – Place applicable die ring on top of die. Position ring so it is centered on die.

(Reference Crimp Die Selection on Crimpsource online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource))

7

### Crimp

**Assemble hose** – Insert hose and fitting from bottom of crimper and up through die set. Position fitting so bottom of fitting skirt rests on die step (PARKALIGN® feature).

While holding hose and fitting in position on die step, crimp fitting onto hose until die ring contacts base plate.

#### Warning

Keep fingers and hands away from die-pusher area. Failure to do so may result in personal injury.

#### Note

Pump on crimper must not exceed the rated pressure of the crimper being used. Parker Hannifin will not accept responsibility for the operation of or provide warranty coverage for a crimper that is operated by a power unit other than equipment supplied by Parker Hannifin for the express purpose of operating the crimper.

# Hose Assembly and Crimping (cont.)

## Permanent Crimp Series 56

8

### Measure & Inspect

Measure and verify hose assembly length.

Inspect insertion depth mark at fitting ends. Insertion mark must be visible but not exceed 1/8" from end of crimped fitting shell.

Measure crimp diameter of each fitting at top, middle and bottom of shell. Take measurements at a minimum of three places around shell circumference. Verify crimp diameter is within tolerances.

(Reference Crimp Die Selection on Crimpsource online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource))

# Hose Assembly and Crimping Field Attachable

Series 51, BU & MS (Do not use these fittings on oxygen service lines)

CAUTION: There are several different sections for Hose Assembly and Crimping. Be sure you are in the section that corresponds to the fitting series you are using. See Table of Contents for listing.

1

## Inspection

**Hose** – Visually inspect both ends of hose for square cut. Remove any burrs, loose fibers or wires.

**Fittings** – Inspect socket for damaged or missing threads. Do not use if conditions exist.

Inspect nipple for a through-hole, damaged or missing threads and improperly crimped nut (if applicable). Do not use if these conditions exist.

2

## Assembly

Using the Parker VBS or VBL vise block, place hose in proper hole of the vise block and then clamp in a bench vise. Ensure enough hose extends from the vise block to install socket.

### Caution

Ensure hose is installed in correct size hole of vise block. Clamping hose in a smaller hole will crush hose.

3

## Assembly

Using a wrench, screw socket onto hose counterclockwise until it bottoms. Ensure end of hose is against inside shoulder. Back off socket 1/4 turn clockwise.

Socket should be firm when tightened but not difficult to turn. If socket is difficult to install, apply lubricant that is compatible with the hose material.

### Note

**Do not use a lubricant with MS series.**

# Hose Assembly and Crimping (cont.)

## Field Attachable

Series 51, BU & MS (Do not use these fittings on oxygen service lines)

4

### Assembly

Place hex portion of socket into vise and tighten vise. Ensure socket extends past vise jaws enough to allow for installation of nipple.

#### Caution

When tightening socket in vise, do not over tighten vise jaws. Over tightening vise jaws will distort internal threads of socket and hamper installation of nipple.

5

### Assembly

Using an SAE 20 weight lubricating oil, generously lubricate nipple and socket, threads and hose I.D.

Using a wrench on the nipple hex, screw nipple into socket clockwise until nipple bottoms against socket shoulder.

#### Caution

Nipple should be firm when tightened but not difficult to turn. If nipple is difficult to install, check hose for proper lubrication. Re-apply lubricating oil as necessary. Installation of nipple without proper lubrication will damage core tube.

6

### Inspection

Measure and verify hose assembly length.

# Hose Assembly and Crimping

## PTFE Permanent Crimp

Series 91, 91N & 93N

CAUTION: There are several different sections for Hose Assembly and Crimping. Be sure you are in the section that corresponds to the fitting series you are using. See Table of Contents for listing.

1

### Cut

Using a power hose cutoff saw, cut hose squarely.

### Note

PTFE Hose should be taped prior to cutting. Hose should be cut at center point of taped section.

2

### Inspection

**Hose** – Visually inspect both ends of hose for square cut. Remove any burrs, loose fibers or wires.

**Fittings** – Verify fitting series corresponds to the selected hose. Visually inspect fitting(s) for a through-hole, threads and damage.

3

### Assembly Prep

**Insertion Depth** – Mark hose end with proper insertion depth line. See Hose Fitting Insertion Values, pg. G-43 for insertion depths of fitting series that do not incorporate an insertion depth. For jacketed PTFE hoses, use a sharp knife and light pressure to cut back the cover at least the length of the insertion depth of the fitting.

### Warning

Do not use lubricating oil when installing fittings on hose used in oxygen service. When installing fittings on hose used in oxygen service, lubricate with a non-oil based soap solution. Failure to do so may result in an explosion and personal injury when hose is used.

**Assemble hose** – Push fitting onto hose slightly and then remove tape. Continue pushing fitting onto hose until fitting reaches depth insertion mark.

For detailed ordering information, please consult price list or contact Parflex Division.

## PTFE Permanent Crimp

Series 91, 91N & 93N

4

### Die Selection

Select proper Parkrimp die set. (Reference Crimp Die Selection on Crimpsource online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource))

5

### Lubricate Bowl

Using a premium, quality, lithium-base grease, apply a thin layer of grease on bowl of crimper base plate.

6

### Die & Spacer Ring

**Crimp Die** – Place die set into bowl.

**Die Ring** – Place applicable die ring on top of die. Position ring so it is centered on die.

(Parflex hoses utilize silver die ring with the exception of HTB hose. Reference Crimp Die Selection on Crimpsource online at [www.parker.com/crimpsource](http://www.parker.com/crimpsource))

7

### Crimp

**Assemble hose** – Insert hose and fitting from bottom of crimper and up through die set. Position fitting so bottom of fitting skirt rests on die step (PARKALIGN® feature).

While holding hose and fitting in position on die step, crimp fitting onto hose until die ring contacts base plate.

#### Warning

Keep fingers and hands away from die-pusher area. Failure to do so may result in personal injury.

#### Note

Pump on crimper must not exceed the rated pressure of the crimper being used. Parker Hannifin will not accept responsibility for the operation of or provide warranty coverage for a crimper that is operated by a power unit other than equipment supplied by Parker Hannifin for the express purpose of operating the crimper.

# Hose Assembly and Crimping (cont.)

## PTFE Permanent Crimp

Series 91, 91N & 93N

8

### Measure & Inspect

Measure and verify hose assembly length.

Inspect insertion depth mark at fitting ends. Insertion mark must be visible but not exceed 1/8" from end of crimped fitting shell.

Measure crimp diameter of each fitting at top, middle and bottom of shell. Take measurements at a minimum of three places around shell circumference. Verify crimp diameter is within tolerances.

# Hose Assembly and Crimping

## PTFE Permanent Crimp

Series PAGE Fittings

CAUTION: There are several different sections for Hose Assembly and Crimping. Be sure you are in the section that corresponds to the fitting series you are using. See Table of Contents for listing.

**1**

### Inspection/Marking

Obtain correct hose, fittings and collars per customer order. Inspect to make certain no defects are present on fittings, collars or hose.

Using 1" wide filament tape, apply 1 to 1½ wraps of tape tightly around hose at location to be cut. Mark tape in the middle where cut will be made. Tape will be left on during crimping so only ½" width of tape should remain.

**Fittings** – Inspect each component for possible damage. In addition, inspect socket and nipple for a through-hole and threads.

**2**

### Cutting

Using a rotary power cutting saw with a smooth toothless blade, cut hose squarely to proper length. Fitting length being used in the assembly shall be taken into account when calculating hose length.

Blow ends of hose off / out to remove any debris left from cutting operation. Cut off wires or fabric extending past the end of the hose.

**3**

### Assembly

PAGE series fittings are not one piece but two pieces (insert plus collar) and must be properly installed to assure leak free long life assemblies.

# Hose Assembly and Crimping (cont.)

## PTFE Permanent Crimp

Series PAGE Fittings

**4**

### Assembly

a. Orient and place collar on hose end fully.

b. Using a taper punch, push punch into tube to enlarge bore of hose so insert just slides into hose.

c. Push insert into hose until lock groove of insert is just at end of collar.

d. Pull collar out towards end of insert until at correct crimp position on insert of collar.

**5**

### Assembly

Crimp assembly only in Parker Approved adjustable crimper. Select correct die and crimp spec from Parker Crimp Source.

[www.parker.com/crimpsource](http://www.parker.com/crimpsource)

a. Place assembly into crimp dies so full collar length crimp is obtained.

b. Check crimp dimensions in four places around the middle of the crimp circumference. Verify the average of those readings is within crimp specification tolerances. Adjust crimper up or down if needed to obtain proper dimension.

c. Crimp opposite end following the same procedures.

### Warning

Keep fingers and hands away from die-pusher area. Failure to do so may result in personal injury.

**6**

### Inspect

Inspect assembly, noting the length.

a. Test to correct test pressures to assure no leaks are observed using hydrostatic pressure unit (recommended). Air or nitrogen under water can be used with caution utilizing the proper pressure and procedures for that equipment.

Blow out all water from the assembly and recheck length.

\*\*Note any movement of length and make compensations as needed on next assembly.

Package assembly appropriately for customer requirements.

# Hose Assembly and Crimping

## PTFE Field Attachable

Series 90

CAUTION: There are several different sections for Hose Assembly and Crimping. Be sure you are in the section that corresponds to the fitting series you are using. See Table of Contents for listing.

1

### Inspection

**Hose** – Visually inspect both ends of hose for square cut. Remove any burrs, loose fibers or wires.

**Fittings** – Inspect each component for possible damage. In addition, inspect socket and nipple for a through-hole and threads.

2

### Assembly

Slide two sockets over end of hose with bottom of sockets back to back. Position sockets at each end of hose.

### Note

When installing sockets on hose, check hose ends to determine if wire braid “necks down” (bends inward). If one end “necks down” use this end to slide sockets onto hose.

3

### Assembly

Mount nipple hex in vise. Ensure nipple end extends beyond vise jaws sufficiently to allow installation of hose.

Push hose bore onto nipple to size tube and to aid in separating braid before assembling ferrule onto hose.

Once completed, remove hose from nipple.

# Hose Assembly and Crimping (cont.)

## PTFE Field Attachable

Series 90

4

### Assembly

By hand, push sleeve over end of PTFE core tube and under wire braid.

To complete positioning of sleeve, push hose end with sleeve against a solid flat surface.

5

### Assembly

Verify tube butts against inside shoulder of ferrule.

Using a tapered punch, push punch into end of sleeve and tube to set sleeve barbs into tube.

6

### Assembly

Using SAE 20 weight oil, lubricate nipple and socket threads. For stainless steel fittings use Parker ThreadMate® or a molybdenum type lubricant.

### Warning

Do not use lubricating oil when installing fittings on hose used in oxygen service. When installing fittings on hose used in oxygen service lubricate with a non-oil based soap solution. Failure to do so may result in an explosion and personal injury when hose is used.

**Assemble hose** – Using a twisting motion, push hose over nipple until hose is seated against nipple chamfer.

For detailed ordering information, please consult price list or contact Parflex Division.

# Hose Assembly and Crimping (cont.)

## PTFE Field Attachable

Series 90

7

### Assembly

Push socket forward and hand-start threading of socket to nipple.

#### Caution

When tightening socket in vise, do not over tighten vise jaws. Over tightening vise jaws will distort internal threads of socket.

Remove assembly from vise and reposition with socket in vise jaws. Ensure socket extends beyond vise jaws far enough to allow nipple to be completely tightened.

8

### Assembly

Wrench tighten nipple hex until clearance between hex and socket hex is 1/32" or less.

Tighten further to align corners of nipple and socket hexes if necessary.

9

### Measure & Inspect

Measure and verify hose assembly length.

# SQ-Swage Instructions

## Sewer Hose

**CAUTION:** There are several different sections for Hose Assembly and Crimping. Be sure you are in the section that corresponds to the fitting series you are using. **See Table of Contents for listing.**

1

### Inspection

**Hose** – Visually inspect both ends of hose for square cut. Remove any burrs, loose fibers or wires.

**Fittings** – Visually inspect fitting for properly crimped shells, internal barbs, a through-hole and damage.

2

### Assembly

**Insertion Depth** – Mark hose end with proper insertion depth line.

**Lubricate** – Using an SAE 20 weight oil, lightly lubricate inside of both hose ends.

**Assemble hose** – Push each hose end into fitting to the depth insertion mark.

3

### Assembly

Remove both die securing bolts and nuts.

Place hose and fitting assembly into position on swager.

# SQ-Swage Instructions (cont.)

## Sewer Hose

4

### Assembly

Insert both die halves around hose in each end of swager.

Install both die securing bolts with nuts positioned in opening of swager plates. Tighten die securing bolts 1/4 turn past finger tight.

5

### Assembly

**Lubricate** - Using SAE 20 oil, generously lubricate the steel fitting surface and ID of the swage dies.

**Assemble hose** - Align swager plates in parallel and tighten nuts on swaging bolts uniformly until dies touch.

### Caution

Ensure swager plates remain in parallel when tightening swager bolts. Failure to do so will result in an improperly swaged fitting.

Generously lubricate swaging bolts. Failure to do so may result in an improperly swaged fitting.

6

### Assembly

Loosen swaging bolts to release pressure on dies.

Remove die securing bolts and nuts. Then remove dies.

**Assemble hose** - Remove completed hose assembly.

# SQ-Swage Instructions (cont.)

## Sewer Hose

Hose  
A

7

### Measure & Inspect

Measure and verify hose assembly length.

Inspect insertion depth mark at fitting ends. Insertion mark must be visible but not exceed 1/8" from end of crimped fitting shell.

Measure swage diameter of each fitting at top, middle and bottom of shell. Take measurements at a minimum of three places around shell circumference. Verify swage diameter is within tolerances.

(Reference Swage Specification & Tool Selection Chart on pg. G-42 for proper swage diameters.)

# Twin/Multi-Line Separation

Factory-built assemblies are available using twin/multi-line hoses. When field-built assemblies are preferred, the following steps must be taken.

1

**Set-Up** – Position twinned or multi-line hose assembly so that it lies flat on work surface without tendency to twist or turn.

2

**Measure** hose to length – Measure and mark the length that the hoses are to be separated (commonly referred to as Splitback Length).

3

**Lubricate** – Lightly lubricate the web area between the hoses. Distribute the lubricant uniformly along the web of the assembly to be separated. Any lightweight oil will suffice (SAE 10 or 20). The function of the oil is to reduce the friction of the knife blade so that it naturally seeks the center of the valley formed by the hoses. This eliminates the need for the operator to steer the knife.

# Twin/Multi-Line Separation (cont.)

4

**Cut Hose to Length** – Press the multi-line hose assembly firmly and flat against the work surface with your free hand so that it does not move. Using a sharp utility knife, carefully draw the knife toward you with constant light to moderate pressure, and a smooth stroke. Multiple strokes will be necessary to separate the hoses.

## Note

It is important that the knife blade be perpendicular to the hose during this procedure so that the blade cuts only the center line of the web. Extreme care must be taken to avoid cutting through the cover of the hoses and thereby exposing the hose reinforcement. If this occurs, the hose assembly must be discarded (See Figure 1). If the separation length is greater than that which can be accomplished with one continuous, smooth stroke, then the procedure should be repeated over shorter distances always cutting toward the free end of the hoses.

5

**Measure Separation** – It is suggested that the separation length be sufficiently long so that the swaging or crimping operation can be accomplished without risk of kinking the hoses or tearing the web which could result in exposure of the hose reinforcement (See Figure 2).

6

**Apply Tape** – At the option of the assembler, as dictated by the installation, a nylon lashing strap or tape may be applied at the termination of the separated length to provide protection against tearing of the web or hose covers.

## INCORRECT HANDLING

**Figure 1** – Extreme care must be taken to avoid cutting through the cover of the hoses and thereby exposing the hose reinforcement. If this occurs, the hose assembly must be discarded.

**Figure 2** – The separation length must allow for the swaging or crimping operation without damaging the hose.

For detailed ordering information, please consult price list or contact Parflex Division.

# Ferrul-Fix Installation Instructions

Fast, on-the-job repair for ruptured bent tube hose assemblies and power steering lines.

The life of the combination tube-hose assembly is often limited to the service life of the hose alone. A replacement assembly may not be available, some equipment dealers are unable to stock all of the many odd tube configurations.

Parker FERRUL-FIX, a field attachable, reusable hose end fitting, now makes it possible to salvage the bent tube section of the original assembly for replacement. Most important, it gets you back into operation FAST!

1. Gets you back in operation fast - No costly delays while replacement assemblies are rushed from the factory.
2. Lets you reuse expensive bent tube ends with Parker Hose fittings. You can replace the hose at a fraction of the cost of a complete assembly.
3. Eliminates the need for emergency brazing or welding in the field - Ferrul-Fix can be assembled without special tools or equipment when using Parker S5Reusable Hose fittings.

### 3-Piece Design - Body, nut and ferrule

Wedging action of ferrule, when drawn down by nut, forms seal between body and ferrule, while cutting edge of ferrule "bites" into tube wall forming another positive seal.

### Visible Bite

Extent of bite at cutting edge of ferrule is completely visible when fitting is dis-assembled, an important safety feature. Self-centering action assures even bite around circumference of tube.

### Parkerized Finish

Ferrul-Lok fittings have the Parkerized black finish, providing "built-in" lubrication which reduces wrench torque required.

## Ferrul-Fix Installation Instructions

1. Cut the formed tube off squarely next to the permanent hose fitting. Lightly deburr the end of the tube internally and externally.
2. Disassemble the Ferrul-Fix fitting, and lubricate threads and both ends of the ferrule with Parker Ferulube.
3. Slide nut and ferrule onto tubing, with the long, straight end of the ferrule pointing toward the tube end.
4. Insert tube end into the Ferrul-Fix body until it bottoms against the shoulder. Slide ferrule inside body, and screw nut down finger tight.
5. Wrench nut down 1-3/4 turns to preset the ferrule.
6. Disconnect nut and inspect lead edge of ferrule to make certain that the biting edge has turned up a shoulder to a height of at least 50% of the ferrule and completely around the tube.
7. Assemble Ferrul-Fix fitting to hose. Refer to assembly instructions listed in appropriate fittings section. Do not assemble to hose before steps 1-6.
8. Reassemble tubing into Ferrul-Fix end and turn nut down easily until a sudden increase in force is evident. Turn bent tube to proper position if required. Using two wrenches, one on the fitting nipple hex and the other on the nut tighten nut an additional 1/6 turn (one wrench flat).

**Comments:**

1. Two dies required when swaging a mender/splicer fitting. A pusher is not required when swaging a mender/splicer fitting.
2. One die and one pusher required when swaging a male pipe fitting.
3. End fittings cannot be swaged on S5N series hose. Only mender/splicers can be swaged.
4. Fittings cannot be swaged on SLH series hose.

# Metal Tube & Fitting Material Compatibility

As a general rule, tube and fitting materials should be the same. If different materials must be considered, the following chart can be used as a general guide. Since operating conditions differ with applications, this chart should be used only as a guide and not a firm recommendation. Before making a final

decision on material combination, it should be sufficiently tested under appropriate conditions to assure suitability for the intended application. For additional material combinations, contact the Tube Fittings Division.

Tube Material	Specification	Construction	Condition	Maximum Hardness	Temperature Range (7)	Application	Tube Material to Fitting & Material Compatibility

Table U7 – Tube and Fitting Material Compatibility

**Ratings Key:**

NR = Not Recommended  
F = Fair  
G = Good  
E = Excellent

**Fittings Materials Code:**

S = Steel  
SS = Stainless Steel  
B = Brass  
M = Monel

**Notes:**

1. For highly corrosive media or service environment, contact the Tube Fittings Division.
2. Requires different assembly procedure. Contact the Tube Fittings Division.
3. Low temperature limit for stainless steel Ferulok® fittings is -20°F (-30°C).
4. For brazing only. Grade 4130 not recommended with Parflange process.
5. For use with Parflange process only. Not recommended with brazing.
6. Use depends on specific application. Contact the Tube Fittings Division.
7. Applies to tube material.
8. Comparable specifications to SAE.
9. With metric version of tubing.
10. Not tested with Parflange. Contact the Tube Fittings Division.

# O-Ring Material Selection

Standard O-rings supplied with Parker tube fittings and adapters are 90 durometer hard nitrile (Buna-N) Parker compound #N0552. These O-rings are well suited for most industrial hydraulic and pneumatic systems. They have high extrusion resistance making them suitable for very high pressure static applications. Optional high temperature fluorocarbon, Parker compound #V0894, is also available for higher temperature specifications.

O-rings for other than normal hydraulic media or higher temperature applications can be selected from the following chart. The chart should be used only as a general guide. Before making final selection for a given application, it is recommended that appropriate tests be conducted to assure compatibility with the fluid, temperature, pressure and other environmental conditions.

For fluids not shown in the chart, please contact the Tube Fittings Division.

Polymer	Abbreviated Name	Parker Compound No.	Color	SAE J515 Type	Hardness Shore "A" <sup>7</sup>	Temperature Range	Recommended For	Not Recommended For
Nitrile-Butadiene	NBR	N0552	● B	CH <sup>2</sup>	90 <sup>6</sup>	-30° to 250°F	Petroleum base oils and fluids, mineral oils, ethylene glycol base fluids, silicone and di-ester base lubricants, air, water under 150°F, and natural gas. Hydrogen fuel cells. Meets FDA requirements for food products. CNG Applications.	Phosphate ester base hydraulic fluids, automotive brake fluids, strong acids, ozone, freons, ketones, halogenated hydrocarbons, and methanol.
		N0674		-	70	-30° to 250°F		
		N0103		-	70	-65° to 225°F		
		N1059		CH <sup>2</sup>	90	-30° to 275°F		
		N0507		-	90	-65° to 180°F		
		N0304		-	75	-65° to 225°F		
		N0508		-	75	-35° to 250°F		
N0756	-	75 <sup>6</sup>	-65° to 275°F					
Ethylene-Propylene	EPDM	E0540	● B	CA <sup>3</sup>	80	-65° to 275° F	Phosphate ester base hydraulic fluids, hot water, steam to 400°F, silicone oils and greases, dilute acids and alkalis, ketones, alcohols and automotive brake fluids. CO <sub>2</sub> climate control systems.	Petroleum base oils and di-ester base lubricants.
		E0893	● P <sup>1</sup>	CA <sup>3</sup>	80			
		E0962	● B	-	90			
Neoprene	CR	C0873	● B	-	70	-45° to 250° F	Refrigerants (freons, ammonia), high aniline point petroleum oils, mild acids and silicate ester lubricants.	Phosphate ester fluids and ketones.
		C0944	● R <sup>1</sup>	-	70			
Fluorocarbon	FKM <sup>5</sup> or FPM	V0747	● B	-	75	-15° to 400° F	Petroleum base oils and fluids, some phosphate ester base fluids, silicone and silicate ester base lubricants, di-ester base lubricants, acids and halogenated hydrocarbons.	Ketones, skydrol fluids, amines (VDMH), anhydrous ammonia, low molecular weight esters and ethers, and hot hydrofluoric or chlorosulfonic acids.
		V0884	● BR <sup>1</sup>	-	75			
		V0894	● BR <sup>1</sup>	HK <sup>4</sup>	90 <sup>6</sup>			
Silicone	Si	S0604	● RU <sup>1</sup>	-	70	-65° to 450° F	Dry heat (air to 400°F) and high aniline point oils.	Most petroleum fluids, ketones, water and steam.

Table U-6 – O-Ring Selection

\*Color Code: B – Black, P – Purple, R – Red, BR – Brown, RU – Rust

#### Notes:

- These Parker "Chromassure" color assurance O-rings are available from the Parker Hannifin O-Ring Division. They help eliminate assembly errors, reduce warranty costs and liability risks, and assure safety in aftermarket business.
- Formerly SAE Type I.
- Formerly SAE Type II.
- Formerly SAE Type III.
- "FKM" is the ASTM designation for fluorocarbon. Its ISO designation is "FPM".
- Standard compounds available from stock.
- Use 90 durometer hard O-rings for applications with 1500 psi or higher pressures.

# Metals Corrosion Scale

## Corrosion of Base Metals in Contact

The susceptibility of different base metals to corrosion while in contact depends upon the difference between the contact potentials or the electromotive voltages of the metals involved. The greater the potential difference is, the greater is the tendency for corrosion. The metal with the higher potential forms the anode and is corroded. The larger the separation distance in the electromotive chart between the two metals in contact, the higher the contact potential and chances for corrosion. For example, zinc and aluminum are very short distance apart in the chart; therefore potential for corrosion when these two metals are in contact is very low. On the other hand, aluminum and passivated 316 stainless steel are far apart; hence, when in contact, the potential for corrosion is very high. Aluminum, being more anodic metal, will corrode in this combination.

As a general guideline, if the metals are half the length of the chart or more apart, the combination should be avoided. Also, it is not a good idea to combine an anodic metal part with thin cross section, such as thin wall tubing, with a cathodic or less anodic metal part of a heavy cross section, such as a fitting.

**Example:** A thin wall brass tube with steel fitting is a better, although not ideal, combination than a thin wall steel tube with brass fitting.

# Materials to Parflex Part Number Guide

Ratings Code:

- G – Good to excellent. Little or no swelling, tensile or surface changes. Preferred choice.
- L – Marginal or conditional. Noticeable effects but not necessarily indicating lack of serviceability. Further testing suggested for specific application. Very long-term effects such as stiffening or potential for crazing should be evaluated.
- P – Poor or unsatisfactory. Not recommended without extensive and realistic testing.
- – Indicates that this was not tested.
- # – For fluoropolymer. Indicates good chemical resistance but potential for excessive permeation.

Notes:

- The Fluid Compatibility Guides are simplified rating tabulations based on immersion tests at 75°F. Higher temperatures tend to reduce ratings. Since final selection depends on pressure, fluid and ambient temperature and other factors not known to Parker Hannifin Co., no performance guarantee is expressed or implied. Ratings do not imply compliance with specialized codes such as FDA, NSF, AGA or UL and do not cover possible fluid discoloration, taste or odor effects. For conveying foodstuffs, use FDA sanctioned materials and for potable water, use NSF listed materials. For chemicals not listed, or for advice on particular applications, please consult Product Engineering, Parflex Div., Ravenna, Ohio.
- Hose applications for these fluids must take into account legal and insurance regulations. This does not imply AGA or UL compliance.
- Satisfactory at some concentrations and temperatures, unsatisfactory in others.
- For high pressure gases, the cover should be pinpricked and the pressure must not be released quickly. Chain or restrain the hose to prevent personal injury in the event of damage or failure.
- Chemical compatibility does not imply low permeation rates. Consult the Parker factory for a suggestion for your specific requirement.
- Does not imply NSF or FDA compliance.
- Chemical compatibility does not imply acceptability for use in airless paint spray applications. These applications require a special conductive hose.
- Fluoropolymers are chemically compatible with Anhydrous Ammonia. However, extreme caution must be used in dealing with Anhydrous Ammonia since it can cause severe injuries such as blindness and/or chemical burns.

For detailed ordering information, please consult price list or contact Parflex Division.

# Parker Safety Guide

## Parker Safety Guide for Selecting and Using Hose, Tubing, Fittings, Connectors, Conductors, Valves and Related Accessories

### Parker Safety Guide for Selecting and Using Hose, Tubing, Fittings and Related Accessories

Publication No. 4400-B.1

Revised: October 2015, Rev A

**WARNING:** Failure or improper selection or improper use of hose, tubing, fittings, assemblies, valves, connectors, conductors or related accessories ("Products") can cause death, personal injury and property damage. Possible consequences of failure or improper selection or improper use of these Products include but are not limited to:

- Fittings thrown off at high speed.
- High velocity fluid discharge.
- Explosion or burning of the conveyed fluid.
- Electrocutation from high voltage electric powerlines.
- Contact with suddenly moving or falling objects that are controlled by the conveyed fluid.
- Injections by high-pressure fluid discharge.

- Dangerously whipping Hose.
- Tube or pipe burst.
- Weld joint fracture.
- Contact with conveyed fluids that may be hot, cold, toxic or otherwise injurious.
- Sparking or explosion caused by static electricity buildup or other sources of electricity.
- Sparking or explosion while spraying paint or flammable liquids.
- Injuries resulting from inhalation, ingestion or exposure to fluids.

Before selecting or using any of these Products, it is important that you read and follow the instructions below. No product from any division in Parker Fluid Connectors Group is approved for in-flight aerospace applications. For hoses and fittings used in in-flight aerospace applications, please contact Parker Aerospace Group.

### 1.0 GENERAL INSTRUCTIONS

1.1 Scope: This safety guide provides instructions for selecting and using (including assembling, installing, and maintaining) these Products. For convenience, all rubber and/or thermoplastic products commonly called "hose" or "tubing" are called "Hose" in this safety guide. Metallic tube or pipe are called "tube". All assemblies made with Hose are called "Hose Assemblies". All assemblies made with Tube are called "Tube Assemblies".

All products commonly called "fittings", "couplings" or "adapters" are called "Fittings". Valves are fluid system components that control the passage of fluid. Related accessories are ancillary devices that enhance or monitor performance including crimping, flaring, flanging, presetting, bending, cutting, deburring, swaging machines, sensors, tags, lockout handles, spring guards and associated tooling. This safety guide is a supplement to and is to be used with the specific Parker publications for the specific Hose, Fittings and Related Accessories that are being considered for use. Parker publications are available at [www.parker.com](http://www.parker.com). SAE J1273 ([www.sae.org](http://www.sae.org)) and ISO 17165-2 ([www.ansi.org](http://www.ansi.org)) also provide recommended practices for hydraulic Hose Assemblies, and should be followed.

1.2 Fail-Safe: Hose, Hose Assemblies, Tube, Tube Assemblies and Fittings can and do fail without warning for many reasons. Design all systems and equipment in a fail-safe mode, so that failure of the Hose, Hose Assembly, Tube, Tube Assembly or Fitting will not endanger persons or property.

1.3 Distribution: Provide a copy of this safety guide to each person responsible for selecting or using Hose, Tube and Fitting products. Do not select or use Parker Hose, Tube or Fittings without thoroughly reading and understanding this safety guide as well as the specific Parker publications for the Products.

1.4 User Responsibility: Due to the wide variety of operating conditions and applications for Hose, Tube and Fittings. Parker does not represent or warrant that any particular Hose, Tube or Fitting is suitable for any specific end use system. This safety guide does not analyze all technical parameters that must be considered in selecting a product. The user, through its own analysis and testing, is solely responsible for:

- Making the final selection of the Products.
- Assuring that the user's requirements are met and that the application presents no health or safety hazards.
- Following the safety guide for Related Accessories and being trained to operate Related Accessories.
- Providing all appropriate health and safety warnings on the equipment on which the Products are used.
- Assuring compliance with all applicable government and industry standards.

1.5 Additional Questions: Call the appropriate Parker technical service department if you have any questions or require any additional information. See the Parker publication for the Products being considered or used, or call 1-800-CPARKER, or go to [www.parker.com](http://www.parker.com), for telephone numbers of the appropriate technical service department.

### 2.0 HOSE, TUBE & FITTINGS SELECTION INSTRUCTIONS

2.1 Electrical Conductivity: Certain applications require that the Hose be nonconductive to prevent electrical current flow. Other applications require the Hose and the Fittings and the Hose/Fitting interface to be sufficiently conductive to drain off static electricity. Extreme care must be exercised when selecting Hose, Tube and Fittings for these or any other applications in which electrical conductivity or nonconductivity is a factor.

The electrical conductivity or nonconductivity of Hose, Tube and Fittings is dependent upon many factors and may be susceptible to change. These factors include but are not limited to the various materials used to make the Hose and the Fittings, Fitting finish (some Fitting finishes are electrically conductive while others are nonconductive), manufacturing methods (including moisture control), how the Fittings contact the Hose, age and amount of deterioration or damage or other changes, moisture content of the Hose at any particular time, and other factors.

The following are considerations for electrically nonconductive and conductive Hose. For other applications consult the individual catalog pages and the appropriate industry or regulatory standards for proper selection.

2.1.1 Electrically Nonconductive Hose: Certain applications require that the Hose be nonconductive to prevent electrical current flow or to maintain electrical isolation. For applications that require Hose to be electrically nonconductive, including but not limited to applications near high voltage electric lines, only special nonconductive Hose can be used. The manufacturer of the equipment in which the nonconductive Hose is to be used must be consulted to be certain that the Hose, Tube and Fittings that are selected are proper for the application. Do not use any Parker Hose or Fittings for any such application requiring nonconductive Hose, including but not limited to applications near high voltage electric lines or dense magnetic fields, unless (i) the application is expressly approved in the Parker technical publication for the product, (ii) the Hose is marked "nonconductive", and (iii) the manufacturer of the equipment on which the Hose is to be used specifically approves the particular Parker Hose, Tube and Fittings for such use.

2.1.2 Electrically Conductive Hose: Parker manufactures special Hose for certain applications that require electrically conductive Hose. Parker manufactures special Hose for conveying paint in airless paint spraying applications. This Hose is labeled "Electrically Conductive Airless Paint Spray Hose" on its layline and packaging. This Hose must be properly connected to the appropriate Parker Fittings and properly grounded in order to dissipate dangerous static charge buildup, which occurs in all airless paint spraying applications. Do not use any other Hose for airless paint spraying, even if electrically conductive. Use of any other Hose or failure to properly connect the Hose can cause a fire or an explosion resulting in death, personal injury, and property damage. All hoses that convey fuels must be grounded.

Parker manufactures a special Hose for certain compressed natural gas ("CNG") applications where static electricity buildup may occur. Parker CNG Hose assemblies comply with the requirements of ANSI/IAS NGV 4.2; CSA 12.52, "Hoses for Natural Gas Vehicles and Dispensing Systems" ([www.ansi.org](http://www.ansi.org)). This Hose is labeled "Electrically Conductive for CNG Use"

For detailed ordering information, please consult price list or contact Parflex Division.

Parker Hannifin Corporation | Parflex Division | Ravenna, Ohio | [parker.com/pfd](http://parker.com/pfd)

on its layline and packaging. This Hose must be properly connected to the appropriate Parker Fittings and properly grounded in order to dissipate dangerous static charge buildup, which occurs in, for example, high velocity CNG dispensing or transfer. Do not use any other Hose for CNG applications where static charge buildup may occur, even if electrically conductive. Use of other Hoses in CNG applications or failure to properly connect or ground this Hose can cause a fire or an explosion resulting in death, personal injury, and property damage. Care must also be taken to protect against CNG permeation through the Hose wall. See section 2.6, Permeation, for more information. Parker CNG Hose is intended for dispenser and vehicle use within the specified temperature range. Parker CNG Hose should not be used in confined spaces or unventilated areas or areas exceeding the specified temperature range. Final assemblies must be tested for leaks. CNG Hose Assemblies should be tested on a monthly basis for conductivity per ANSI/IAS NGV 4.2; CSA 12.52.

Parker manufactures special Hose for aerospace in-flight applications. Aerospace in-flight applications employing Hose to transmit fuel, lubricating fluids and hydraulic fluids require a special Hose with a conductive inner tube. This Hose for in-flight applications is available only from Parker's Stratoflex Products Division. Do not use any other Parker Hose for in-flight applications, even if electrically conductive. Use of other Hoses for in-flight applications or failure to properly connect or ground this Hose can cause a fire or an explosion resulting in death, personal injury and property damage. These Hose assemblies for in-flight applications must meet all applicable aerospace industry, aircraft engine and aircraft requirements.

**2.2 Pressure:** Hose, Tube and Fitting selection must be made so that the published maximum working pressure of the Hose, Tube and Fittings are equal to or greater than the maximum system pressure. The maximum working pressure of a Hose, or Tube Assembly is the lower of the respective published maximum working pressures of the Hose, Tube and the Fittings used. Surge pressures or peak transient pressures in the system must be below the published maximum working pressure for the Hose, Tube and Fitting. Surge pressures and peak pressures can usually only be determined by sensitive electrical instrumentation that measures and indicates pressures at millisecond intervals. Mechanical pressure gauges indicate only average pressures and cannot be used to determine surge pressures or peak transient pressures. Published burst pressure ratings for Hose is for manufacturing test purposes only and is no indication that the Product can be used in applications at the burst pressure or otherwise above the published maximum recommended working pressure.

**2.3 Suction:** Hoses used for suction applications must be selected to insure that the Hose will withstand the vacuum and pressure of the system. Improperly selected Hose may collapse in suction application.

**2.4 Temperature:** Be certain that fluid and ambient temperatures, both steady and transient, do not exceed the limitations of the Hose, Tube, Fitting and Seals. Temperatures below and above the recommended limit can degrade Hose, Tube, Fittings and Seals to a point where a failure may occur and release fluid. Tube and Fittings performances are normally degraded at elevated temperature. Material compatibility can also change at temperatures outside of the rated range. Properly insulate and protect the Hose Assembly when routing near hot objects (e.g. manifolds). Do not use any Hose in any application where failure of the Hose could result in the conveyed fluids (or vapors or mist from the conveyed fluids) contacting any open flame, molten metal, or other potential fire ignition source that could cause burning or explosion of the conveyed fluids or vapors.

**2.5 Fluid Compatibility:** Hose, and Tube Assembly selection must assure compatibility of the Hose tube, cover, reinforcement, Tube, Plating and Seals with the fluid media used. See the fluid compatibility chart in the Parker publication for the product being considered or used. This information is offered only as a guide. Actual service life can only be determined by the end user by testing under all extreme conditions and other analysis.

Hose, and Tube that is chemically compatible with a particular fluid must be assembled using Fittings and adapters containing likewise compatible seals. Flange or flare processes can change Tube material properties that may not be compatible with certain requirements such as NACE

**2.6 Permeation:** Permeation (that is, seepage through the Hose or Seal) will occur from inside the Hose or Fitting to outside when Hose or Fitting is used with gases, liquid and gas fuels, and refrigerants (including but not limited to such materials as helium, diesel fuel, gasoline, natural gas, or LPG). This permeation may result in high concentrations of vapors which are potentially flammable, explosive, or toxic, and in loss of fluid. Dangerous explosions, fires, and other hazards can result when using the wrong Hose for such applications. The system designer must take into account the fact that this permeation will take place and

must not use Hose or Fitting if this permeation could be hazardous. The system designer must take into account all legal, government, insurance, or any other special regulations which govern the use of fuels and refrigerants. Never use a Hose or Fitting even though the fluid compatibility is acceptable without considering the potential hazardous effects that can result from permeation through the Hose or Tube Assembly. Permeation of moisture from outside the Hose or Fitting to inside the Hose or Fitting will also occur in Hose or Tube assemblies, regardless of internal pressure. If this moisture permeation would have detrimental effects (particularly, but not limited to refrigeration and air conditioning systems), incorporation of sufficient drying capacity in the system or other appropriate system safeguards should be selected and used. The sudden pressure release of highly pressurized gas could also result in Explosive Decompression failure of permeated Seals and Hoses.

**2.7 Size:** Transmission of power by means of pressurized fluid varies with pressure and rate of flow. The size of the components must be adequate to keep pressure losses to a minimum and avoid damage due to heat generation or excessive fluid velocity.

**2.8 Routing:** Attention must be given to optimum routing to minimize inherent problems (kinking or flow restriction due to Hose collapse, twisting of the Hose, proximity to hot objects or heat sources). For additional routing recommendations see SAE J1273 and ISO 17165-2. Hose Assemblies have a finite life and should be installed in a manner that allows for ease of inspection and future replacement. Hose because of its relative short life, should not be used in residential and commercial buildings inside of inaccessible walls or floors, unless specifically allowed in the product literature. Always review all product literature for proper installation and routing instructions.

**2.9 Environment:** Care must be taken to insure that the Hose, Tube and Fittings are either compatible with or protected from the environment (that is, surrounding conditions) to which they are exposed. Environmental conditions including but not limited to ultraviolet radiation, sunlight, heat, ozone, moisture, water, salt water, chemicals and air pollutants can cause degradation and premature failure.

**2.10 Mechanical Loads:** External forces can significantly reduce Hose, Tube and Fitting life or cause failure. Mechanical loads which must be considered include excessive flexing, twist, kinking, tensile or side loads, bend radius, and vibration. Use of swivel type Fittings or adapters may be required to insure no twist is put into the Hose. Use of proper Hose or Tube clamps may also be required to reduce external mechanical loads. Unusual applications may require special testing prior to Hose selection.

**2.11 Physical Damage:** Care must be taken to protect Hose from wear, snagging, kinking, bending smaller than minimum bend radius and cutting, any of which can cause premature Hose failure. Any Hose that has been kinked or bent to a radius smaller than the minimum bend radius, and any Hose that has been cut or is cracked or is otherwise damaged should be removed and discarded. Fittings with damages such as scratches on sealing surfaces and deformation should be replaced.

**2.12 Proper End Fitting:** See instructions 3.2 through 3.5. These recommendations may be substantiated by testing to industry standards such as SAE J517 for hydraulic applications, or MIL-A-5070, AS1339, or AS3517 for Hoses from Parker's Stratoflex Products Division for aerospace applications.

**2.13 Length:** When determining the proper Hose or Tube length of an assembly, be aware of Hose length change due to pressure, Tube length change due to thermal expansion or contraction, and Hose or Tube and machine tolerances and movement must be considered. When routing short hose assemblies, it is recommended that the minimum free hose length is always used. Consult the hose manufacturer for their minimum free hose length recommendations. Hose assemblies should be installed in such a way that any motion or flexing occurs within the same plane.

**2.14 Specifications and Standards:** When selecting Hose, Tube and Fittings, government, industry, and Parker specifications and recommendations must be reviewed and followed as applicable.

**2.15 Hose Cleanliness:** Hose and Tube components may vary in cleanliness levels. Care must be taken to insure that the Hose and Tube Assembly selected has an adequate level of cleanliness for the application.

**2.16 Fire Resistant Fluids:** Some fire resistant fluids that are to be conveyed by Hose or Tube require use of the same type of Hose or Tube as used with petroleum base fluids. Some such fluids require a special Hose, Tube, Fitting and Seal, while a few fluids will not work with any Hose at all. See instructions 2.5 and 1.5. The wrong Hose, Tube, Fitting or Seal may fail after a very short service. In addition, all liquids but pure water may burn fiercely under certain conditions, and even pure water leakage may be hazardous.

2.17 Radiant Heat: Hose and Seals can be heated to destruction without contact by such nearby items as hot manifolds or molten metal. The same heat source may then initiate a fire. This can occur despite the presence of cool air around the Hose or Seal. Performance of Tube and Fitting subjected to the heat could be degraded.

2.18 Welding or Brazing: When using a torch or arc welder in close proximity to hydraulic lines, the hydraulic lines should be removed or shielded with appropriate fire resistant materials. Flame or weld spatter could burn through the Hose or Seal and possibly ignite escaping fluid resulting in a catastrophic failure. Heating of plated parts, including Hose Fittings and adapters, above 450°F (232°C) such as during welding, brazing or soldering may emit deadly gases. Any elastomer seal on fittings shall be removed prior to welding or brazing, any metallic surfaces shall be protected after brazing or welding when necessary. Welding and brazing filler material shall be compatible with the Tube and Fitting that are joined.

2.19 Atomic Radiation: Atomic radiation affects all materials used in Hose and Tube assemblies. Since the long-term effects may be unknown, do not expose Hose or Tube assemblies to atomic radiation. Nuclear applications may require special Tube and Fittings.

2.20 Aerospace Applications: The only Hose, Tube and Fittings that may be used for in-flight aerospace applications are those available from Parker's Stratoflex Products Division. Do not use any other Hose or Fittings for in-flight applications. Do not use any other Hose or Fittings from Parker's Stratoflex Products Division with any other Hose or Fittings, unless expressly approved in writing by the engineering manager or chief engineer of Stratoflex Products Division and verified by the user's own testing and inspection to aerospace industry standards.

2.21 Unlocking Couplings: Ball locking couplings or other Fittings with quick disconnect ability can unintentionally disconnect if they are dragged over obstructions, or if the sleeve or other disconnect member, is bumped or moved enough to cause disconnect. Threaded Fittings should be considered where there is a potential for accidental uncoupling.

### 3.0 HOSE AND FITTINGS ASSEMBLY AND INSTALLATION INSTRUCTIONS

3.1 Component Inspection: Prior to assembly, a careful examination of the Hose and Fittings must be performed. All components must be checked for correct style, size, catalog number, and length. The Hose must be examined for cleanliness, obstructions, blisters, cover looseness, kinks, cracks, cuts or any other visible defects. Inspect the Fitting and sealing surfaces for burrs, nicks, corrosion or other imperfections. Do NOT use any component that displays any signs of nonconformance.

3.2 Hose and Fitting Assembly: Do not assemble a Parker Fitting on a Parker Hose that is not specifically listed by Parker for that Fitting, unless authorized in writing by the engineering manager or chief engineer of the appropriate Parker division. Do not assemble a Parker Fitting on another manufacturer's Hose or a Parker Hose on another manufacturer's Fitting unless (i) the engineering manager or chief engineer of the appropriate Parker division approves the Assembly in writing or that combination is expressly approved in the appropriate Parker literature for the specific Parker product, and (ii) the user verifies the Assembly and the application through analysis and testing. For Parker Hose that does not specify a Parker Fitting, the user is solely responsible for the selection of the proper Fitting and Hose Assembly procedures. See instruction 1.4.

To prevent the possibility of problems such as leakage at the Fitting or system contamination, it is important to completely remove all debris from the cutting operation before installation of the Fittings. The Parker published instructions must be followed for assembling the Fittings on the Hose. These instructions are provided in the Parker Fitting catalog for the specific Parker Fitting being used, or by calling 1-800-CPARKER, or at [www.parker.com](http://www.parker.com).

3.3 Related Accessories: Do not crimp or swage any Parker Hose or Fitting with anything but the listed swage or crimp machine and dies in accordance with Parker published instructions. Do not crimp or swage another manufacturer's Fitting with a Parker crimp or swage die unless authorized in writing by the engineering manager or chief engineer of the appropriate Parker division.

3.4 Parts: Do not use any Parker Fitting part (including but not limited to socket, shell, nipple, or insert) except with the correct Parker mating parts, in accordance with Parker published instructions, unless authorized in writing by the engineering manager or chief engineer of the appropriate Parker division.

3.5 Field Attachable/Permanent: Do not reuse any field attachable Hose Fitting that has blown or pulled off a Hose. Do not reuse a Parker permanent Hose Fitting (crimped or swaged) or any part thereof. Complete

Hose Assemblies may only be reused after proper inspection under section 4.0. Do not assemble Fittings to any previously used hydraulic Hose that was in service, for use in a fluid power application.

3.6 Pre-Installation Inspection: Prior to installation, a careful examination of the Hose Assembly must be performed. Inspect the Hose Assembly for any damage or defects. DO NOT use any Hose Assembly that displays any signs of nonconformance.

3.7 Minimum Bend Radius: Installation of a Hose at less than the minimum listed bend radius may significantly reduce the Hose life. Particular attention must be given to preclude sharp bending at the Hose to Fitting juncture. Any bending during installation at less than the minimum bend radius must be avoided. If any Hose is kinked during installation, the Hose must be discarded.

3.8 Twist Angle and Orientation: Hose Assembly installation must be such that relative motion of machine components does not produce twisting.

3.9 Securement: In many applications, it may be necessary to restrain, protect, or guide the Hose to protect it from damage by unnecessary flexing, pressure surges, and contact with other mechanical components. Care must be taken to insure such restraints do not introduce additional stress or wear points.

3.10 Proper Connection of Ports: Proper physical installation of the Hose Assembly requires a correctly installed port connection insuring that no twist or torque is transferred to the Hose when the Fittings are being tightened or otherwise during use.

3.11 External Damage: Proper installation is not complete without insuring that tensile loads, side loads, kinking, flattening, potential abrasion, thread damage or damage to sealing surfaces are corrected or eliminated. See instruction 2.10.

3.12 System Checkout: All air entrapment must be eliminated and the system pressurized to the maximum system pressure (at or below the Hose maximum working pressure) and checked for proper function and freedom from leaks. Personnel must stay out of potential hazardous areas while testing and using.

3.13 Routing: The Hose Assembly should be routed in such a manner so if a failure does occur, the escaping media will not cause personal injury or property damage. In addition, if fluid media comes in contact with hot surfaces, open flame or sparks, a fire or explosion may occur. See section 2.4.

3.14 Ground Fault Equipment Protection Devices (GFEEDs): WARNING! Fire and Shock Hazard. To minimize the danger of fire if the heating cable of a Multitube bundle is damaged or improperly installed, use a Ground Fault Equipment Protection Device. Electrical fault currents may be insufficient to trip a conventional circuit breaker.

For ground fault protection, the IEEE 515: ([www.ansi.org](http://www.ansi.org)) standard for heating cables recommends the use of GFEEDs with a nominal 30 milliampere trip level for "piping systems in classified areas, those areas requiring a high degree of maintenance, or which may be exposed to physical abuse or corrosive atmospheres".

### 4.0 TUBE AND FITTINGS ASSEMBLY AND INSTALLATION INSTRUCTIONS

4.1 Component Inspection: Prior to assembly, a careful examination of the Tube and Fittings must be performed. All components must be checked for correct style, size, material, seal, and length. Inspect the Fitting and sealing surfaces for burrs, nicks, corrosion, missing seal or other imperfections. Do NOT use any component that displays any signs of nonconformance.

4.2 Tube and Fitting Assembly: Do not assemble a Parker Fitting with a Tube that is not specifically listed by Parker for that Fitting, unless authorized in writing by the engineering manager or chief engineer of the appropriate Parker division. The Tube must meet the requirements specified to the Fitting. The Parker published instructions must be followed for assembling the Fittings to a Tube. These instructions are provided in the Parker Fitting catalog for the specific Parker Fitting being used, or by calling 1-800-CPARKER, or at [www.parker.com](http://www.parker.com).

4.3 Related Accessories: Do not preset or flange Parker Fitting components using another manufacturer's equipment or procedures unless authorized in writing by the engineering manager or chief engineer of the appropriate Parker division. Tube, Fitting component and tooling must be checked for correct style, size and material. Operation and maintenance of Related Accessories must be in accordance with the operation manual for the designated Accessory.

4.4 Securement: In many applications, it may be necessary to restrain, protect, or guide the Tube to protect it from damage by unnecessary flexing, pressure surges, vibration, and contact with other mechanical components. Care must be taken to insure such restraints do not introduce additional stress or wear points.

4.5 Proper Connection of Ports: Proper physical installation of the Tube Assembly requires a correctly installed port connection insuring that no torque is transferred to the Tube when the Fittings are being tightened or otherwise during use.

4.6 External Damage: Proper installation is not complete without insuring that tensile loads, side loads, flattening, potential abrasion, thread damage or damage to sealing surfaces are corrected or eliminated. See instruction 2.10.

4.7 System Checkout: All air entrapment must be eliminated and the system pressurized to the maximum system pressure (at or below the Tube Assembly maximum working pressure) and checked for proper function and freedom from leaks. Personnel must stay out of potential hazardous areas while testing and using.

4.8 Routing: The Tube Assembly should be routed in such a manner so if a failure does occur, the escaping media will not cause personal injury or property damage. In addition, if fluid media comes in contact with hot surfaces, open flame or sparks, a fire or explosion may occur. See section 2.4.

#### 5.0 HOSE AND FITTING MAINTENANCE AND REPLACEMENT INSTRUCTIONS

5.1 Even with proper selection and installation, Hose life may be significantly reduced without a continuing maintenance program. The severity of the application, risk potential from a possible Hose failure, and experience with any Hose failures in the application or in similar applications should determine the frequency of the inspection and the replacement for the Products so that Products are replaced before any failure occurs. Certain products require maintenance and inspection per industry requirements. Failure to adhere to these requirements may lead to premature failure. A maintenance program must be established and followed by the user and, at minimum, must include instructions 5.2 through 5.7

5.2 Visual Inspection Hose/Fitting: Any of the following conditions require immediate shut down and replacement of the Hose Assembly:

- Fitting slippage on Hose;
- Damaged, cracked, cut or abraded cover (any reinforcement exposed);
- Hard, stiff, heat cracked, or charred Hose;
- Cracked, damaged, or badly corroded Fittings;
- Leaks at Fitting or in Hose;
- Kinked, crushed, flattened or twisted Hose; and
- Blistered, soft, degraded, or loose cover.

5.3 Visual Inspection All Other: The following items must be tightened, repaired, corrected or replaced as required:

- Leaking port conditions;
- Excess dirt buildup;/
- Worn clamps, guards or shields; and
- System fluid level, fluid type, and any air entrapment.

5.4 Functional Test: Operate the system at maximum operating pressure and check for possible malfunctions and leaks. Personnel must avoid potential hazardous areas while testing and using the system. See section 2.2.

5.5 Replacement Intervals: Hose assemblies and elastomeric seals used on Hose Fittings and adapters will eventually age, harden, wear and deteriorate under thermal cycling and compression set. Hose Assemblies and elastomeric seals should be inspected and replaced at specific replacement intervals, based on previous service life, government or industry recommendations, or when failures could result in unacceptable downtime, damage, or injury risk. See section 1.2. Hose and Fittings may be subjected to internal mechanical and/or chemical wear from the conveying fluid and may fail without warning. The user must determine the product life under such circumstances by testing. Also see section 2.5.

5.6 Hose Inspection and Failure: Hydraulic power is accomplished by utilizing high pressure fluids to transfer energy and do work. Hoses, Fittings and Hose Assemblies all contribute to this by transmitting fluids at high pressures. Fluids under pressure can be dangerous and potentially lethal and, therefore, extreme caution must be exercised when working with fluids under pressure and handling the Hoses transporting the fluids. From time to time, Hose Assemblies will fail if they are not replaced at proper time intervals. Usually these failures are the result of some form of misapplication, abuse, wear or failure to perform proper maintenance. When Hoses fail, generally the high pressure fluids inside escape in a stream which may or may not be visible to the user. Under no circumstances should the user attempt to locate the leak by "feeling" with their hands or any other part of their body. High pressure fluids can and will penetrate the skin and cause severe tissue damage and

possibly loss of limb. Even seemingly minor hydraulic fluid injection injuries must be treated immediately by a physician with knowledge of the tissue damaging properties of hydraulic fluid.

If a Hose failure occurs, immediately shut down the equipment and leave the area until pressure has been completely released from the Hose Assembly. Simply shutting down the hydraulic pump may or may not eliminate the pressure in the Hose Assembly. Many times check valves, etc., are employed in a system and can cause pressure to remain in a Hose Assembly even when pumps or equipment are not operating. Tiny holes in the Hose, commonly known as pinholes, can eject small, dangerously powerful but hard to see streams of hydraulic fluid. It may take several minutes or even hours for the pressure to be relieved so that the Hose Assembly may be examined safely.

Once the pressure has been reduced to zero, the Hose Assembly may be taken off the equipment and examined. It must always be replaced if a failure has occurred. Never attempt to patch or repair a Hose Assembly that has failed. Consult the nearest Parker distributor or the appropriate Parker division for Hose Assembly replacement information. . Never touch or examine a failed Hose Assembly unless it is obvious that the Hose no longer contains fluid under pressure. The high pressure fluid is extremely dangerous and can cause serious and potentially fatal injury.

5.7 Elastomeric seals: Elastomeric seals will eventually age, harden, wear and deteriorate under thermal cycling and compression set. Elastomeric seals should be inspected and replaced.

5.8 Refrigerant gases: Special care should be taken when working with refrigeration systems. Sudden escape of refrigerant gases can cause blindness if the escaping gases contact the eye and can cause freezing or other severe injuries if it contacts any other portion of the body.

5.9 Compressed natural gas (CNG): Parker CNG Hose Assemblies should be tested after installation and before use, and at least on a monthly basis per instructions provided on the Hose Assembly tag. The recommended procedure is to pressurize the Hose and check for leaks and to visually inspect the Hose for damage and to perform an electrical resistance test.

Caution: Matches, candles, open flame or other sources of ignition shall not be used for Hose inspection. Leak check solutions should be rinsed off after use.

#### 6.0 HOSE STORAGE

6.1 Age Control: Hose and Hose Assemblies must be stored in a manner that facilitates age control and first-in and first-out usage based on manufacturing date of the Hose and Hose Assemblies. Unless otherwise specified by the manufacturer or defined by local laws and regulations:

6.1.1 The shelf life of rubber hose in bulk form or hose made from two or more materials is 28 quarters (7 years) from the date of manufacture, with an extension of 12 quarters (3 years), if stored in accordance with ISO 2230;

6.1.2 The shelf life of thermoplastic and polytetrafluoroethylene hose is considered to be unlimited;

6.1.3 Hose assemblies that pass visual inspection and proof test shall not be stored for longer than 2 years.

6.1.4 Storage: Stored Hose and Hose Assemblies must not be subjected to damage that could reduce their expected service life and must be placed in a cool, dark and dry area with the ends capped. Stored Hose and Hose Assemblies must not be exposed to temperature extremes, ozone, oils, corrosive liquids or fumes, solvents, high humidity, rodents, insects, ultraviolet light, electromagnetic fields or radioactive materials.

# ENERPAC Warranty Policy

For those ENERPAC items sold as part of the Parker Parflex Division product offering, the following warranty applies.

ENERPAC products are warranted to be free of defects in materials and workmanship under normal use for as long as they are owned by the original purchaser, subject to the exclusions and limitations described below. This warranty does not cover ordinary wear and tear, overloading, alterations, (including repairs or attempted repairs by parties other than ENERPAC or its authorized service representatives), improper fluid, use in a manner for which they are not intended or use which is contrary to instructions for the products.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ALL OTHER EXPRESS AND IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The remedy of repair, replacement or refund is customer's exclusive remedy in the event of breach of this warranty.

THIS WARRANTY IS LIMITED TO NEW PRODUCTS SOLD THROUGH ENERPAC AUTHORIZED DISTRIBUTORS, ORIGINAL EQUIPMENT MANUFACTURERS OR OTHER DESIGNATED CHANNELS OF DISTRIBUTION. NO AGENT, EMPLOYEE, OR OTHER REPRESENTATIVE OF ENERPAC HAS THE AUTHORITY TO IN ANY WAY CHANGE OR AMEND THIS WARRANTY.

SELLER SHALL NOT BE SUBJECT TO AND DISCLAIMS:

- (a) ANY OTHER OBLIGATIONS OR LIABILITIES ARISING OUT OF BREACH OF CONTRACT OR OF WARRANTY,
- (b) ANY OBLIGATIONS WHATSOEVER ARISING FROM TORT CLAIMS (INCLUDING NEGLIGENCE AND STRICT LIABILITY) OR ARISING UNDER THEORIES OR LAW WITH RESPECT TO PRODUCTS SOLD OR SERVICES RENDERED BY SELLER OR ANY UNDERTAKINGS, ACTS OR OMISSIONS RELATING THERETO, AND
- (c) ALL CONSEQUENTIAL, INCIDENTAL AND CONTINGENT DAMAGES WHATSOEVER.

Electronic products and components are warranted against defects in material and workmanship for a period of two years from the date of purchase.

The following items supplied with ENERPAC products are excluded from this warranty:

Components not manufactured by ENERPAC, including air motors, electric motors, gasoline engines, and diesel engines. Such items are warranted to the extent of the warranty provided by the manufacturers of such items.

ENERPAC's liability in all cases is limited to, and shall not exceed, the purchase price paid.

If the customer believes a product is defective, the product must be delivered, or shipped freight prepaid, to the nearest ENERPAC Authorized Service Center. The customer should contact ENERPAC to locate and Authorized Service Center in the customer's area.

For the nearest authorized ENERPAC SERVICE CENTER, please call ENERPAC at 1-800-558-0530 or visit the ENERPAC web site at [www.Enerpac.com](http://www.Enerpac.com).

Products that do not conform to this warranty will be returned by ground transportation, freight prepaid.

# Offer of Sale

## PARKER-HANNIFIN CORPORATION OFFER OF SALE

1. **Definitions.** As used herein, the following terms have the meanings indicated.

Buyer:	means any customer receiving a Quote for Products from Seller.
Goods:	means any tangible part, system or component to be supplied by the Seller.
Products:	means the Goods, Services and/or Software as described in a Quote provided by the Seller.
Quote:	means the offer or proposal made by Seller to Buyer for the supply of Products.
Seller:	means Parker-Hannifin Corporation, including all divisions and businesses thereof.
Services:	means any services to be supplied by the Seller.
Software:	means any software related to the Products, whether embedded or separately downloaded.
Terms:	means the terms and conditions of this Offer of Sale or any newer version of the same as published by Seller electronically at <a href="http://www.parker.com/saleterms">www.parker.com/saleterms</a> .

2. **Terms.** All sales of Products by Seller are contingent upon, and will be governed by, these Terms and, these Terms are incorporated into any Quote provided by Seller to any Buyer. Buyer's order for any Products whether communicated to Seller verbally, in writing, by electronic data interface or other electronic commerce, shall constitute acceptance of these Terms. Seller objects to any contrary or additional terms or conditions of Buyer. Reference in Seller's order acknowledgement to Buyer's purchase order or purchase order number shall in no way constitute an acceptance of any of Buyer's terms of purchase. No modification to these Terms will be binding on Seller unless agreed to in writing and signed by an authorized representative of Seller.

3. **Price; Payment.** The Products set forth in Seller's Quote are offered for sale at the prices indicated in Seller's Quote. Unless otherwise specifically stated in Seller's Quote, prices are valid for thirty (30) days and do not include any sales, use, or other taxes or duties. Seller reserves the right to modify prices at any time to adjust for any raw material price fluctuations. Unless otherwise specified by Seller, all prices are F.C.A. Seller's facility (INCOTERMS 2010). All sales are contingent upon credit approval and payment for all purchases is due thirty (30) days from the date of invoice (or such date as may be specified in the Quote). Unpaid invoices beyond the specified payment date incur interest at the rate of 1.5% per month or the maximum allowable rate under applicable law.

4. **Shipment; Delivery; Title and Risk of Loss.** All delivery dates are approximate. Seller is not responsible for damages resulting from any delay. Regardless of the manner of shipment, delivery occurs and title and risk of loss or damage pass to Buyer, upon placement of the Products with the shipment carrier at Seller's facility. Unless otherwise agreed, Seller may exercise its judgment in choosing the carrier and means of delivery. No deferment of shipment at Buyers' request beyond the respective indicated shipping date will be made except on terms that will indemnify, defend and hold Seller harmless against all loss and additional expense. Buyer shall be responsible for any additional shipping charges incurred by Seller due to Buyer's acts or omissions.

5. **Warranty.** The warranty related to the Products is as follows: (i) Goods are warranted against defects in material or workmanship for a period of twelve (12) months from the date of delivery or 2,000 hours of use, whichever occurs first; (ii) Services shall be performed in accordance with generally accepted practices and using the degree of care and skill that is ordinarily exercised and customary in the field to which the Services pertain and are warranted for a period of six (6) months from the completion of the Services by Seller; and (iii) Software is only warranted to perform in accordance with applicable specifications provided by Seller to Buyer for ninety (90) days from the date of delivery or, when downloaded by a Buyer or end-user, from the date of the initial download. All prices are based upon the exclusive limited warranty stated above, and upon the following disclaimer:

**DISCLAIMER OF WARRANTY: THIS WARRANTY IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO PRODUCTS. SELLER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS AND IMPLIED, INCLUDING DESIGN, NONINFRINGEMENT, MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE. SELLER DOES NOT WARRANT THAT THE SOFTWARE IS ERROR-FREE OR FAULT-TOLERANT, OR THAT**

**BUYER'S USE THEREOF WILL BE SECURE OR UNINTERRUPTED. BUYER AGREES AND ACKNOWLEDGES THAT UNLESS OTHERWISE AUTHORIZED IN WRITING BY SELLER THE SOFTWARE SHALL NOT BE USED IN CONNECTION WITH HAZARDOUS OR HIGH RISK ACTIVITIES OR ENVIRONMENTS. EXCEPT AS EXPRESSLY STATED HEREIN, ALL PRODUCTS ARE PROVIDED "AS IS".**

6. **Claims; Commencement of Actions.** Buyer shall promptly inspect all Products upon receipt. No claims for shortages will be allowed unless reported to the Seller within ten (10) days of delivery. Buyer shall notify Seller of any alleged breach of warranty within thirty (30) days after the date the non-conformance is or should have been discovered by Buyer. Any claim or action against Seller based upon breach of contract or any other theory, including tort, negligence, or otherwise must be commenced within twelve (12) months from the date of the alleged breach or other alleged event, without regard to the date of discovery.
7. **LIMITATION OF LIABILITY.** IN THE EVENT OF A BREACH OF WARRANTY, SELLER WILL, AT ITS OPTION, REPAIR OR REPLACE THE NON-CONFORMING PRODUCT, RE-PERFORM THE SERVICES, OR REFUND THE PURCHASE PRICE PAID WITHIN A REASONABLE PERIOD OF TIME. **IN NO EVENT IS SELLER LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR AS THE RESULT OF, THE SALE, DELIVERY, NON- DELIVERY, SERVICING, NON-COMPLETION OF SERVICES, USE, LOSS OF USE OF, OR INABILITY TO USE THE PRODUCTS OR ANY PART THEREOF, LOSS OF DATA, IDENTITY, PRIVACY, OR CONFIDENTIALITY, OR FOR ANY CHARGES OR EXPENSES OF ANY NATURE INCURRED WITHOUT SELLER'S WRITTEN CONSENT, WHETHER BASED IN CONTRACT, TORT OR OTHER LEGAL THEORY. IN NO EVENT SHALL SELLER'S LIABILITY UNDER ANY CLAIM MADE BY BUYER EXCEED THE PURCHASE PRICE PAID FOR THE PRODUCTS.**
8. **Loss to Buyer's Property.** Any designs, tools, patterns, materials, drawings, confidential information or equipment furnished by Buyer or any other items which are or become Buyer's property, will be considered obsolete and may be destroyed by Seller after two (2) consecutive years have elapsed without Buyer ordering the Products manufactured using such property. Seller shall not be responsible for any loss or damage to such property while it is in Seller's possession or control.
9. **Special Tooling.** Special Tooling includes but is not limited to tooling, jigs, fixtures and associated manufacturing equipment acquired or necessary to manufacture Products. A tooling charge may be imposed for any Special Tooling. Such Special Tooling shall be and remain Seller's property notwithstanding payment of any charges by Buyer. In no event will Buyer acquire any interest in Special Tooling belonging to Seller that is utilized in the manufacture of the Products, even if such Special Tooling has been specially converted or adapted for such manufacture and notwithstanding any charges paid by Buyer. Unless otherwise agreed, Seller has the right to alter, discard or otherwise dispose of any Special Tooling or other property in its sole discretion at any time.
10. **Security Interest.** To secure payment of all sums due, Seller retains a security interest in all Products delivered to Buyer and, Buyer's acceptance of these Terms is deemed to be a Security Agreement under the Uniform Commercial Code. Buyer authorizes Seller as its attorney to execute and file on Buyer's behalf all documents Seller deems necessary to perfect its security interest.
11. **User Responsibility.** The Buyer through its own analysis and testing, is solely responsible for making the final selection of the Products and assuring that all performance, endurance, maintenance, safety and warning requirements of the application of the Products are met. The Buyer must analyze all aspects of the application and follow applicable industry standards, specifications, and other technical information provided with the Product. If Seller provides Product options based upon data or specifications provided by the Buyer, the Buyer is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the Products. In the event the Buyer is not the end-user, Buyer will ensure such end-user complies with this paragraph.
12. **Use of Products, Indemnity by Buyer.** Buyer shall comply with all instructions, guides and specifications provided by Seller with the Products. Unauthorized Uses. If Buyer uses or resells the Products for any uses prohibited in Seller's instructions, guides or specifications, or Buyer otherwise fails to comply with Seller's instructions, guides and specifications, Buyer acknowledges that any such use, resale, or non-

Continued on next page

For detailed ordering information, please consult price list or contact Parflex Division.

compliance is at Buyer's sole risk. Buyer shall indemnify, defend, and hold Seller harmless from any losses, claims, liabilities, damages, lawsuits, judgments and costs (including attorney fees and defense costs), whether for personal injury, property damage, intellectual property infringement or any other claim, brought by or incurred by Buyer, Buyer's employees, or any other person, arising out of: (a) improper selection, application, design, specification or other misuse of Products provided by Seller; (b) any act or omission, negligent or otherwise, of Buyer; (c) Seller's use of patterns, tooling, equipment, plans, drawings, designs or specifications or other information or things furnished by Buyer; (d) damage to the Products from an external cause, repair or attempted repair by anyone other than Seller, failure to follow instructions, guides and specifications provided by Seller, use with goods not provided by Seller, or opening, modifying, deconstructing or tampering with the Products for any reason; or (e) Buyer's failure to comply with these Terms. Seller shall not indemnify Buyer under any circumstance except as otherwise provided in these Terms.

13. **Cancellations and Changes.** Buyer may not cancel or modify any order for any reason, except with Seller's written consent and upon terms that will indemnify, defend and hold Seller harmless against all direct, incidental and consequential loss or damage. Seller, at any time, may change Product features, specifications, designs and availability.
14. **Limitation on Assignment.** Buyer may not assign its rights or obligations without the prior written consent of Seller.
15. **Force Majeure.** Seller does not assume the risk and is not liable for delay or failure to perform any of Seller's obligations by reason of events or circumstances beyond its reasonable control ("Events of Force Majeure"). Events of Force Majeure shall include without limitation: accidents, strikes or labor disputes, acts of any government or government agency, acts of nature, delays or failures in delivery from carriers or suppliers, shortages of materials, or any other cause beyond Seller's reasonable control.
16. **Waiver and Severability.** Failure to enforce any provision of these Terms will not invalidate that provision; nor will any such failure prejudice Seller's right to enforce that provision in the future. Invalidation of any provision of these Terms by legislation or other rule of law shall not invalidate any other provision herein and, the remaining provisions will remain in full force and effect.
17. **Termination.** Seller may terminate any agreement governed by or arising from these Terms for any reason and at any time by giving Buyer thirty (30) days prior written notice. Seller may immediately terminate, in writing, if Buyer: (a) breaches any provision of these Terms (b) appoints a trustee, receiver or custodian for all or any part of Buyer's property (c) files a petition for relief in bankruptcy on its own behalf, or one if filed by a third party (d) makes an assignment for the benefit of creditors; or (e) dissolves its business or liquidates all or a majority of its assets.
18. **Ownership of Software.** Seller retains ownership of all Software supplied to Buyer hereunder. In no event shall Buyer obtain any greater right in and to the Software than a right in the nature of a license limited to the use thereof and subject to compliance with any other terms provided with the Software.
19. **Indemnity for Infringement of Intellectual Property Rights.** Seller is not liable for infringement of any patents, trademarks, copyrights, trade dress, trade secrets or similar rights ("Intellectual Property Rights") except as provided in this Section. Seller will defend at its expense and will pay the cost of any settlement or damages awarded in an action brought against Buyer based on a third party claim that one or more of the Products sold hereunder infringes the Intellectual Property Rights of a third party in the country of delivery of the Products by the Seller to the Buyer. Seller's obligation to defend and indemnify Buyer is contingent on Buyer notifying Seller within ten (10) days after Buyer becomes aware of any such claim, and Seller having sole control over the defense of the claim including all negotiations for settlement or compromise. If one or more Products sold hereunder is subject to such a claim, Seller may, at its sole expense and option, procure for Buyer the right to continue using the Products, replace or modify the Products so as to render them non-infringing, or offer to accept return of the Products and refund the purchase price less a reasonable allowance for depreciation. Seller has no obligation or liability for any claim of infringement: (i) arising from information provided by Buyer; or (ii) directed to any Products provided hereunder for which the designs are specified in whole or part by Buyer; or (iii) resulting from the modification, combination or use in a system

of any Products provided hereunder. The foregoing provisions of this Section constitute Seller's sole and exclusive liability and Buyer's sole and exclusive remedy for such claims of infringement of Intellectual Property Rights.

20. **Governing Law.** These Terms and the sale and delivery of all Products are deemed to have taken place in, and shall be governed and construed in accordance with, the laws of the State of Ohio, as applicable to contracts executed and wholly performed therein and without regard to conflicts of laws principles. Buyer irrevocably agrees and consents to the exclusive jurisdiction and venue of the courts of Cuyahoga County, Ohio with respect to any dispute, controversy or claim arising out of or relating to the sale and delivery of the Products.
21. **Entire Agreement.** These Terms, along with the terms set forth in the main body of any Quote, forms the entire agreement between the Buyer and Seller and constitutes the final, complete and exclusive expression of the terms of sale. In the event of a conflict between any term set forth in the main body of a Quote and these Terms, the terms set forth in the main body of the Quote shall prevail. All prior or contemporaneous written or oral agreements or negotiations with respect to the subject matter shall have no effect. These Terms may not be modified unless in writing and signed by an authorized representative of Seller.
22. **Compliance with Laws.** Buyer agrees to comply with all applicable laws, regulations, and industry and professional standards, including those of the United States of America, and the country or countries in which Buyer may operate, including without limitation the U.S. Foreign Corrupt Practices Act ("FCPA"), the U.S. Anti-Kickback Act ("Anti-Kickback Act"), U.S. and E.U. export control and sanctions laws ("Export Laws"), the U.S. Food Drug and Cosmetic Act ("FDCA"), and the rules and regulations promulgated by the U.S. Food and Drug Administration ("FDA"), each as currently amended. Buyer agrees to indemnify, defend, and hold harmless Seller from the consequences of any violation of such laws, regulations and standards by Buyer, its employees or agents. Buyer acknowledges that it is familiar with all applicable provisions of the FCPA, the Anti-Kickback Act, Export Laws, the FDCA and the FDA and certifies that Buyer will adhere to the requirements thereof and not take any action that would make Seller violate such requirements. Buyer represents and agrees that Buyer will not make any payment or give anything of value, directly or indirectly, to any governmental official, foreign political party or official thereof, candidate for foreign political office, or commercial entity or person, for any improper purpose, including the purpose of influencing such person to purchase Products or otherwise benefit the business of Seller. Buyer further represents and agrees that it will not receive, use, service, transfer or ship any Product from Seller in a manner or for a purpose that violates Export Laws or would cause Seller to be in violation of Export Laws.

# Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 1 800 C-Parker (1 800 272 7537)

## Aerospace

### Key Markets

Aftermarket services  
Commercial transports  
Engines  
General & business aviation  
Helicopters  
Launch vehicles  
Military aircraft  
Missiles  
Power generation  
Regional transports  
Unmanned aerial vehicles

### Key Products

Control systems & actuation products  
Engine systems & components  
Fluid conveyance systems & components  
Fluid metering, delivery & atomization devices  
Fuel systems & components  
Fuel tank inerting systems  
Hydraulic systems & components  
Thermal management  
Wheels & brakes

## Climate Control

### Key Markets

Agriculture  
Air conditioning  
Construction Machinery  
Food & beverage  
Industrial machinery  
Life sciences  
Oil & gas  
Precision cooling  
Process  
Refrigeration  
Transportation

### Key Products

Accumulators  
Advanced actuators  
CO<sub>2</sub> controls  
Electronic controllers  
Filter driers  
Hand shut-off valves  
Heat exchangers  
Hose & fittings  
Pressure regulating valves  
Refrigerant distributors  
Safety relief valves  
Smart pumps  
Thermostatic expansion valves

## Electromechanical

### Key Markets

Aerospace  
Factory automation  
Life science & medical  
Machine tools  
Packaging machinery  
Paper machinery  
Plastics machinery & converting  
Primary metals  
Semiconductor & electronics  
Textile  
Wire & cable

### Key Products

AC/DC drives & systems  
Electric actuators, gantry robots & slides  
Electrohydraulic actuation systems  
Electromechanical actuation systems  
Human machine interface  
Linear motors  
Stepper motors, servo motors, drives & controls  
Structural extrusions

## Filtration

### Key Markets

Aerospace  
Food & beverage  
Industrial plant & equipment  
Life sciences  
Marine  
Mobile equipment  
Oil & gas  
Power generation & renewable energy  
Process  
Transportation  
Water Purification

### Key Products

Analytical gas generators  
Compressed air filters & dryers  
Engine air, coolant, fuel & oil filtration systems  
Fluid condition monitoring systems  
Hydraulic & lubrication filters  
Hydrogen, nitrogen & zero air generators  
Instrumentation filters  
Membrane & fiber filters  
Microfiltration  
Sterile air filtration  
Water desalination & purification filters & systems

## Fluid & Gas Handling

### Key Markets

Aerial lift  
Agriculture  
Bulk chemical handling  
Construction machinery  
Food & beverage  
Fuel & gas delivery  
Industrial machinery  
Life sciences  
Marine  
Mining  
Mobile  
Oil & gas  
Renewable energy  
Solenoid valves  
Transportation

### Key Products

Check valves  
Connectors for low pressure fluid conveyance  
Deep sea umbilicals  
Diagnostic equipment  
Hose couplings  
Industrial hose  
Mooring systems & power cables  
PTFE hose & tubing  
Quick couplings  
Rubber & thermoplastic hose  
Tube fittings & adapters  
Tubing & plastic fittings

## Hydraulics

### Key Markets

Aerial lift  
Agriculture  
Alternative energy  
Construction machinery  
Forestry  
Industrial machinery  
Machine tools  
Marine  
Material handling  
Mining  
Oil & gas  
Power generation  
Refuse vehicles  
Renewable energy  
Truck hydraulics  
Turf equipment

### Key Products

Accumulators  
Cartridge valves  
Electrohydraulic actuators  
Human machine interfaces  
Hybrid drives  
Hydraulic cylinders  
Hydraulic motors & pumps  
Hydraulic systems  
Hydraulic valves & controls  
Hydrostatic steering  
Integrated hydraulic circuits  
Power take-offs  
Power units  
Rotary actuators  
Sensors

## Pneumatics

### Key Markets

Aerospace  
Conveyor & material handling  
Factory automation  
Life science & medical  
Machine tools  
Packaging machinery  
Transportation & automotive

### Key Products

Air preparation  
Brass fittings & valves  
Manifolds  
Pneumatic accessories  
Pneumatic actuators & grippers  
Pneumatic valves & controls  
Quick disconnects  
Rotary actuators  
Rubber & thermoplastic hose & couplings  
Structural extrusions  
Thermoplastic tubing & fittings  
Vacuum generators, cups & sensors

## Process Control

### Key Markets

Alternative fuels  
Biopharmaceuticals  
Chemical & refining  
Food & beverage  
Marine & shipbuilding  
Medical & dental  
Microelectronics  
Nuclear Power  
Offshore oil exploration  
Oil & gas  
Pharmaceuticals  
Power generation  
Pulp & paper  
Steel  
Water/wastewater

### Key Products

Analytical Instruments  
Analytical sample conditioning products & systems  
Chemical injection fittings & valves  
Fluoropolymer chemical delivery fittings, valves & pumps  
High purity gas delivery fittings, valves, regulators & digital flow controllers  
Industrial mass flow meters/ controllers  
Permanent no-weld tube fittings  
Precision industrial regulators & flow controllers  
Process control double block & bleeds  
Process control fittings, valves, regulators & manifold valves

## Sealing & Shielding

### Key Markets

Aerospace  
Chemical processing  
Consumer  
Fluid power  
General industrial  
Information technology  
Life sciences  
Microelectronics  
Military  
Oil & gas  
Power generation  
Renewable energy  
Telecommunications  
Transportation

### Key Products

Dynamic seals  
Elastomeric o-rings  
Electro-medical instrument design & assembly  
EMI shielding  
Extruded & precision-cut, fabricated elastomeric seals  
High temperature metal seals  
Homogeneous & inserted elastomeric shapes  
Medical device fabrication & assembly  
Metal & plastic retained composite seals  
Shielded optical windows  
Silicone tubing & extrusions  
Thermal management  
Vibration dampening

ENGINEERING YOUR SUCCESS.

# Parker Fluid Connectors Group

## North American Divisions & Distribution Service Centers

**Your complete source** for quality tube fittings, hose & hose fittings, brass & composite fittings, quick-disconnect couplings, valves and assembly tools, locally available from a worldwide network of authorized distributors.

### **Fittings:**

Available in inch and metric sizes covering SAE, BSP, DIN, GAZ, JIS and ISO thread configurations, manufactured from steel, stainless steel, brass, aluminum, nylon and thermoplastic.

### **Hose, Tubing and Bundles:**

Available in a wide variety of sizes and materials including rubber, wire-reinforced, thermoplastic, hybrid and custom compounds.

### **Worldwide Availability:**

Parker operates Fluid Connectors manufacturing locations and sales offices throughout North America, South America, Europe and Asia-Pacific.

**For information,** call toll free...

## **North American Divisions**

### **Fluid System Connectors Division**

Otsego, MI  
phone 269 694 9411  
fax 269 694 4614

### **Hose Products Division**

Wickliffe, OH  
phone 440 943 5700  
fax 440 943 3129

### **Industrial Hose Division**

Wickliffe, OH  
phone 440 883 2120  
fax 440 833 2230

### **Parflex Division**

Ravenna, OH  
phone 330 296 2871  
fax 330 296 8433

### **Quick Coupling Division**

Minneapolis, MN  
phone 763 544 7781  
fax 763 544 3418

### **Tube Fittings Division**

Columbus, OH  
phone 614 279 7070  
fax 614 279 7685

## **Distribution Service Centers**

### **Buena Park, CA**

phone 714 522 8840  
fax 714 994 1183

### **Conyers, GA**

phone 770 929 0330  
fax 770 929 0230

### **Louisville, KY**

phone 502 937 1322  
fax 502 937 4180

### **Portland, OR**

phone 503 283 1020  
fax 503 283 2201

### **Toledo, OH**

phone 419 878 7000  
fax 419 878 7001  
fax 419 878 7420  
(FCG Kit Operations)

### **Canada**

#### **Grimsby, ONT**

phone 905 945 2274  
fax 905 945 3945  
(Contact Grimsby for other Service Center locations.)

### **Mexico**

#### **Toluca, MEX**

phone (52) 722 2754 200  
fax (52) 722 2722 168
