

# Welcome to Nordson MEDICAL's Interactive Catalog!

In order to meet the needs of our customers, Nordson MEDICAL has chosen to develop a user-friendly tool that allows for quick and easy access to our vast selection of parts, along with their specifications and technical information. Within this PDF, you will enjoy the following features:

## Part Description and Image Hyperlinks

Click on each part to view pricing, see part drawings, and add parts to your shopping cart.

## Various Messages Within Sections

These messages will link you to product line details such as datasheets and part drawings.

## **Online Technical Information**

Use the catalog's technical charts to link to online data.

## Bookmarks and Interactive Table of Contents

For easy navigation, use these tools to jump to different product lines within the catalog.

## **Barb Style Descriptions**

Click on this section to access specifications for each style.

## **Material Data Panels**

Refer to these side panels for definitions of part extensions and click to view material data online.

## **In-Text References**

E-mails, page number, and website references will link you to the appropriate location.

## **Designer Kit Details**

Click on designer kit headers to view part maps.

## Interactive Index

This tool allows you to quickly access a specific part within the catalog.

## **Search Capabilities**

Use the search tool to find keywords throughout the PDF.

## **Offline Access**

Download the catalog and save it to your computer for quick and easy offline access!

## Welcome to Nordson MEDICAL!

Thank you for your interest in our products. If you're a current customer, we appreciate your business and look forward to exceeding your expectations in the future. If you're seeing us for the first time, we welcome the opportunity to earn your trust.

Nordson MEDICAL is your partner in the global life sciences market bringing you the combined excellence of Value Plastics' precision plastic fluid components, biomaterial delivery devices, and Avalon Laboratories' catheter solutions, along with a wide range of capabilities, services, and customized OEM solutions.

Nordson MEDICAL is backed by the extensive resources of Nordson Corporation (Nasdaq: NDSN), the world leader in precision dispensing, fluid management and related technologies.

## What We Do

The Value Plastics product line includes over 4,000 fluid management components designed specifically for flexible tubing in different style and material combinations. Products include quick connect fittings, luer fittings, check valves, bioprocessing fittings, tube-to-tube fittings, threaded fittings and blood pressure monitoring components with tubing IDs ranging from 1/16" to 1". We also offer custom component manufacturing, tubing, select medical OEM components and our TUBESETTER® fitting inserters to facilitate device assembly. Our application expertise extends to bioprocessing, blood pressure, cardiovascular, opthalmic, and more. Value Plastics products find global application in demanding healthcare OEM, research and specialty industrial applications.

## Your Assurance of VP Quality

How can you be sure that you're getting a genuine Value Plastics<sup>®</sup> fitting? Look for the Value Plastics logo. Molded into every fluid management component we manufacture, this logo is your assurance you are producing the highest quality items. By relying on our superior tooling and craftsmanship, you can be assured that you will have the best OEM tubing components in your products.

To protect our intellectual property and our customers, it is important to be aware of the patents and trademarks that apply to our products. Look for the Value Plastics logo ( $\gamma$ ) to ensure you do not mistakenly use a poor quality counterfeit of a Value Plastics<sup>®</sup> fitting, thereby jeopardizing the integrity and quality of your product. Many attributes of our components are covered by patent, including but not limited to, barb, grips, function and other design features.

## Our Quality Commitment to You

At Nordson MEDICAL, quality is designed in from the outset; it's not an add-on at the end of the process. We are an FDA registered manufacturing facility and our Quality Management System is designed as a system of interrelated processes meeting the requirements of ISO 13485 and ISO 9001. We welcome our customers to conduct an on-site supplier audit with the knowledge that our systems have satisfied the most demanding requirements of medical device manufacturers worldwide. We are dedicated to exceeding your expectations.

#### Clean Room Manufacturing

Most Nordson MEDICAL products are manufactured and packaged in an environment that meets the requirements of ISO 14644-1 Class 8 (Class 100,000) standards. We utilize both manual and automated assembly processes tailored to manufacture the highest quality components, biomaterial delivery systems, and catheter solutions.

#### Assembly and Finishing Capabilities

Utilizing hypotube bending, ultrasonic welding and polymer solution casting, Nordson MEDICAL's quality products are sophisticated and reliable. We have a solid reputation in today's medical device and biotech markets with pressure and leak testing. We also offer manual, semi-automatic, and fully automatic finished good assembly.

## Design, Engineering and R&D

Nordson MEDICAL's staff of product development professionals uses the most modern equipment to design the best products available anywhere. Whether your need is for new products or custom solutions, our focus on healthcare OEMs means we understand your needs and don't need to be coached to your industry requirements. Designs incorporating human factors, finite element analysis, DFMA, rapid prototyping and concurrent engineering are just some of the tools used to bring you the components you require, when you want them.

### Manufacturing Consistency

Nordson MEDICAL is equipped with multiple injection molding machines including plastic injection molding and over molding including 2-shot and insert molding. Our all-electric injection molding presses are chosen for shotto-shot consistency and outfitted with the most up-to-date process monitoring software available. Each operator is responsible for product quality at the press and has every tool at their disposal. All molding, secondary operations and packaging take place in a controlled environment to assure component readiness for your production floor.

## **Rapid Prototyping**

Nordson MEDICAL's engineering department is a leader in the industry. Using rapid prototyping and an in-house, high performance 3D printer, we can utilize multiple resins to provide certain material properties to components. We can execute highly representative prototypes and build a mold in two days, allowing us to deliver solutions with testable parts in a short time.

We use a system to verify potential product performance to expedite quality product design and development. The use of several tooling technologies allows us to incorporate innovative materials and processes to provide plastic components in a fraction of the time it may take to utilize metals.

We also execute detailed processes for evaluating application requirements to ensure the design focuses on ease of use, cost efficiency, design manufacturability, and top notch performance.

#### Regulatory Management

Nordson MEDICAL strives to provide our customers with the most up-to-date technical information, directly from the resin manufacturer, on the resins we use. We maintain a comprehensive list of all material and regulatory information, enabling you to select the most appropriate products for your particular application. Information we provide includes:

- Regulatory data
- Material data
- MSDS
- Typical resin properties
- Sterilization stability information
- Chemical resistance information

Visit www.nordsonmedical.com for technical information.

#### Custom Packaging and Labeling

Nordson MEDICAL has the ability to provide custom packaging, labeling and private branding to meet your needs, including:

- Trays
- ArtworkIFUs
- 105
- Customized product labelsOrders made to your specifications
- Unique packaging Information

### **Customer Satisfaction**

As with all of our medical parts, each bag comes with a product certification and traceable lot number. Our parts are manufactured and bagged in a clean room environment to accelerate your own usage.

At Nordson MEDICAL, we are dedicated to exceeding your expectations. As such, it is important to us that when you place an order you know exactly what to expect, when to expect it and that we will do everything we can to ensure that you receive components made to the required specifications.

Nordson MEDICAL implements and regulates an internal customer support system. Our goal is to provide you exceptional service and quality solutions. We track all support issues in order to meet ISO requirements, enhance customer satisfaction, and to continuously improve our initiatives.

When a support issue concerns one of our products, we begin an immediate investigation of our available stock and quarantine any suspected parts. We then complete all required formal corrective actions and inform the customer when the issue is resolved.

To contact customer service, please call us at (888) 404-5837 or (970) 267-5200.

## Contact Us

Visit us at www.nordsonmedical.com for all your low pressure fluid management needs.

## **CATHETER SOLUTIONS**

## OsteoPrecision<sup>™</sup> and OsteoXpress<sup>™</sup> Graft Delivery Devices

Nordson MEDICAL's graft delivery devices are designed to deliver allograft, autograft or synthetic bone graft materials to an orthopedic surgical site.

In addition, they are designed to facilitate the premixing of bone graft materials with fluids such as IV fluids, blood, plasma, platelet rich plasma, bone marrow or other specified blood components as deemed necessary by the clinical use requirements.

## FibriJet® Biomaterial Applicators and Tips

The FibriJet line of biomaterial applicators and tips is the "gold standard" featuring proven designs of single use applicators and tips for the dispensing of single and multicomponent biomaterial. Our biomaterial delivery systems offer modularity and flexibility to meet the needs of many surgical procedures.

FibriJet biomaterial applicators and tips are used to accurately control and dispense biomaterials such as tissue sealants, hemostats, and concentrated plasma gel to control bleeding, heal wounds, and other related medical procedures. Single and dual syringe applicators and an extensive line of interchangeable tips meet the particular needs of specific surgical procedures. FibriJet products dispense a single material or simultaneously dispense two materials to a localized treatment site with simple, onehanded operation.

## Polymer Solution Casting<sup>™</sup>

The Avalon product line includes cannulae, wire-reinforced catheters and specialized medical tubing. Avalon's polymer solution casting<sup>™</sup> technology provides the ability to add multiple components, varying wall thickness or diameter along the length of a medical device. Customized medical tubing options include single to multi-lumens, coil, braid or hypotube reinforcements, bump tubing, imaging targets, custom atraumatic, tapered and reinforced tips, holes or ports, and lubricious surfaces available in a single piece construction. Avalon offers secondary operations (pad printing, tipping, skiving, hole punching, forming, bonding, custom branding, packaging and labeling) and subassembly to finished device services.

Polymer solution casting methods allow us to incorporate materials with different properties including strength, lubricity, flexibility, color and multi-lumens - to customize tubing for any application.

Avalon has a full team of engineers that create uncompromising, cost-effective medical devices. Our engineering expertise includes development, manufacturing, quality and material science.

7

## We Have Moved

We are very proud and excited to have built a new manufacturing facility on a 116 acre site in Loveland, Colorado to meet growing demand in medical end markets for its Value Plastics brand of engineered, single-use plasticmolded fluid management components and to provide flexibility and capacity for continued long term growth.

The state-of-the-art, 115,000 square foot facility is located seven miles away from our previous Fort Collins facility and is self-contained from in-house product design through tooling, manufacturing, assembly and packaging. Customer support, sales and marketing resources support the world from this single facility.

If you have any questions about our location change or the Validation Master Plan, please contact your Nordson Medical account manager or customer service at (888) 404-5837.

## Nordson MEDICAL

805 West 71st Street Loveland, CO 80538

## Loveland, Colorado Facility

- 115,000 square foot facility
- Clean room molding and packaging
- ISO 13485 and ISO 9001 certified
- Highly automated facility
- NPD and design services
- R&D/testing lab
- FDA registered

## Eagan, Minnesota Facility

Our biomaterial delivery technology center is located in Eagan, Minnesota, just outside of St. Paul.

## Guaymas, Mexico and Rancho Dominguez, California Facilities

Avalon currently operates two FDA-registered and ISO 13485 certified facilities in California and Mexico.

- FDA registered
- ISO 13485 certified
- Manufacturing of complex products

## ISO 80369 Compliant Connectors

Nordson MEDICAL now offers compliant connectors for the new ISO 80369-3 standards for enteral and gastric small bore connectors as well as the ISO 80369-5 limb cuff inflation standards for blood pressure cuffs. **PG-12** 

## Nordson MEDICAL's Quick Connect Line is Incredible

Incredibly broad - We have over 170 quick connect configurations, arguably the most extensive line of quick connect couplers developed exclusively for the medical market. Incredibly versatile - Our quick connector series now offer a full range of fluid path diameters from 1/8" to 1/2" in push-toconnect, quarter-turn, thumb latch, and side-

latch connections. Also, the available pressure range is staggering, with a variety of sealing surfaces to choose from. The connectors also offer resin choices that afford multiple sterilization options, MRI compatibility, animal-free options, as well as bioburden, cytotoxicity, and extractable testing data available upon request. **PG-16** 

## PQC Series Small Bore Quick Connects

PQC Series products are produced in acetal and polypropylene in four configurations – threaded, inline straight, elbows and panel mounts. These quick connectors bring performance and convenience to your tubing applications. Offered in small tubing sizes to fit 1/8" (3.2 mm) and 1/4" (6.4 mm) ID tubing, the 3200 Series triple barb style works well with semi-rigid tubing. **PG-17** 

## High Flow Check Valve

Featuring a flowrate  $\geq$  3,000 ml/min with water at a pressure of 1 bar, our high flow check valve fits 8.8 O.D. tubing sizes and has a back pressure of 1 bar/14.5 psig. The check valve is designed for flushing and irrigation applications and for use with certain insufflation tubing sets used in minimally invasive surgeries. **PG-31** 

## **Need Samples for Evaluation?**

You can call to request most of our standard product in quantities of 5, or less, for free application evaluation. +1 (970) 267-5200 Toll Free: (888) 404-5837

## FC Series Stopcocks

Nordson MEDICAL's stopcocks are designed to easily control the flow of a liquid or gas through the use of an on/off diverter, and are available in three basic configurations – 1-way,

3-way, and 4-way. These chemically resistant stopcocks are available as standard or high flow and are offered in polycarbonate, PEI and nylon with HDPE diverters. **PG-36** 

## RENOLIT SOLMED Granuflex 4301 Resin

Nordson MEDICAL is now offering our popular bag ports made with RENOLIT SOLMED Granuflex 4301 resin. These products demonstrate lower leachable levels and high purity. **PG-39** 

## PharmaLok<sup>™</sup> Clamps

Nordson MEDICAL's line of PharmaLok<sup>™</sup> clamps feature a state-of-the-art design that simplifies the assembly process by making it effortless to securely attach sanitary fittings to bag ports and filters. All PharmaLok<sup>™</sup> clamps are ASME BPE compliant and operate at a maximum pressure of 80 psi. Single-use and easyopen clamp sizes include .5" to .75" and

1" to 1.5", and the tube clamp supports tubing sizes from .5" to 1.25". The tube clamp is also designed for use with silicone and TPE tubing. **PG-45** 

## **RQX Series Quick Connects**

RQX Series quick connects feature unsurpassed ergonomics with a large locking button for easier handling and connection as well as a single barb open flow design. Available in widely used polypropylene and polycarbonate materials, these connectors are compatible with industry standard quick connects to simplify qualification and fit 3/8" and 1/2" tubing sizes. **PG-49** 

## TBA Series Tuohy Borst Adapters

Tuohy Borst adapters are designed to facilitate catheter introduction and are intended for interventional and diagnostic procedures where fluid backflow is a concern. **PG-56** 

## **EUROPE:**

We take our customer relationships very seriously by providing competitive pricing, live-body technical support, superior quality parts, and a friendly customer service staff to process your orders in a timely manner.

## What is ISO 80369

Hospitals and other healthcare facilities depend on a variety of catheters, tubing and syringes to deliver medications and other substances to patients through vascular, enteral, respiratory, epidural and intrathecal delivery systems. These delivery systems frequently employ fittings called luer connectors to link various system components. Unfortunately, because luer connectors are ubiquitous. easy-to-use, and compatible between different delivery systems, end users can inadvertently connect the incorrect systems together. These misconnections can cause medication or other fluids to be delivered through the wrong route, resulting in serious patient injuries and even death. In an effort to reduce the occurrence of these misconnections, the FDA is actively participating internationally to develop and implement standards for the non-interconnectability of small bore medical connectors. A joint working group established by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) leads this effort to develop a series of standards for incompatible connectors. ISO 80369-1 is the first in the series of standards and establishes the applications specified below that will have their own unique connector geometries.

## ISO 80369-1 General Requirements

- This standard is already published
- The second edition is currently in ballot
- Comments from this DIS ballot were reviewed partially in March, 2015
- Discussions were held to remove the definition of Small Bore from the standard to prevent it from limiting the connector size
  - The committee agreed to remove the number references
- The committee also discussed the following:
- Allowing softer materials in sealing surfaces
- Allowing proprietary connectors to claim compliance to 80369-1
- The standard is expected to be updated to a second edition later in 2016

## ISO 80369-2

## **Respiratory (Breathing Systems)**

- The task group now comprises of many global players from the industry
- DIS draft is complete, and the ballot is open
- R1 and R2 designs are changing to address misconnections and dead space
- The standard is expected to release by the end of 2016

## ISO 80369-3

## **Enteral Feeding**

- DIS with the proposed connector designs has passed with many favorable votes in the recent ballot
- FDA issued a notification to manufacturers of medical devices with connectors recognizing AAMI's US
   Provisional Standard for Enteral until the final 80369-3 is published: www.fda.gov
- Efforts to delay the implementation of CA Mandate Bill AB 1847 has passed through multiple steps and is awaiting the Governor's signature. A successful resolution will push the deadline to July, 2016.
- The standard is expected to be released by the end of 2015

## ISO 80369-4 Urinary and Urethral

• No updates at this time

## 11

## ISO 80369-5

## **Blood Pressure (Limb Cuff Inflation)**

- Connector test protocol and validation tests with respect to interconnectability and functionality are complete
- The standard is expected to publish by the end of 2015

## ISO 80369-6

## **Neuraxial Devices**

- Standard work is in ISO, Geneva
- Efforts to delay the implementation of CA Mandate Bill AB 1847 has passed through multiple steps and is awaiting the Governor's signature. A successful resolution will push the deadline to January, 2017.
- The standard is expected to be published by the end of 2015

## ISO 80369-7

## Intravascular (IV) or Hypodermic

- DIS complete
- Validation testing is underway
- FDIS submission still to happen
- The standard is expected to publish in early 2016

## When Will it Come into Effect?

ISO 80369-1 is published and active currently. There are several requirements that can be followed to ensure noninterconnectability with connector sets based on criteria outlined within the standard. Determining the exact time the 80369 sub-standards will come into effect can be a difficult task as they are still under development. Our team is on the front lines in the development of these standards, allowing us great insight to when these standards will be released. We will be updating our website regularly to when these changes will occur as we get more information.

## How Does it Impact Me?

Compliance with the ISO 80369 standard may require major changes on the part of medical device manufacturers. In the next few years, if these standards are approved it could mean new designs, new parts, new moldings and updating or replacing millions of components. The 80369 standard series will eventually define connector set geometries for specific applications, meaning new connectors will be needed to replace luers in a multitude of areas. Nordson MEDICAL has taken a very active role in the development of these standards to help reduce the impact of this change on our customers.

## How Can I Prepare?

While the standards have not yet been completely established, the main precaution that medical device manufacturers can take to help prevent any future problems is to stay up-to-date on ISO 80369 news. Nordson MEDICAL is one of only a few connector companies worldwide actively participating on ISO 80369 committees. To keep the medical device community apprised of new developments, we have chosen to provide information in one web location. Nordson MEDICAL has set up an online resource to help medical device OEMs stay informed of the changes and updates to this standard.

To read the latest updates, subscribe to alerts, and view related resources, go to Nordson MEDICAL's online resource at i8.nordsonmedical.com.

# **ISO 80369** Compliant Connectors

## ISO 80369-3 (Enteral Feeding) Compliant Connectors PG-13

ISO 80369-5 (Blood Pressure) Compliant Connectors **PG-13** 

With the publication of new ISO 80369 standards for small bore connectors, Nordson MEDICAL is well positioned to help you with your tubing connection needs. Our parts are tested and documented to be compliant with this new standard. Because Nordson MEDICAL's Value Plastics product line team has participated on the committees deriving these standards, you can be assured of a full understanding of the testing and compliance requirements.

A Carlos

# **ISO**80369-3 Enteral Feeding

The new ISO 80369-3 standards for enteral and gastric small bore connectors (also called ENFIT connectors) offer a smaller, lightweight, smoother design for more comfort, less snagging, and easier cleaning. Both the male connector (patient side) and female connector (supply side), offer a onepiece tethered cap for easy assembly and use. The standard SKUs cover a wide range of tubing sizes, from 5 French to 10 French, with the easy ability to customize bond-in pocket sizes for your specific tubing requirements. We offer a barbed version for silicone tubing and all of the materials are medicalgrade resins to conform with biocompatibility requirements.

Our standard products are manufactured in natural resins without color additives, however we can customize your purchases with purple, orange, or other colors as required with a 10,000 piece minimum order quantity. Our bond-in socket connectors are standard in ABS and our barbed version is an animal-free polypropylene material. These materials are well proven in the medical field to sterilize and clean-up well, and to offer chemical resistance for various foods, lipids, and drugs.

## **Extension Sets**

ISO 80369-3 (ENFIT) compliant extension sets are also available and can be customized to meet your specific needs. We offer a variety of tubing diameter sizes, lengths, and materials, with or without tethered caps. Please contact Nordson MEDICAL to discuss your requirements.

## **ISO 80369-3 COMPLIANT PARTS:**

Enteral Feeding & Gastric Fittings and Assemblies

#### ENTME050 (-8003)

Enteral Male Connector with 5.0 FR Tubing Bond-In Pocket in Natural ABS

#### ENTME064 (-8003)

Enteral Male Connector with 6.4 FR Tubing Bond-In Pocket in Natural ABS

# COMPLIANT

#### ENTME078 (-8003) Enteral Male Connector with 7.8 FR Tubing Bond-In Pocket in Natural ABS

#### ENTME098 (-8003)

Enteral Male Connector with 9.8 FR Tubing Bond-In Pocket in Natural ABS

#### ENTM230 (-6005)

Enteral Male Connector Barb for 1/8" (3.2 mm) ID Tubing in Animal-Free Polypropylene

#### ENTFE098 (-8003)

Enteral Female Connector with 10 FR Tubing Bond-In Pocket in Natural ABS

## ISO 80369-3 Accessories:

Tethered caps and plugs are not covered under the ISO 80369-3 standard, but are compatible with our enteral male and female connectors.

#### ENTFTC (-VP1)

Tethered Cap for Enteral Female Connector in Animal-Free Polyethylene

**ENTMTP (-VP1)** Tethered Plug for Enteral Male Connector in Animal-Free Polyethylene

# **ISO**80369-5 Blood Pressure

Nordson MEDICAL continues to offer a wide range of connectors for non-invasive blood pressure (NIBP) monitoring equipment. With the publication of the new ISO 80369-5 limb cuff inflation standard for blood pressure cuffs, many organizations will move towards this new worldwide standard – bayonet-style connectors. The tight dimensional specifications for the compliant connectors will drastically reduce the probability of a misconnection. Nordson MEDICAL has already modified designs for parts to be 100% compliant with the blood pressure male connectors that fit singly or in pairs on blood pressure cuffs.

These industry-standard male connectors work well with the Nordson MEDICAL female blood pressure connectors, Parker/ Rectus connectors, and other bayonet-style females, both compliant and non-compliant. And the Nordson MEDICAL single-barb designs offer an excellent secure connection with better tensile pull results and hydrostatic burst testing results than traditional multi-barb designs. The toughness of the DuPont Zytel nylon is well proven, and Nordson MEDICAL has been making these connectors for more than a decade.

## **ISO 80369-5 COMPLIANT PARTS:** Bayonet Male Cuff Connectors

#### BPM013 (-1)

Blood Pressure Monitor Bayonet Connector to 500 Series Barb, 80369-5 Compliant, 1/8" (3.2 mm) ID Tubing

## BPM240 (-1)

Blood Pressure Monitor Bayonet Connector to 200 Series Barb, 80369-5 Compliant, 5/32" (4.0 mm) ID Tubing

## BPM025 (-1)

Blood Pressure Monitor Bayonet Connector to 500 Series Barb, 80369-5 Compliant, 5/32" (4.0 mm) ID Tubing

## BPM035 (-1)

Blood Pressure Monitor Bayonet Connector to 500 Series Barb, 80369-5 Compliant, 3/16" (4.8 mm) ID Tubing

# **DESIGN** Center

## Fitting The World's Most Fluid Designs

## How it Works:

## Define Your Product Requirements:

Describe your application and requirements or provide us with a drawing or simple sketch. From here we can determine what details are needed and can help define the most ideal and costeffective connector concept for your application.

"It would have taken me two to three times as long and two to three times as much money without Nordson MEDICAL. This is who you want to work with. They have become part of our team."

## Call the Design Center to Explore Your Connector Options:

There may be a suitable off-the-shelf solution or perhaps we can adapt an existing connector to your application. Often the modification of an existing mold can be significantly faster and less expensive.

## Collaborate:

Working with your requirements, we can help walk you through the most cost effective solutions to achieve your desired performance. That may mean simply taking 2 or 3 connectors and identifying a low-cost means to roll them into a single connector.

## Go-to-Market:

As we arrive at a solution together, we closely involve your team in the design and development process to ensure that as we approach production you have everything you need for qualification to get you to market both quickly and safely. The rest is up to you!

DO TOLL FREE in

**JESIGN** Senter

## What happens when "off-the-shelf" just doesn't work? The Design Center builds a new shelf!

## Your Solution. Faster. For Less.

With project requirements and timelines becoming increasingly demanding, it's critical to partner with a team who understands fluid management solutions and the rigors of today's medical device and biotech markets. Team up with the Nordson MEDICAL Design Center for your custom connector needs, whose market leading service, quality and delivery you've already come to know.

## Here's What You Can Expect From Our Design Center and the "Specialists in Fluid Connections":

**Save Time** – Talk to someone who understands your application requirements. The Design Center works with you to determine the most suitable material and design options to deliver the best performing product as cost-effectively as possible. We also utilize state of the art rapid prototyping techniques and in-house testing facilities to keep your project moving quickly and economically.

**Save Money** – Start with our existing product offering of over 4,000 fluid connectors, or utilize some of our existing mold configurations toward perfectly customizing a part to your application. Don't forget, our technical and design assistance is FREE! **Save Trouble** – Ensure that everything around your project will be done right the first time. Our dedicated and experienced staff will make sure that the finest details are covered from the time that we review your product requirements to the final product qualification.

The Design Center can also assist you in developing fluid connectors that comply to emerging standards. Nordson MEDICAL is an active member of the ISO 80369 standards group defining new standard connectors for small bore, medical device connections.

**Custom Assembly –** Our knowledgeable team of engineers offers capabilities to the biotechnical market through custom-made assemblies created in our design center. From systems using a single fitting to complex configurations utilizing various components, we can design complete assemblies to your requirements.

To get started today contact your Nordson MEDICAL Design Services Manager: Toll Free - +1 (866) 582-0965 Email - designcenter@nordsonmedical.com dc.nordsonmedical.com

## Our medical quick connect line is incredible -

Nordson MEDICAL's quick connect line offers six distinct families of quick connect fittings (quick disconnect couplings), the MQC, PQC, RQC, RQX, SBL, and XQ Series products, for applications covering 1/8" (3.2 mm) through 1/2" (12.7 mm) ID tubing.

The MQC Series is an easy to use Push-to-Connect design and arguably one of the most versatile quick connect solutions on the market. With its large, ergonomic buttons and wide selection of colors, both designers and end users will embrace its unique features. The MQC Series of connectors are available in nylon and fit 1/8" (3.2 mm), 5/32" (4.0 mm) and 3/16" (4.8 mm) ID tubing. Between its versatility, one-of-a-kind design, and loud "click" indicating a secure fit, misconnects will be a problem of the past!

## **Custom Assembly**

We produce standard components to fit your current assemblies and devices, but we also provide custom solutions by applying a variety of assembly options, such as joining fittings, connectors, filters, and other components to tubing. From systems using a single fitting to complex configurations utilizing various components, we can design complete assemblies to your requirements.

# **RQSeries** Quick Connects

QUICK

Nordson MEDICAL has developed a more robust alternative for bioprocessing needs with the RQC Series and RQX Series offering a cost effective solution for flexible tubing connections in single use systems. The connector set is best in fit, form and function, and features a user-friendly interface that includes a large guarded button for a secure lock to guard against disconnects, and lofted lead-in for improved ease of connection. The more reliable locking feature gives you peace of mind knowing your connection is secure.

## Features & Benefits:

- Materials meet USP Class VI and ISO 10993 criteria
- Several connector configurations available in commonly used polypropylene and polycarbonate materials
- Large ergonomic button and thumb pad with secure latch and optional integrated locking mechanism
- Platinum-cured silicone o-rings
- Plugs and caps available to maintain fluid path integrity
- Supports cryogenic applications to -60°C

### **Specifications:**

- Materials: Polypropylene, Tinted Polycarbonate
- **Sterilization:** Gamma radiation stable, EtO compatible, autoclavable to 121°C for up to 20 minutes
- Testing: Bioburden, Cytotoxicity, Extractables
- **RQC Series Tubing Sizes:** 1/4" (6.4 mm) and 3/8" (9.5 mm) tubing IDs
- RQX Series Tubing Sizes: 3/8" (9.5 mm) and 1/2" (12.7 mm) tubing IDs

## Quick Connects

The SBL Series connector system is so intuitive that users just automatically know how to operate it the minute they pick it up. SBL Series quick connect fittings are cost effective and designed to meet your needs for a reusable component for small-bore applications in all fluid delivery areas. The SBL Series range is available in nylon, in two contrasting colors and fits 1/8" (3.2 mm) and 3/16" (4.8 mm) ID tubing for in-line applications.

XQ Series Female Valved Connector, 700 Series Barb, 1/4" (6.4 mm) Tubing ID

# QUICK

# XQSeries Quick Connects

The XQ Series fittings, available in open flow and with integral shutoff valves, bring performance, convenience and utility to your tubing applications. XQ Series products fit 1/4" (6.4 mm), 5/16" (7.9 mm) and 3/8" ID (9.5 mm) tubing and are produced in acetal and polypropylene in five basic configurations – in-line male, in-line female, male panel mount, female panel mount and elbow. For versatility, durable XQ Series couplings interchange with other plastic and metal button-type couplings. Bring performance and service to your tubing applications by specifying XQ Series quick connects.

# SCVSeries Check Valves

SCV Series products are available in barbed, anti-siphon or one-way check valve configurations in a variety of materials and end fitments. Barbed check valves reduce the risk of contamination and feature more precise, lower crack pressures and higher flow rates. They are ideal for medical device designers focused on infusion, drainage and irrigation applications. All the valves feature a low priming volume, ease of removing air bubbles during priming and operate in any spatial orientation. All materials of construction satisfy USP Class VI and ISO 10993 criteria.

## Features & Benefits:

- Materials meet USP Class VI and ISO 10993 criteria
- DEHP- and latex-free silicone diaphragms
- All products are suitable for EtO or gamma sterilization
- Several connection configurations and materials
- Air bubbles completely removable during priming
- Operate in any spatial orientation
- Normally closed valve positioning for optimum flow control
- Available with the lowest cracking pressure on the market
- Air entrapment readily alleviated during priming

## SCV SERIES:

## Anti-Siphon Check Valves

SCV06018 (Clear and White MABS w/Silicone Diaphragm) Check Valve, Socket Fitment for 0.095" (2.4 mm) OD Tubing

Cracking Pressure: ≤ .100 psig Max. Back Pressure: 116 psig Flow Rate: ≥ 110 ml/min Flow Direction: Left to right

SCV06308 (Clear Transparent Polycarbonate and Green Polycarbonate w/Silicone Diaphragm) Check Valve, Female Locking Luer to Pocket for .098" (2.5 mm) OD Tubing

Cracking Pressure: 2.9 +/- 0.725 psig Max. Back Pressure: 304.5 psig Flow Rate with Glucose: ≥ 150 ml/min Flow Direction: Left to right

SCV06335 (Transparent Polycarbonate and White Polycarbonate w/Silicone Diaphragm) Check Valve, Female Locking Luer to Pocket for .118" (3.0 mm) OD Tubing

Cracking Pressure: 2.9 +/- 0.725 psig Max. Back Pressure: 304.5 psig Flow Rate: ≥ 150 ml/min Flow Direction: Left to right

805 West 71st Street • Loveland, CO 80538 • USA

#### SCV06246 (Clear Transparent MABS and Blue Transparent SAN w/Silicone Diaphragm)

Check Valve, Pocket for .122" (3.1 mm) OD Tubing to Male Locking Luer

Cracking Pressure: 2.9 +/- 0.725 psig Max. Back Pressure: 304.5 psig Flow Rate: ≥ 150 ml/min Flow Direction: Left to right

SCV06248 (Blue SAN and Clear MABS w/Silicone Diaphragm) Check Valve, Pocket for .161" (4.0 mm) OD Tubing to Male Locking Luer

Cracking Pressure: 2.176-3.626 psig Max. Back Pressure: 304.579 psig max 30 sec. Flow Rate: 170 ml/min Flow Direction: Left to right

SCV06264 (Clear and Blue MABS w/Silicone Diaphragm)
Check Valve, Pocket for .161" (4.0 mm) OD Tubing to .161" (4.0 mm)
OD Tubing

Cracking Pressure: 1.450-4.351 psig Max. Back Pressure: 304.579 psig Flow Rate: max 200 ml/min Flow Direction: Left to right

#### SCV06272 (Transparent SAN and Blue Transparent MABS w/Silicone Diaphragm)

Check Valve, Pocket for .161" (4.1 mm) OD Tubing to Female Locking Luer

Cracking Pressure: 2.9 +/- 0.725 psig Max. Back Pressure: 304.5 psig Flow Rate: ≥ 150 ml/min Flow Direction: Left to right

#### SCV06249 (Blue Transparent and Transparent MABS w/Silicone Diaphragm)

Check Valve, Pocket for .165" (4.2 mm) OD Tubing to Male Locking Luer

Cracking Pressure: 2.9 +/- 0.725 psig Max. Back Pressure: 304.5 psig Flow Rate: ≥ 150 ml/min Flow Direction: Left to right

SCV06329 (Clear and Blue SAN w/Silicone Diaphragm) Check Valve, Female Locking Luer Linden

Cracking Pressure: 1.450-4.351 psig Max. Back Pressure: 304.579 psig max 30 sec. Flow Rate: 200 ml/min Flow Direction: Left to right

#### SCV06252 (Clear Transparent SAN and Blue Transparent SAN w/Silicone Diaphragm)

Check Valve, Female Locking Luer to Male Locking Luer

Cracking Pressure: 2.9 +/- 0.725 psig Max. Back Pressure: 304.5 psig Flow Rate with Glucose: ≥ 150 ml/min Flow Direction: Left to right

## SCV06352 (Clear MABS w/Silicone Diaphragm)

High Flow Check Valve, Pocket for .346" (8.8 mm negative) OD Tubing to Pocket for .346" (8.8 mm negative) OD Tubing

Cracking Pressure: ≤ .290 psig Max. Back Pressure: 14.500 psig Flow Rate: > 1000 ml/min Flow Direction: Left to right

## SCV SERIES:

**One-Way Check Valves** 

SCV08053 (White SAN w/Silicone Diaphragm w/Natural LDPE)

Check Valve, Female Locking Luer to Male Locking Luer w/Cap

Cracking Pressure: ≤ .174 psig Max. Back Pressure: 87.023 psig Flow Rate: ≥ 90 ml/min Flow Direction: Left to right

#### SCV10090 (Clear Polycarbonate w/Silicone Diaphragm) Check Valve, Female Locking Luer to Pocket for .118" (3.0 mm) OD Tubing

Cracking Pressure: ≤ .174 psig Max. Back Pressure: 87.023 psig Flow Rate: ≥ 90 ml/min Flow Direction: Left to right

#### SCV17090 (Clear Polycarbonate w/Silicone Diaphragm)

Check Valve, Female Locking Luer to Socket for .118" (3.0 mm) ID x .161' (4.1 mm) OD Tubing

Cracking Pressure: ≤ .174 psig Max. Back Pressure: 87.023 psig Flow Rate: ≥ 90 ml/min Flow Direction: Left to right

#### SCV21053 (Clear and White MABS w/Silicone Diaphragm)

Check Valve, Socket for .118" (3.0 mm) ID x .161" (4.1 mm) OD Tubing x 2

Cracking Pressure: ≤ .174 psig Max. Back Pressure: 87.023 psig Flow Rate: ≥ 90 ml/min Flow Direction: Left to right

#### SCV22050 (Clear SAN and Clear MABS w/Silicone Diaphragm)

Check Valve, Socket for .118" (3.0 mm) ID x .161" (4.1 mm) OD to Male Locking Luer

aspiration and male luer discharge ports.

No need for disconnection to fill syringe

Clean fluid transfer from supply to site

Bi-directional double check valve

• Satisfies USP Class VI criteria

Features & Benefits:

• Low cracking pressure

Nordson MEDICAL's unique DCV Series bi-directional double check valve is designed to transfer clean fluid from a supply vessel to a use site. The fluid supply vessel

is connected to the valve supply port (chimney) using a

luer connection or tubing. The fluid is withdrawn from the

supply vessel by a syringe or other device connected to the aspiration port. When the syringe is compressed the fluid is then transferred, through the exit port, to the use site without adulterating the fluid. DCV Series bi-directional valves are produced in polycarbonate resin using a silicone diaphragm, with two available inlet ports connecting to the female luer

# NVSeries Needlefree Swabable Valves

Nordson MEDICAL now offers cost efficient needlefree swabable valves featuring higher flow rates, low priming volumes, and a straight through design for unobstructed flow. The valves don't require caps, and the septum surface can be easily disinfected. Designed for the injection and aspiration of fluids, particularly for IV applications, cardiology, and catheters, the hermetic septum seal reduces the risk of biofilm formation and contamination. Available in widely used polycarbonate and copolyester materials, these valves are compatible with all industry standard luer syringes and connects, validating them as an efficient component solution for the OEM market.

## Features & Benefits:

- Valve stems and bodies securely mate with all standard luer syringes and connectors
- Several configurations that are easy to customize
- Normally closed system to reduce the risk of infection
- Low priming volume and high flow rates
- Straight through design for unobstructed flow
- Gamma radiation stable and EtO compatible
- Not made with natural rubber latex or DEHP

The NV Series products are shipped bulk, non-sterile and are single patient use medical device components requiring further processing (e.g. assembly, packaging, sterilization) before clinical use. The buyer is responsible for determining effects of processing/multiple usage on these components, appropriateness of the component in the final application, and pre/post shelf life.

# FCSeries Stopcocks

FC Series stopcocks are designed to easily control the flow of a liquid or gas through the use of an on/off diverter, and are available in three basic configurations – 1-way, 3-way, and 4-way. These chemically resistant stopcocks bring efficiency, convenience, and practicality to your tubing applications and are 510(k) cleared.

### Features & Benefits:

- 1-way, 3-way, and 4-way configurations
- Chemically resistant
- 510(k) cleared
- Not made with DEHP
- Diverter arrows provide a clear indication of flow
- Custom solutions available, including manifolds, ganged manifolds, and tubing assemblies
- Standard flow and high flow options
- Polycarbonate, PEI, nylon, and HDPE materials

# **BIOPROCESS** Fittings

# **BAG** Ports

Nordson MEDICAL's new high tech series of bag ports offers a variety of benefits new to the biopharmaceutical industry through a unique design. Value Pharma<sup>™</sup> resin holds credentials that many manufacturers deem fundamental, such as animal derivative free qualification, USP Class VI certification, and the guarantee of heat sealing and conformance with polyethylene bags. The resin then goes even further to provide a strong, 24-hour resistance to alcohol stress cracking. RENOLIT SOLMED Granuflex 4301 resin demonstrates lower leachable levels and high purity.

Their unique design sets these new ports apart from existing solutions. They not only conform with frequently utilized tubing sizes from 1/8" (3.2 mm) to 3" (76.2 mm), but they are also designed to ASME and BPE ferrule specifications, allowing them to work with leading industry fittings, filters and other devices. However, the most notable of the bag ports' specifications are those that are new to the industry – the parabolic lead and the alignment ribs. These two features, respectively, reduce the amount of time it takes to drain a bag by 24 percent and improve flow dynamics through the port.

# Features & Benefits:

# Compliant to ASME BPE Ferrule Specification

• Works with leading industry single-use bags

# Barb Sizes Consist of Range From 1/8" (3.2 mm) to 1" (25.4 mm) and Ferrule TC Style

• Works with the frequently utilized tubing sizes found in the pharmaceutical industry

# Parabolic Lead

- Reduces the time it takes to drain a bag by 17 to 24%
- Similar results for both fluid and powder applications

# Alignment Ribs

• Improves fluid dynamics of flow through the port

# Value Pharma<sup>™</sup> Resin

- Ensures heat sealing with polyethylene bags
- Includes a USP Class VI certification
- Animal derivative free
- Resistant to alcohol stress cracking

# **RENOLIT SOLMED Granuflex 4301 Resin**

• Demonstrates lower leachable levels and high purity

# **OPPOSING** Barb Ports

Nordson MEDICAL now offers the biomedical market opposing barb ports. The larger ports can be used in filling applications, and they are also ideally suited to work with sensors.

# Features & Benefits:

- Easy to heat seal into film material
- Can be used in filling applications
- Port plates featuring Value Pharma<sup>™</sup> resin
- Works great with silicone and TPE style tubing
- Better tube retention
- 600 Series barb sizes
- Animal-free polyethylene
- Materials meet USP Class VI criteria and are ADF compliant
- Fits tubing sizes from 3/16" to 3/4"

# BIOClamp

BioClamp® plastic quick-release clamps are specifically designed to meet the needs of busy pharmaceutical and bioprocessing laboratories, offering full flexibility in singleuse applications. The clamps are specifically designed to work with Nordson MEDICAL's SF Series sanitary fitting Mini and Maxi flanges, related caps and gaskets, and in conjunction with OEM filters and bioprocessing bags. The clamp is lightweight and easy for technicians to install and provides for quick and convenient assembly release.

# Features & Benefits:

- Can be SIP repeatedly
- Can be autoclaved repeatedly at 134°C for 5 minutes
- Can be subjected to 60 kiloGrays without weakening
- Reduced distortion on polymeric components
- More compatible with current manufacturing than steel
  - Greater flexibility in operation
- Single-use disposal
- Applications
  - Bioprocessing
  - Single-use technology (SUS)
  - Drug discovery and development
  - Fluid transport
  - Pharmaceutical scale up
  - Sterile bag systems

# **Custom Assembly**

# PHARMALok<sup>®</sup>

Clamps

The biopharmaceutical industry has made a strong move towards single-use technology, so Nordson MEDICAL has developed ground-breaking clamp designs that simplify the assembly process by making it effortless to securely attach sanitary fittings to bag ports and filters.

Nordson MEDICAL's PharmaLok<sup>™</sup> clamps are ASME BPE compliant and operate at a maximum pressure of 80 psi. Single-use and easy-open clamp sizes include .5" to .75" and 1" to 1.5", and the tube clamp supports tubing sizes from .5" to 1.25".

Pharmalok clamps provide a significant advancement for the industry, as a number of existing solutions either require tools for closure or consist of multiple components, which turns what should be a simple operation into a difficult and awkward process.

Easily operated with one hand, PharmaLok's patented design allows effortless attachment of fittings to bag ports and filters. The user simply rests the fitting in the PharmaLok's regulation-sized slot, lightly grips the surrounding handles, and listens for the sound of clicks to confirm a secure connection.

# Single-Use Clamps & Easy-Open Clamps

# Features & Benefits:

- ASME BPE 2014 DT-9.3.1 compliant
- DIN compliant
- Easy to use, one-handed closure no tools needed
- Tamper evident and zip tie compatible
- 360° compression
- Connects both plastic and stainless steel fittings
- SIP/CIP compatible

# Specifications:

**Materials:** USP Class VI & ISO 11137 certified glass-filled nylon **Sterilization:** Gamma Radiation up to 50 kGy, autoclavable up to 273°F (134°C) for a maximum of 30 min.

Sizes: .5" to .75" and 1" to 1.5"

**Operating Temperature:** -94°F (-70°C) to 140°F (60°C) **Maximum Pressure:** 80 psi (conforms to ASME BPE-2014 PM-4.2.2)

Nordson MEDICAL has developed a more robust alternative for bioprocessing needs with the RQC Series and RQX Series offering a cost effective solution for flexible tubing connections in single use systems. The connector set is best in fit, form and function, and features a user-friendly interface that includes a large guarded button for a secure lock to guard against disconnects, and lofted lead-in for improved ease of connection. The more reliable locking feature gives you peace of mind knowing your connection is secure.

# Features & Benefits:

- Materials meet USP Class VI and ISO 10993 criteria
- Several connector configurations available in commonly used polypropylene and polycarbonate materials
- Large ergonomic button and thumb pad with secure latch and optional integrated locking mechanism
- Platinum-cured silicone o-rings
- Plugs and caps available to maintain fluid path integrity
- Supports cryogenic applications to -60°C

# **Specifications:**

- Materials: Polypropylene, Tinted Polycarbonate
- **Sterilization:** Gamma radiation stable, EtO compatible, autoclavable to 121°C for up to 20 minutes
- Testing: Bioburden, Cytotoxicity, Extractables
- **RQC Series Tubing Sizes:** 1/4" (6.4 mm) and 3/8" (9.5 mm) tubing IDs
- RQX Series Tubing Sizes: 3/8" (9.5 mm) and 1/2" (12.7 mm) tubing IDs

# **SANITARY FITTINGS:** Mini Flange

#### SFMN655 (-6005 -J1A)

Sanitary Fitting, Mini Flange 3/4" to 600 Series Barb, 1/4" (6.4 mm) Tubing ID

The SF Series sanitary fittings are based on design concepts calling for a heavy-duty part with superior side load strength, while providing superior flow-through characteristics, making them the connectors of choice for single-use bioprocesses. Pharmaceutical professionals find these plastic fittings offer all the benefits of disposable parts while offering performance capabilities not found in earlier versions of flanged fittings.

# Features & Benefits:

- Animal-free materials: No BSE documentation required
- Radiused flow surfaces: Smooth uninterrupted flow
- "Mini" & "Maxi" sizes: Easy to retrofit current operations, works with commercially available biopharm clamps
- No Particulate build-up: Interior surface controlled to 15 Ra microinch

### **Specifications:**

**Materials:** Animal-Free Polypropylene, Natural PVDF **Tubing Sizes:** 1/4", 3/8", 1/2", 3/4", 1"

**Leak Resistance:** Tested at 80 psi air under water for 90 seconds with no leaks

# Tubing Removal Force:

- 1/4" PP with C-Flex<sup>®</sup> shore A tubing: 21 lbs.
- 1/2" PP with C-Flex<sup>®</sup> shore A tubing: 89 lbs.
- 1" PP with C-Flex<sup>®</sup> shore A tubing: 121 lbs.

Interior Surface Finish: 15 Ra Microinch

# **TUOHY BORST** Adapters

# Adult Without Side Port **PG-57**

# Pediatric Without Side Port PG-57

# Adult With Side Port **PG-57**

# **TBASeries** Tuohy Borst Adapters

Tuohy Borst adapters are designed to facilitate catheter introduction and are intended for interventional and diagnostic procedures where fluid backflow is a concern.

Tuohy Borst adapters are available in convenient bag sizes of 100 and 25 with larger sizes attainable on request and lower minimum order quantities to suit your needs.

# Features & Benefits:

- Male luer terminations that comply with EN/ISO standards
- With and without side ports for delivering medication
- Cap does not remove at fully opened position
- Leak proof seal during interventional and diagnostic procedures
- Materials: clear PVC, silicone adult gaskets, and Kraton pediatric gaskets
- Gasket through hole ID from 0.025" to 0.100"
- Different cap color options

# Part Drawings Online!

# Looking for Something Different?

Most of our best product ideas have come from you, our customers. While we pride ourselves on our extensive product offering, we recognize that your needs are ever-changing and that our products, too, must adapt to your needs.

If there's a new product you think Nordson MEDICAL should make, please send us an Email at **designcenter@nordsonmedical.com** describing your product concept in as much detail as you desire. We will contact you with any questions, and who knows - the next catalog edition could include products YOU told us to build.

See page 14 for more information on the Design Center!

**LUER** Fittings

# **Our Luer Tapers**

Nordson MEDICAL's luer tapers are made to the ISO 594-1 and ISO 594-2 standards, and may be connected to other luers meeting these ISO standards. Please test your application to verify the performance of the interconnection.

Nordson MEDICAL's luer fittings come in over 100 configurations and several materials for the device designer, joining tubing from 1/16" (1.6 mm) ID to 1/4" (6.4 mm) ID.

# Features & Benefits:

**Published ISO Design Standard** 

- Well understood worldwide
- Often assures interconnections without need to retrofit

# Rotating Lock Permits Tube Positioning Prior

# To Tightening

- Minimizes twisting and kinking of tubing
- **Tapered Cone Seal**
- Reliable
- Inexpensive
- Uncomplicated
- **Available In Many Materials**
- Facilitates optimal material selection for your application

# Inexpensive

- Facilitates single-use
- Easy To Understand
- Ease of use in field
- Many Configuration Options
- Adaptable to wide range of applications
- Security Options (Fixed Lock, Rotating Lock, No Lock)
- Tailorable to your specific application

# **Custom Assembly**

We produce standard components to fit your current assemblies and devices, but we also provide custom solutions by applying a variety of assembly options, such as joining fittings, connectors, filters, and other components to tubing. From systems using a single fitting to complex configurations utilizing various components, we can design complete assemblies to your requirements.

MLRL055 (-1 -6005 -9) Male Luer to 500 Series Barb, 1/4" (6.4 mm) ID Tubing (May be used with separate rotating lock ring; FSLLR)

MLSL055 (-1 -6005 -9) Male Luer to 500 Series Barb, 1/4" (6.4 mm) ID Tubing (May be used with separate stationary lock ring; FSLLR)

# It's a Lock with Nordson MEDICAL!

Our MLRL and MLSL Series of fittings can be used both as a slip luer or as a locking luer with the addition of our FSLLR luer lock ring, which allows color coding without flow path contact. Our MLSL/FSLLR combination results in a stationary lock ring. Use a combination of MLRL and FSLLR to create a color coded rotating lock ring.

Part drawings, minimum order quantities, and CAD requests can be found online. Visit **www.nordsonmedical.com** or contact Sales at **sales@nordsonmedical.com**.

# Looking for Something Different?

Most of our best product ideas have come from you, our customers. While we pride ourselves on our extensive product offering, we recognize that your needs are ever-changing and that our products, too, must adapt to your needs.

If there's a new product you think Nordson MEDICAL should make, please send us an Email at

**designcenter@nordsonmedical.com** describing your product concept in as much detail as you desire. We will contact you with any questions, and who knows - the next catalog edition could include products YOU told us to build.

See page 14 for more information on the Design Center!

# Dinamap<sup>®</sup> Monitor Adapters **PG-69**

# Dinamap<sup>®</sup> Cuff Connectors **PG-70**

# BPL Series 1/4 Turn Cuff Connectors PG-71

# **BPF**Series **Blood Pressure Fittings**

The BPF Series features an ergonomic design for simple one-handed operation. Easy to connect and disconnect to existing tubing, many locations are replacing their metal bayonet connectors with these light weight connectors. The BPF Series also works well with the new ISO 80369-5 limb cuff Inflation standard compliant parts. The standard defines the bayonet as the only approved design.

# **BPL SERIES:** 1/4 Turn Cuff Connectors

# BPLF230 (-8012)

Quarter-turn Female Blood Pressure Cuff Connector to 200 Series Barb, 1/8" (3.2 mm) Tubing ID

# **BPLSeries** Blood Pressure Fittings

The BPL Series quick connect fittings offers superior ergonomics - a requirement for many designers in their effort to accommodate end users. The BPL's ease-of-use stems largely from a winged male fitting and Nordson MEDICAL's patented 10-point grip, making the quarter-turn connection simple and easy to accomplish. A solid snap, that can be both heard and felt, will then reassure the end user that a secure fit has been made.

Another unique characteristic of the BPL Series is the true tube stop on the rotating half of the two connectors. This allows tubing to be fully assembled onto the barb without its edge pushing against the body of the connector.

# Features & Benefits:

# **Ergonomic Wing-Grip Design**

- Easier to connect and disconnect than market similars
- 360° of tubing rotation

# **Quarter-Turn Design with Closure Feedback**

• Positive reinforcement of secure connection

# Sizes to Fit 1/8" (3.2 mm) and 5/32" (4.0 mm) ID tubing

- Fits almost all cuffs
- 5/32" hose barb perfectly fits most common cuff tube size

## 200 Series Single Barbs

- Ease of assembly
- Enhanced resistance to tube pulloff
- Medical Grade ABS Material (Fluid Path)
- Withstands bulk sterilization processes
- Holds up under demanding application conditions

## Acetal (Wing-Grip Shroud)

• Added strength

### BPLF240 (-8012)

Quarter-turn Female Blood Pressure Cuff Connector to 200 Series Barb, 5/32" (4.0 mm) Tubing ID

#### **BPLM230 (-001) White ABS, White Acetal, Buna-N O-Ring** Quarter-turn Male Blood Pressure Cuff Connector to 200 Series Barb, 1/8" (3.2 mm) Tubing ID

# Part Drawings Online!

Nordson MEDICAL provides dimensional drawings available for download for all of its fittings. **www.nordsonmedical.com** 

# **TUBE-TO-TUBE** Connectors

Nordson MEDICAL offers barbed tube fittings and tubing connectors in sizes ranging from 1/16" (1.6 mm) to 1" (25.4 mm) tubing ID in over 100 separate configurations in nylon, polypropylene, polycarbonate and PVDF, with other engineering resins available on special order. Available barbed fitting styles include straight tube connectors, elbow fittings, tee fittings, crosses, Y (wye) connectors, multi-port connectors, and multiple straight, elbow and tee reducer combinations.

Several barb styles are offered to provide designers the widest range of assembly forces, pulloff resistance and blowoff resistance – without the need for clamps. Review the descriptions for each of the styles to determine what's best for your application.

## LARGE TUBE-TO-TUBE: Elbow

## **Reference part shown: L070**

Due to size we are not able to display all large Tube-To-Tube connectors. Please see **www.nordsonmedical.com** for part reference. Minimum package quantities vary by tube IDs, please verify minimum package sizes when placing orders.

L070 (-0 -6005)

Elbow Connector with 500 Series Barbs, 3/8" (9.5 mm) ID Tubing

L970 (-9)

Elbow Connector with 900 Series Barbs, 3/8" (9.5 mm) ID Tubing

L080 (-<mark>0</mark> -6005)

Elbow Connector with 500 Series Barbs, 1/2" (12.7 mm) ID Tubing

L975 (-9) Elbow Connector with 900 Series Barbs, 1/2" (12.7 mm) ID Tubing

L090 (-0 -6005) Elbow Connector with 500 Series Barbs, 5/8" (16.0 mm) ID Tubing

L100 (-0 -6005) Elbow Connector with 500 Series Barbs, 3/4" (19.0 mm) ID Tubing

L110 (-0 -6005) Elbow Connector with 500 Series Barbs, 1" (25.4 mm) ID Tubing

L6110 (-6005) Elbow Connector with 600 Series Barbs, 1" (25.4 mm) ID Tubing

#### CF494 (-6 -6005)

Low-profile Elbow Connector with Custom 600 Series Barbs, 1" (25.4 mm) ID Tubing

## TUBE-TO-TUBE:

Elbow Reducer

#### L220/210 (-1 -2 -6005 -9 -J1A)

Elbow Reduction Connector with 200 Series Barbs, 3/32" (2.4 mm) and 1/16" (1.6 mm) ID Tubing

#### L420/410 (-1 -2 -6005 -J1A)

Elbow Reduction Connector with 400 Series Barbs, 3/32" (2.4 mm) and 1/16" (1.6 mm) ID Tubing

#### L230/210 (-1 -2 -6005 -9 -J1A)

Elbow Reduction Connector with 200 Series Barbs,  $1/8^{\rm \prime\prime}$  (3.2 mm) and 1/16" (1.6 mm) ID Tubing

#### L430/410 (-1 -2 -6005 -J1A)

Elbow Reduction Connector with 400 Series Barbs, 1/8" (3.2 mm) and 1/16" (1.6 mm) ID Tubing

#### L230/220 (-1 -2 -6005 -9 -J1A)

Elbow Reduction Connector with 200 Series Barbs,  $1/8^{\prime\prime}$  (3.2 mm) and  $3/32^{\prime\prime}$  (2.4 mm) ID Tubing

## L430/420 (-1 -2 -6005 -J1A)

Elbow Reduction Connector with 400 Series Barbs,  $1/8^{\circ}$  (3.2 mm) and  $3/32^{\circ}$  (2.4 mm) ID Tubing

#### L430/220 (-9002)

Elbow Reduction Connector with a 400 Series Barb, 1/8" (3.2 mm) and a 200 Series Barb, 3/32" (2.4 mm) ID Tubing

80

## Reference part shown: L070/055

Due to size we are not able to display all large Tube-To-Tube connectors. Please see **www.nordsonmedical.com** for part verify minimum package sizes when placing orders.

#### L070/055 (-0 -6005)

Elbow Reduction Connector with 500 Series Barbs, 3/8" (9.5 mm) and 1/4" (6.4 mm) ID Tubing

#### L080/070 (-0 -6005)

Elbow Reduction Connector with 500 Series Barbs, 1/2" (12.7 mm) and 3/8" (9.5 mm) ID Tubing

#### L100/080 (-0 -6005)

Elbow Reduction Connector with 500 Series Barbs, 3/4" (19.0 mm) and 1/2" (12.7 mm) ID Tubing

#### L110/100 (-0 -6005)

Elbow Reduction Connector with 500 Series Barbs, 1" (25.4 mm) and 3/4" (19.0 mm) ID Tubing

## **TUBE-TO-TUBE:**

Tee

## T10 (-1 -2 -6005 -J1A)

Tee Connector with Classic Series Barbs, 1/16" (1.6 mm) ID Tubing

T210 (-1 -2 -6005 -9 -J1A)

Tee Connector with 200 Series Barbs, 1/16" (1.6 mm) ID Tubing

#### T410 (-1 -2 -6005 -J1A)

Tee Connector with 400 Series Barbs, 1/16" (1.6 mm) ID Tubing

#### T20 (-1 -2 -6005 -J1A) Tee Connector with Classic Series Barbs, 3/32" (2.4 mm) ID Tubing

## T220 (-1 -2 -6005 -6012 -9 -J1A)

Tee Connector with 200 Series Barbs, 3/32" (2.4 mm) ID Tubing

## **TUBE-TO-TUBE:**

# **THREADED** Fittings

## The X Thread

Nordson MEDICAL X Series components have a tapered 10-32 thread that functions like a pipe thread. In comparison to standard 10-32 UNF threaded fittings, the tapered design works better with oversized ports and ports which are not perpendicular to the face of the component.

The 120 degree chamfer under the hex provides a seal when the fitting is tightened into a port with a countersink as shown below. It also seals on the thread due to interference on the pitch diameter. When using an elbow or tee, the tapered thread tightens radially and facilitates directional alignment of the barb.

## **Other Thread Series**

K, B, C and D Series fittings, designed for use with 10-32 UNF ports, are straight-threaded components. These fittings seal against the 120 degree chamfer under the hex on the fitting and do not tighten radially as they are assembled. S Series fittings are straight threaded components for 1/4-28 UNF ports, M5 Series are for M5 x .8 ports and M6 Series are for M6 x 1 ports.

Part numbers for fittings with pipe threads are noted below. Those for use with 1/16-27 NPT ports have part numbers prefixed with 16; those for 1/8-27 NPT ports have part numbers prefixed with 18; and those for 1/4-18 NPT ports have part numbers prefixed with 14.

The features shown below must be incorporated into the port when using our B, C, D, X, K, S, M5 and M6 Series fittings. Failure to do so will jeopardize the performance of the seal between the fitting and port. For applications in which this seal is highly critical, we recommend that you contact a sealant specialist.

# When working with threaded parts, Nordson MEDICAL strongly recommends that you test sample parts in your application.

## **Bonding Suggestions**

Prior to actually bonding, press together a model of the manifold to use as a reference.

Do not mix plastic resins. Consult your adhesive specialist if you need to bond dissimilar materials.

These components are designed for bonding with any one of a number of solvents, but other adhesive systems may be used. When solvent bonding, use a very small gauge needle (typically 27 or 30) for best solvent control. Consult your adhesive specialist for guidance on other systems.

Apply solvent sparingly. Most solvents are low viscosity and readily wick into the bondline. Excessive solvent may compromise the aesthetics and the function of the assembly.

Press the mating components together leaving a .01-.03" gap between them for the solvent. Place the components in an orientation such that they may be rotated ¼ turn to their final position after applying the solvent.

After applying solvent, wait a few seconds, then rotate the components to their final position. When making a long manifold with bondable junction blocks it may be helpful to push the assembly against a flat surface to align the blocks before the solvent has set.

## Affordable Unique Solutions:

Design Your New Component with Build-A-Part<sup>®</sup> Bondable Components!

Component designers no longer need to be constrained by the limitations of injection molding tool design. The exact fitting, in the optimal layout for the process or product concept, is now available with Nordson MEDICAL's line of Build-a-Part<sup>®</sup> bondable components, designed for use with gases or liquids.

The Build-a-Part<sup>®</sup> system is based on combining interchangeable components, joining junction blocks and luers, hose barbs or threaded features to create the desired configuration. The features are bonded to the junction blocks using commonly available adhesives. Junction blocks and features may be bonded together to create multi-port, multi-axis products that receive and redirect fluid flow in whatever direction the designer desires. The only limitation is the designer's imagination.

114 component options are available from stock in two primary materials. Options include ISO 594-1 compliant male and female luers and hose barbs in 1/16" (1.6 mm), 3/32" (2.4 mm) and 1/8" (3.2 mm) in straight, elbow and branch tee configurations. Also available are male threads including 10-32 UNF, 1/16-27 NPT, 1/8-27 NPT, 1/4-28 UNF and M6x1 versions, and mounting devices.

The complete range is available in two primary resins: white ABS or translucent polysulfone. For ease of testing concepts, Nordson MEDICAL offers designer kits in both resins. Each kit contains hundreds of components for prototype purposes, enabling designs to be created and modified prior to production commitment.

## 75 Durometer

Our PVC tubing is a very cost effective product that can satisfy a broad array of end use applications. It is flexible in nature, optically clear, and easily sterilized.

## **Resin Grade & Technical Information:**

This tubing is extruded from Teknor® PVC80-NP resin, which is in compliance with all US Food & Drug Administration regulations for food grade use under Title 21 CFR. It is also certified USP Class VI. It can be sterilized by gamma radiation or Ethylene Oxide (EtO) gas. This tubing is not autoclavable.

## 80 Durometer

Our polyurethane tubing is extremely kink resistant. It is also highly resistant to abrasion and scuffing. It is widely accepted as a premium material for medical device use because of its flexible nature and easy sterilizability.

## **Resin Grade & Technical Information:**

This tubing is extruded from Lubrizol's® compound Pellethane PUR80A-MED, which has passed USP Class VI testing. It can be sterilized by gamma radiation or Ethylene Oxide (EtO) gas. Please do not autoclave this tubing, as it may alter the chemical nature of the resin.

## **TUBING:**

Low Density Polyethylene

#### 92 Durometer

Our polyethylene tubing has excellent mechanical and chemical resistance properties. However, please use caution if your application involves possible bending or kinking the tubing. It is a semi-rigid material and will be permanently deformed if kinked or bent too tight.

### **Resin Grade & Technical Information:**

This tubing is extruded from Equistar<sup>®</sup> LLDPE, which is in compliance with all U.S. Food & Drug Administration regulations for food grade use under Title 21 CRF. It can be sterilized by gamma radiation or Ethylene Oxide (EtO) gas. Autoclaving is not recommended.

## 50 Shore A

Our silicone tubing is extruded from a low-volatile grade, platinum-cured compound that is ideal for critical applications in pharmaceutical, biotech, medical, food, and beverage industries.

## **Resin Grade & Technical Information:**

This tubing is extruded and packaged in a Class 7 (Class 10,000) ISO-certified clean room. It has undergone extensive physical, chemical, and biological testing and meets USP Class VI, FDA CFR 177.2600, ISO 10993, European Pharmacopoeia 3.1.9, and 3-A standards. It is certified free of animal-derived ingredients and is certified by the National Sanitation Foundation for use in food equipment materials (NSF-51). It offers a temperature range use of -100° F (-73.3° C) to 400° F (204.4° C) and is sterilizable by autoclave or gamma irradiation.

## TUBING:

Thermoplastic Elastomer (TPE)

## 65 Shore A

Our Biopharmaceutical-grade TPE tubing is sterile weldable, heat sealable, moldable, and offers excellent life in peristaltic pumps. It is ideal for use in single-use processes for sampling, filling, and storage tubing set assemblies.

## **Resin Grade & Technical Information:**

This tubing is made from FDA-approved ingredients, certified free of silicone oils and animal derived ingredients, and is sterilizable by autoclave or gamma irradiation. It meets various ISO and USP standards, including Class VI, as well as European Pharmacopoeia 3.2.2.1. It also offers excellent low absorption and permeability as compared to silicone tubing.

# TSCSeries Tapered Seal

With TSC Series conical seal fittings, Nordson MEDICAL expands its range of products for small-bore connector applications in medical devices. TSC Series products offer the reliability, convenience and ease of use of luer fittings in a design that cannot be interconnected with conventional luers and avoid tubing misconnections. These luer alternatives are available in sizes to fit 1/8" (3.2 mm) and 3/16" (4.8 mm) ID flexible tubing.

## Features & Benefits:

- Ergonomic grip
- Conical (tapered) seal
- 15% higher flow capacity than conventional luers
- Polypropylene resin
- Cannot interconnect with conventional luers taper fittings
- 500 Series single barbs

## SMALL BORE CONNECTORS: Male

## **OTHER COMPONENTS:**

Tubesetter<sup>®</sup> Assembly Too

## MANUAL TUBESETTER®

Designed for rapid assembly of barb to tube connections, the Tubesetter® assembly tool joins flexible tubing and Nordson MEDICAL's barbed fitting, applying the force necessary to push the tube over the barb. No external power source is needed. Made almost entirely of acetal plastic, the device is easy to clean and suitable for operation in most environments. Consider the Manual Small Fitting Tubesetter® assembly tool for prototype assembly or lower-volume manufacturing needs.

Nordson MEDICAL's Tubesetter<sup>®</sup> assembly tool sets the standard for effortless tube set production. The Tubesetter<sup>®</sup> product joins flexible tubing and Nordson MEDICAL's barbed fitting, applying the force necessary to push the tube over the barb, providing efficiency, economy and ease of use over other connection alternatives without adhesives or solvents!

#### Manual Tubesetter®:

- Easy to use
- Excellent for volumes up to 1,000 assemblies permonth
- Accommodates tubing from 3/32" to 3/8" OD
- Configurable for: Luers Straights Ys Tees Elbows
- Requires no electricity or pneumatic power
- Long-life acetal construction

PART	DESCRIPTION
930B1A	Manual TUBESETTER® Base
930JS*	Standard Jaw Set
930AS*	Standard Flip Top Anvil
920PS*	Standard Pin Set Assembly

\*The base manual TUBESETTER® unit requires a jaw set, anvil assembly and pin set assembly. An additional engineering fee may be required for a custom application.

## Custom Assembly

We produce standard components to fit your current assemblies and devices, but we also provide custom solutions by applying a variety of assembly options, such as joining fittings, connectors, filters, and other components to tubing. From systems using a single fitting to complex configurations utilizing various components, we can design complete assemblies to your requirements.

## **Technical Assistance**

Trying to choose the correct part? Need more material information than is published in this catalog? Call Nordson MEDICAL Technical Support **(970) 267-5200**.

## **Need More Details?**

Part drawings, minimum order quantities, and CAD requests can be found online. Visit **www.nordsonmedical.com** or contact Sales at **sales@nordsonmedical.com**.

Designer Kits

#### ASSORTED DESIGNER KIT (Part number - ASSORTED KIT-001)

Our Assorted Kit provides a cross section of many components designed and manufactured by Nordson MEDICAL. This kit contains a variety of our popular components, including luers, tube-to-tube and threaded fittings. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### LUER DESIGNER KIT (Part Number - LUER KIT-001)

Our Luer Kit contains male and female luers, luer plugs, couplers, tees, elbows as well as blood pressure cuff and monitor fittings. Luer tapers are made to ISO standards. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### TUBE-TO-TUBE DESIGNER KIT (Part Number - TUBE-TO-TUBE KIT-001)

Our Tube-to-Tube Kit contains a variety of fittings in different configurations - and one that is sure to work for your application. Some of the fittings contained in this kit include straight-thru connectors, tees, elbows, Ys, and press-in plugs. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### XQ DESIGNER KIT (Part Number - XQ KIT-001)

Our XQ Kit contains an assortment of XQ Series Quick Connect Fittings (Quick Disconnect Couplings). Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### **OTHER COMPONENTS:**

Designer Kits

#### BLOOD PRESSURE DESIGNER KIT (Part Number - BP KIT-001)

Our Blood Pressure Kit contains a variety of blood pressure fittings that are manufactured by Nordson MEDICAL. Some of the fittings contained in this kit include quick connect fittings, connectors, panel mounts and adaptors. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### **BIOPHARM DESIGNER KIT (Part Number - BIOPHARM KIT-001)**

Our Biopharm Designer Kit contains a variety of fittings that are commonly found within the BioPharm market. Some of the fittings contained in this kit include our larger fittings of Y's, T's, elbows, straight through and reducing connectors ranging from 3/8" to 1", sanitary fittings, clamps, quick connects and gaskets. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### BUILD-A-PART DESIGNER KIT (Part Number - KIT01-81 - KIT01-40)

Our Build-A-Part Kits are available in two different materials: White ABS or Polysulfone. Contained in these kits are luers, elbows, tees, and junction blocks. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### INK JET DESIGNER KIT (Part Number - INK JET KIT-001)

A cross section of many components designed and manufactured by Nordson MEDICAL. Includes luers, tube-to-tube and threaded fittings commonly used by Ink Jet Printer Manufacturers. Please see www.nordsonmedical.com for a complete list of all included parts.

Note: Due to our ever increasing product line, Kit contents are subject to change without notice. Kits may include one or more of each component in a variety of materials.

#### **TECHNICAL:** Barb Dimensions

The **CLASSIC SERIES** is characterized by a longer barb that extends the sealing surface of the fitting. Tubing is expanded from 42% to 69% above its nominal ID.

1	Barb	Barb	Barb	Tube In	ternal Di	ameter
1	Size	OD	ID	Dec.	Frac.	Metric
۱.	10	0.105	0.046	0.063	1/16"	1.6 mm
E	20	0.145	0.060	0.094	3/32"	2.4 mm
١.	30	0.187	0.078	0.125	1/8"	3.2 mm
	40	0.234	0.100	0.156	5/32"	4.0 mm
	50	0.280	0.130	0.188	3/16"	4.8 mm
	60	0.355	0.187	0.250	1/4"	6.4 mm

The **200 SERIES** offers outstanding performance characteristics when used with flexible tubing. Tubing is expanded by 50% above its nominal ID, permitting high-pressure capabilities.

Barb	Barb	Barb	Tube In	ternal Di	ameter
Size	OD	ID	Dec.	Frac.	Metric
210	0.094	0.047	0.063	1/16"	1.6 mm
220	0.141	0.070	0.094	3/32"	2.4 mm
230	0.188	0.094	0.125	1/8"	3.2 mm
240	0.234	0.117	0.156	5/32"	4.0 mm
250	0.282	0.141	0.188	3/16"	4.8 mm
260	0.375	0.188	0.250	1/4"	6.4 mm

The **300 SERIES** offers outstanding performance characteristics when used with flexible tubing. Tubing is expanded by 35% above its nominal ID, permitting high-pressure capabilities in the larger tube sizes.

Barb	Barb	Barb	Tube In	ternal Di	ameter
Size	OD	ID	Dec.	Frac.	Metric
360	0.338	0.192	0.250	1/4"	6.4 mm

\*Variations of barb IDs may exist. Please visit www.nordsonmedical.com to learn more about these alternatives. The data presented here is for reference only. It was compiled to provide our customers with a means of comparing the characteristics of components at the time of publication. The particular conditions of your use and application of our products are beyond our control. Thus, it is imperative that you test our products in your specific application to determine their suitability. All information is provided without implied or express warranty or guarantee by Nordson MEDICAL or other manufacturers. None of the information provided constitutes a recommendation or endorsement of any kind by Nordson MEDICAL. The **400 SERIES** provides easy assembly while maintaining excellent pressure and tensile capabilities. Originally created for semi-rigid tubing, this series is preferred for applications where tensile/pressure properties are not highly critical, or when ease of assembly is desired. The 400 Series expands the tubing 25% above its nominal ID.

Barb	Barb	Barb	Tube In	ternal Di	ameter
Size	OD	ID	Dec.	Frac.	Metric
410	0.078	0.046	0.063	1/16"	1.6 mm
420	0.117	0.068	0.094	3/32"	2.4 mm
430	0.156	0.092	0.125	1/8"	3.2 mm
440	0.206	0.125	0.156	5/32"	4.0 mm
445	0.213	0.125	0.170	-	4.3 mm
450	0.234	0.137	0.188	3/16"	4.8 mm
460	0.313	0.184	0.250	1/4"	6.4 mm

The **500 SERIES** profile is composed of blended radii, giving it the distinct look. Each barb is designed to accommodate a range of tube sizes and tube types. Consideration should be given to flow restriction, pressure capability, and the force required for assembly of the tube.

Barb	Barb	Barb	Tube In	ternal D	iameter

Y110	1.125	0.623	1.000	1"	25.4 mm

The **600 SERIES** barbs are designed for use with silicone, C-Flex<sup>®</sup> and PVC tubing sizes commonly used in biopharm and other applications. Tubing is expanded from 18% to 34% above its nominal ID to maintain a low profile and ease of assembly, and the straight barb stem facilitates use of recommended cable tie retainers or hose clamps.

Barb	Barb	Barb	Tube In	ternal D	iameter
Size	OD	ID*	Dec.	Frac.	Metric
630	0.188	0.085	0.125	1/8"	3.2 mm
655	0.335	0.181	0.250	1/4"	6.4 mm
670	0.490	0.296	0.375	3/8"	9.5 mm
680	0.625	0.403	0.500	1/2"	12.7 mm
690	0.762	0.499	0.625	5/8"	16.0 mm
6100	0.900	0.615	0.750	3/4"	19.0 mm
6110	1.180	0.804	1.000	1"	25.4 mm

The **700 SERIES** barb is designed for use with Nordson MEDICAL's XQ Series quick connect fittings. This unique single barb is available in sizes to fit the 1/4" (6.4 mm), 5/16" (7.9 mm) and 3/8" (9.5 mm) ID tubing sizes and materials commonly used in disposable and reusable medical equipment. Reinforced PVC, unreinforced PVC and polyurethane tubing materials work well with this barb style.

E 3	Barb	Barb	Barb	Tube In	ternal Di	ameter
	Size	OD	ID	Dec.	Frac.	Metric
	755	0.329	0.204	0.250	1/4"	6.4 mm
	765	0.398	0.245	0.312	5/16"	7.9 mm
	770	0.455	0.302	0.375	3/8"	9.5 mm

The **900 SERIES** offers outstanding performance characteristics when used with flexible tubing. Tubing is expanded from 8% to 17% above its nominal ID. This barb provides high flow efficiency and excellent tensile strength. A hose clamp is recommended for this series.

	Barb	Barb	Barb	Tube In	ternal D	iameter
	Size	OD	ID	Dec.	Frac.	Metric
2	970	0.437	0.269	0.375	3/8"	9.5 mm
	975	0.573	0.358	0.500	1/2"	12.7 mm

The **3200 SERIES** is designed for semi-rigid tubing and is preferred for applications where stiffer tubing, like Polyurethane and thicker PVC tubing with harder durometers, is generally used. The 3200 Series expands the tubing between 20% and 50% above its nominal inside diameter and is designed for use with Nordson MEDICAL's PQC Series quick connect fittings. This unique triple barb is available in sizes to fit the 1/8" (3.2 mm) and 1/4" (6.4 mm) ID tubing sizes and materials commonly used in medical device and diagnostics, chemical dispensing, industrial, and compression therapy applications.

Barb	Barb	Barb	Tube In	ternal Di	ameter
Size	OD	ID	Dec.	Frac.	Metric
3230	0.188	0.059	0.500	1/8"	3.2 mm
3260	0.300	0.150	0.200	1/4"	6.4 mm

Tensile pull and burst tests were performed by an independent laboratory under controlled conditions to provide comparative performance data for the various barb styles and sizes offered by Nordson MEDICAL. Graph numbers 1 through 8 present the data from each of the tests for each barb size and each barb style connected to PVC tube.

The values shown are the means of a statistically significant sample quantity of each configuration. Nordson MEDICAL barbed fittings specifically designed for use with the tubing size indicated were used in these tests. No oversized barbs, solvents, adhesives, or secondary fasteners of any kind were used.

**Tensile Pull Test:** Tensile properties were measured to determine the force required to remove the barbed fitting from the tubing. Tensile specimens were mounted axially in a holding fixture and tested at a rate of 20 inches per minute. Failure mode was tubing separating from the barb.

**Hydrostatic Burst Test:** Hydrostatic burst testing was performed in general accordance with ASTM D1599. Failure mode was either tubing separating from the barb, the tubing bursting, or a combination of the two.

#### Performance of Barb to Tube Connections - Tensile Pull Test (lbs) - Hydrostatic Burst Test (psi)

#### **TECHNICAL: BPF** Series Properties and Performance

#### **TECHNICAL:**

Panel Mount Instructions

Panel-mounted female luers, in both FTLLB (thread style) and FTLB (lug style) series, are shown beginning on page 66. When used with our CCLR lock rings or CCR color coding rings and LNS lock nuts (see pages 67, 87), color coding of connections is easy.

The information provided here will help you mount the panel mount luers. Please note that they are intended for panel thickness of 1/16" to 1/8" (1.5 to 3 mm).

FTLLB series shown with MLSL luer, FSLLR lock ring, CCLR color coding lock ring, and LNS lock nut.

Threaded Panel Openings: Tap the panel with threads from tube fittings, panel mounts or BPMBs and use a CCR color coded ring. In this case, the fitting tightened into the panel prevents fitting rotation. Use an LNS lock nut for additional security; tighten snug plus 1/4 turn only.

**Non-Threaded Panel Openings:** Use any one of the three panel patterns shown below with a CCLR lock ring and LNS lock nut. Together, the panel opening and CCLR prevent the panel mount fitting from rotating. Tighten LNS snug plus 1/4 turn only.
